

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

INDEX of DISTRICTS, referring by Numbers to the several TABLES of ABSTRACTS	135-138
--	---------

The Right Honourable ~~SIR GEORGE GREY~~, Bart., G.C.B., Her Majesty's Principal Secretary of State for the Home Department, &c. &c. &c.

General Register Office,
23d May, 1855.

SIR,

ABSTRACTS of the numbers of the Births, Deaths, and Marriages that were registered in England during the year 1851, have been already presented to Parliament. And I have now the honour to submit to you abstracts more in detail, distinguishing the particulars of each marriage,

TABLE I.—Estimated POPULATION, Number of MARRIAGES, BIRTHS, and DEATHS registered in England in each Year from 1838 to 1851.

Years ended Dec. 31st.	Estimated POPULATION in England in the Middle of the Years.*	MARRIAGES.	PERSONS Married.	BIRTHS (exclusive of Still-born).	DEATHS.	Excess of Births over Deaths.
1838	15,512,256	119067	236134	463787	342760	121027
1839	15,515,396	123166	246332	492374	338664	153590

NOTE.—By disregarding the decimal points the Table will show the proportion to every 100,000 persons living. A correction for increase of population has been made in calculating the above results.

birth, and death, which can be compared with the facts that the census of 1851 has now placed at my disposal.

Until the census of 1851 had been taken, the rates of marriage, birth, and of mortality were necessarily calculated on the population returns of 1841; raised, as the population was known to be increasing, in the proportion inferred from the rate that had been found to prevail between 1831 and 1841. We now learn from the census that the population after the year 1841 was overstated to a slight extent by this assumption; the population of England and Wales increased rather faster in the ten years 1831-41 than it did in the ten years 1841-51, when emigration became more active; for the annual rate of increase of the population at home and abroad was 1·326 in the former, 1·216 per cent. in the latter period. The population at home in England and Wales, or exclusive of the portion of the army, navy, and merchant seamen abroad, in the *middle* of the years 1841 and 1851 was 15,929,492 and 17,982,849; and therefore, upon the hypothesis that the increase was uniformly in a geometrical ratio, the annual rate of increase was 1·220. The rate of increase in the years 1838, 1839, 1840, was taken to be 1·326; the exact proportion of the population at home in 1831 not having been determined.

The change affects the results very slightly.

The year 1851 was a year of prosperity; the marriages and the births exceeded, the deaths were less than, the average numbers. The rate of

marriage was 1·716, of birth 3·425, of death 2·199 to 100 of the population.

MARRIAGES.

154206 marriages were celebrated, so 308412 persons were married, or a number equal to 4-fifths of the deaths, and to half of the births. The fact of the rapid increase of marriages in the English population since the Registration Act came into operation is remarkable. It will be seen upon referring to Table I. that 236134 persons married in 1838, and that the marriages have since progressively increased at a faster rate than the population, so that they now exceed that number by 72278.

130958 of the marriages were performed according to the rites of the Established Church; namely, 8 upon special licence, 17,781 after licence, 99406 after banns, 3351 on superintendent registrars certificate; to which numbers should be added certain proportions of 10412 marriages, the mode of which is not indicated by the clergy.

23248 marriages were not performed according to the rites of the Established Church, but 6570 were performed according to the rites of the Roman Catholic Church; 9540 were performed in the registered places of other Christian denominations, and 6813 in superintendent registrars' offices. The number of Roman Catholic marriages exceeded by 947 those in the preceding year; the number in the superintendents' offices also increased; but the numbers in the other registered places of worship, which increased up to 1850, decreased in 1851. 65 marriages were contracted by members of the Society of Friends; and 260 by Jews. The Jewish marriages have increased rapidly; for they were 113 in 1841, and 163 in 1842.

Marriages of minors. Of the men that married 7737 or 5·02 per cent., of the women 24286 or 15·75 per cent. were under 21 years of age; and marriages at these early ages, before the faculties of the mind or the strength of the body have attained maturity, increased in the proportion of 2 to 3 in the ten years.

The counties present great differences in the proportion of early marriages; thus in Bedfordshire 13 in 100 of the males, 27 in 100 of the females that married were *not of full age*; in Herefordshire these proportions were less than 2 and 8, in Cumberland 4 and 14 in 100.

TABLE IV.—MARRIAGES. The Proportion per Cent. of *Minors* of each Sex, of Males and Females who *signed the Register with Marks*, and of Persons who were *Widowers or Widows*.

31 who signed with marks ; of the women 55 in 100 wrote their names, 45 signed with marks. The proportions during the last five years have varied little, and the instruction in the elements of knowledge is still deplorably inefficient in the country generally, and more particularly in the counties of Hertford, Bucks, Huntingdon, Bedford, Cambridge, Essex, Suffolk, Norfolk, Wilts, Shropshire, Staffordshire, Monmouth, and Wales, where less than 40 in 100 men that married made their marks.

There is a curious result deducible from the returns of this year : it appears that in 36186 marriages both husband and wife *signed with marks*, in 73141 marriages both husband and wife *wrote their names*, and in 44879 cases either the husband or the wife signed with a mark, while the other party wrote his or her name.

Does this imply that the ignorant have a tendency to marry the ignorant in a greater or less proportion than the learned up to the writing point marry the ignorant, or than those so far learned marry the learned ? It is evident from these numbers, that in 24 of every 100 families neither the husband nor the wife can write, that in 47 both can write, and that in 29 *one* of the two can write. Now as we know the number of the men who could write (106767) and the number (47439) who could not write, as well as the number of women (84394) who could write and the number (69812) who could not write, it is a purely mathematical question in the doctrine of probabilities how many of each of these four classes would come together in pairs if their union were determined simply by lot, and there was no interference of selection between the classes who can write and the classes who cannot write.

In conformity with these doctrines the *number* of marriages in which both parties were unable to write their names should have been 21477, the actual number was 36186 ; the number of marriages in which both could write should have been 58432, while it was 73141 ; and on the other hand the number of marriages in which only one could write should have been by the doctrine of chances 74298, and was 44879*. Thus the ignorant evidently intermarry by choice and the force of circumstances, to a much greater extent than would be inferred from their numbers ; and this is important, as the result is, that in 24 of every 100 of the families that are now constituted every year by marriage, the children are without the advantage of having either the father or the mother able to write.

* The combinations that would arise if the unions took place simply in conformity with the doctrine of chances, may be thus illustrated :—In one urn A. put 692 *white balls* (M.) (representing men who write), and 308 (M') *black balls* (representing men who do not write) ; in another urn B. deposit 547 *white balls* (W.) (representing women who write), and 453 *black balls* (W'), (representing women who do not write) ; then upon proceeding to draw balls in pairs, one out of each urn, it is evident that there are *two* ways in which a black and a white ball may be drawn in a pair ; namely (1) a *white ball* from A., a *black ball* from B., (2) a *black ball* from A., a *white ball* from B. ; while there is but one way in which *two white balls*, and one in which *two black balls* can be drawn together. Calculation shows that upon drawing and returning every time 100 pairs of balls from the two urns, the most probable of all proportions is, that in 38 cases both balls would be *white*, that in 14 cases both balls would be *black*, and that in 48 cases one ball would be *white*, one would be *black*. A *hundred marriages*, instead of varying in the proportions 38, 14, and 48, however, give this result, as has been seen, that in 47 cases both write, in 24 cases both sign with marks, and in 29 cases one writes and one signs with a mark ; by lot like to like would arrive 52 times, by selection and the force of circumstances it arrives 71 times. By hypothesis the balls in the two urns are well mixed. The fact that the unlettered predominate in some counties, the writers in other counties, affects the results much as the arrangement of the balls in corresponding strata in the two urns would affect the coincidence of black and white balls.

A new table (V a.) is introduced below, in which the number of marriages of bachelors, of spinsters, of widowers, and of widows respectively is compared with the numbers of the four classes found existing at the

TABLE V a.—Number of BACHELORS, SPINSTERS, WIDOWERS, and WIDOWS enumerated in each County in the year 1851; also the Numbers and Proportions who were MARRIED.

No.	REGISTRATION COUNTIES.	Numbers enumerated in 1851.				Numbers married in 1851.				Proportions married to 100 living.

The Table may be read thus:—Of the number of persons enumerated in Berkshire at the Census of 1851 there were of the age 15 and upwards 26341 Bachelors, 24580 Spinsters, 4463 Widowers, and 6934 Widows; the numbers who were married during the same year (1851) were respectively 1148, 1223, 188, and 115, being in the proportion of 4.4 Bachelors, 5.0 Spinsters, 4.3 Widowers, and 1.6 Widows to every 100 living; and so on for the other Counties. By disregarding the decimal point the proportions to 1000 living will be represented.

census in each *county* in the year (1851). This table supplies a more satisfactory measure of the rate of marriage than the ordinary comparison of the marriages with the population, including a variable proportion of children. Thus of 1000 bachelors in England, 58 married, and the proportions ranged in the counties from 82 in the Surrey portion of London to 36 in Herefordshire, and to 32 in Cumberland. Of 1000 spinsters in England 61 married, and the proportions ranged from 82 in Staffordshire to 36 in Cumberland. Upon carefully inspecting this Table it will appear that the marriages in London are in a high proportion to the marriageable part of the population, and that the proportion in the surrounding counties of Surrey, Middlesex, and Essex is conversely below the average. A certain proportion of the marriages of the country people are apparently contracted in the towns; and in the north of England, it was shown in the last report, that great numbers of the population of the northern counties marry, or pretend to marry, over the borders in Scotland, where the law of marriage is still in a loose and unsatisfactory state. The counties are arranged below in the order of the rate of marriage calculated on the population in the usual way, and it will be seen that they do not follow in the same order as they would if the order of the correct method of comparison were followed.

TABLE V b.—LONDON and the REGISTRATION COUNTIES arranged according to the PROPORTION of MARRIAGES to POPULATION.

REGISTRATION COUNTIES.	Marriages to 100 Inhabitants.	Bachelors married	Spinsters married	Widowers married	Widows married

The Table (V c.) shows, for the first time approximately the rate of marriage at different ages, and will admit of many useful applications in the solution of questions of population, as well as in the calculation of rates of insurance under certain contingencies. It will be noticed that 127 per 1000 of the spinsters of the age of 20-25 married in the year; and that marriage was contracted by 3 in 1000 spinsters of the advanced age of 55-60.

The greatest number of marriages (45531) took place in the quarter that ended on December 31st, the least number (32724) in the winter quarter that ended on March 31st. The marriages in the quarter that ended in June and September amounted to 38635 and 37316.

Besides the churches of the Establishment, 3228 buildings belonging to different religious bodies were on the register in 1851 for the solemnization of marriage in England; 1197 of the buildings belonged to the Independents,

TABLE V c.—ENGLAND. NUMBER of BACHELORS, SPINSTERS, WIDOWERS, and WIDOWS at DIFFERENT AGES who were ENUMERATED; also the NUMBERS and PROPORTIONS who were MARRIED in the Year 1851.

The Table may be read thus:—Of the Persons enumerated in 1851 of the age of 20 and under 25 there were 638442 Bachelors, 598732 Spinsters, 2108 Widowers, and 4326 Widows, while the numbers who were married during the same year and of the same ages were respectively 71049, 75872, 607, and 650, being in the proportion of 11.209 Bachelors, 12.672 Spinsters, 30.766 Widowers, and 19.649 Widows married to every 100 living, and so on at other ages. By disregarding the decimal point the proportions to 100000 living will be represented.

Note.—Of the Total Number of Marriages solemnized in 1851 the ages of the Males and Females were stated only of the following numbers; viz., 48355 Bachelors, 51141 Spinsters, 7792 Widowers, and 5206 Widows. In this Table these numbers have been proportionally raised to the total numbers married under these respective headings.

TABLE VI.—MARRIAGES in each quarter of the Years 1838 to 1851.

YEARS.	Quarters ending the last day of			
	March.	June.	September.	December.
1838	22201	29891	27764	37391

born. The sex of the child is supposed to be influenced, to a certain extent, by the relative ages of the parents; but the truth of this cannot be tested by the English returns.

42000 children were born out of wedlock in the year 1851, that is 6·8 or nearly 7 in 100 of the children were born under circumstances which often shorten and sometimes embitter their lives.

TABLE VIII.—ENGLAND. BIRTHS, 1851.—NUMBER AND PROPORTION OF Male and Female Children born in and out of Wedlock.

The proportion of the births out of wedlock is by the returns lowest in London (4 in 100); but it is probable that in many instances the births of these children are not registered or are not distinguishable in the large towns.

TABLE VIII a.—ENGLAND. Number of MARRIED and UNMARRIED WOMEN enumerated on 31st March 1851; the Number of BIRTHS IN WEDLOCK and OUT OF WEDLOCK registered in 1851; and the Proportion of Births in Wedlock to Married Women, and Births out of Wedlock to Unmarried Women.

DIVISIONS AND REGISTRATION COUNTIES.	Enumerated in 1851.				BIRTHS REGISTERED in 1851.			Proportion of Births in Wedlock to 100 Married Women.		Proportion of Births out of Wedlock to 100 Unmarried Women and Widows.	
	MARRIED WOMEN.		UNMARRIED WOMEN AND WIDOWS.		Total.	In Wedlock.	Out of Wedlock.	Under the Age of 40.	Under the Age of 55.	Under the Age of 40.	Under the Age of 55.

In seven counties, exclusive of those of the metropolis, the proportion of births out of wedlock is less than 6 in 100 births; namely, 5·3 in Monmouth, 5·4 in Devon, 5·5 in Cornwall, 5·7 in Durham, 5·8 in the Extra-metropolitan part of Middlesex, 5·8 in Huntingdon, 5·9 in Warwick; in six counties the proportion of illegitimate births exceeds 9 in 100 births, namely, 9·1 in Westmorland, 9·5 in Nottingham, 9·9 in Shropshire, 10·2 in Herefordshire, 10·5 in Cumberland, and 11·1 in Norfolk; so that in Norfolk 1 in 9 of the children, and in Devon 1 in 19, are born out of wedlock.

These returns show that great differences exist in the manners of different counties; and they undoubtedly imply varieties in the state of the family relations, in the social education of children, and in the morals of the people. But it must not be immediately assumed, as has been sometimes done, in comparing the counties of England and Wales, any more than in comparing the results of our returns with those of other

TABLE VIII b. — PROPORTION OF BIRTHS OUT OF WEDLOCK (1) TO 100 UNMARRIED WOMEN, AND (2) TO 100 BIRTHS; ALSO THE PROPORTION PER CENT. OF MARRIED WOMEN WHO SIGNED WITH MARKS IN 1851.

REGISTRATION COUNTIES.	Proportion of Births out of Wedlock to 100 Unmarried Women and Widows.		Children born out of Wedlock to every 100 Births.	Proportion per Cent. of Married Women who signed with Marks.
	Of the Age of 20—40.*	Of the Age of 15—55.

* The figures in this column are deduced from those in the last column but one of Table VIII a.; reduced by 1-eighth part for children born to women either under the age of 20 or above the age of 40.

The Table may be read thus, disregarding the decimal point:—In Norfolk to every 10,000 women unmarried, and of the age 20—40, there were 487 children born in the year 1851; or to every 10,000 women of the age 15—55 there were 283 children born; of 1000 children born 111 were born out of wedlock; of 100 women married 44 signed the register with a mark.

countries, that the relative morality of the population is expressed by these numbers.

The mothers of all the children that are born in the country are between the ages of 15 and 55; and the greater part of them are between the ages of 20 and 40. The English schedule is defective, as it does not show the age of the father and mother at the birth of the child; but it may be inferred from the Swedish returns that not more than 1 in 8 women who bare children is under the age of 20 or above the age of 40. The numbers of women *married* and *unmarried* in each county at the two divisions of age, as ascertained at the census, are shown in the subjoined Table VIII *a.*; also the births of children in each of the two classes, and the proportional numbers of children to women.

It thus appears that in 1851 there were in England and Wales 2,553,894 married women under the age of 55, and that the children born alive in wedlock were 573,865; so that 22 in 100 bore living children. The number of unmarried women,—spinsters and widows inclusive,—of the same age (15–55) was 2,449,669; and as the number of children born out of wedlock was 42000, it would appear that to 100 of them 1·7 children were born. The proportion of children to 100 married women under the age of 55, ranges between 19·73 in Herefordshire and 25·56 in Durham; the proportion of children to 100 unmarried women (age 15–55) ranges between 1·12 in Devon and 2·83 in Norfolk.

The number of women of the age (20–40) in England and Wales at the time of the census, was 2,856,398; of whom 1,248,182 were unmarried, 1,608,216 were married. And if 11·967 per cent. of the children are deducted, belonging, as it may be inferred, to the women under 20 and above 40, it will follow that to every 100 women of the age 20–40 about 18·981 children are born annually, to every 100 unmarried women 2·962, and to every 100 married women 31·413 children.

These facts may well calm the apprehensions of those who entertain any dread of the depopulation of the kingdom; and they present in an encouraging aspect the great resources of the English population for colonization or for war.

The relative proportions of the unmarried women who gave birth to children in the year 1851 are shown in the annexed Table (VIII *a.*), which will probably give rise to further inquiries, and lead to some important results.

Excluding London from view, as the returns are probably imperfect, it may be inferred that generally the unmarried women in the counties south of the Thames, comprising the descendants of the old Saxon population, have few illegitimate children: Wales stands next in the scale: the West Midland, the North Western, and the South Midland counties, covering the area of the ancient Mercia, present less favourable results; while in Yorkshire, the Northern counties, the North Midland counties, and particularly the Eastern counties, covering the area of the ancient Danish population, the number of illegitimate children is excessively great.

The women of the counties in which there are fewest illegitimate children appear to be the best mothers and housewives, as, other things being equal, they lose fewer of their children in infancy than the women of counties where many children are born out of wedlock.

With the facts in these tables before them, it will be for the clergy and for other moral inquirers in each county to investigate the causes of the discrepancies which they disclose, and to ascertain how the existing evils can be most efficaciously and successfully treated. To facilitate such inquiries, which should be elaborate and not be confined to a single class of causes, the counties are arranged (Table VIII *b.*) in the order that the proportion of mothers of illegitimate children of the age 20–40 bear to 100 unmarried women of the same age; commencing with the counties

in which the proportion is lowest. A column is added which shows the state of elementary instruction among the women who married, and thus throws some indirect light on the education of the class of unmarried women in each county.

The seasons exercise some influence on the births; and the number of births that were registered in the first two quarters of the year were 157286 and 159073, whilst the births in the last two quarters were 150594 and 148912. (Table X.) The illegitimate births were very

equally distributed over the year, and amounted to 10802, 10526, 10256, and 10416 in the four quarters.

DEATHS.

395,396 deaths were registered in 1852.

The mortality of the population in the year was at the rate of 2·199 per cent., which is in excess of the mortality in 1850, but is below the average mortality (2·234) of the 14 years 1838–51. The mortality of males was at the rate of 2·276, of females at the rate of 2·124 per cent. The mortality of childhood (age 0–5) was slightly above the average in both sexes; but at every other period of life the mortality was below the average.

The Table (XII.) shows the rate of mortality at twelve periods of life in the two sexes; and it will be noticed that in the two divisions of the table, the mortality decreases from infancy to the age of puberty; it then increases slowly up to 55, and after the age of 55 the rate of mortality is doubled every ten years of age.

The influence of the seasons on the mortality is shown in the Tables XIII. and XIV.

MORTALITY OF PERSONS ENGAGED IN DIFFERENT OCCUPATIONS.

The previous investigations of the various rates of mortality in the districts of the kingdom, have showed how much the health and life of

1851	2·276	2·124	103	107
Average of 14 years, 1838–51	2·315	2·154	103	106

The Table may be read thus:—In the year 1838 to every 100 males living there were 2·325 deaths of males; to every 100 females living there were 2·123 deaths of females; and to every 100 females who died there were 105 deaths of males. The last column shows the relative mortality of males and females; and that out of equal numbers living the deaths of males was 100 to every 100 deaths of females in 1838.

the population are affected by fixed local influences. The professions and occupations of men open a new field of inquiry, on which we are now prepared to enter, not unconscious, however, of the peculiar difficulties that beset all inquiries into the mortality of limited, fluctuating, and sometimes ill-defined sections of the population.

Laudable attempts have been made by ingenious men to determine the effects of professions on health, by general observation, unaided by exact recorded facts. Ramazzini and Thackeray in this way deduced some useful practical results and rules for the improvement of the health of artisans. More recently the *mean age at death* has been relied on to show the healthiness or insalubrity of certain occupations. And this method, as well as that of the annual rate of mortality without distinction of age, is applicable in certain definite conditions where only approximations are required.

But the *mean age at death* evidently depends upon many circumstances besides health, and among others, upon the ages of the living; which vary in proportions in almost every profession, according as it is a profession that people enter early or later in life, and according as the numbers that enter it annually increase or decrease.

The Table may be read thus:—Of 100 Males living of the age of 35 and under 45, 1·542 died in 1838, 1·255 in 1839, 1·217 in 1841, and so on for other years; a correction for increase of Population having been made for each Age at each Year, and the deaths of persons whose ages were not returned have been distributed proportionally over each age. The figures showing the mortality of Males and Females at "All Ages" in this and the previous Table are correct, and differ slightly from those given in the 18th Annual Report, pp. xiii–xiv. The data upon which this Table is constructed appear in this or have appeared in the previous Reports, and in the Census Report. See Census Report 1851; and the Annual Reports of the Reg. Gen., particularly the 8th and 9th.

The mortality is at the rate of 20 in 1000 among men of the age of 20 and upwards in England; but this gross rate is compounded of all the varying rates, from the age of 20 to the age of 100. For while the annual rate of mortality among men of the age of 25 and under 35 is 9 in 1000, the rate among men of the age of 45-55 is 18 nearly, and the rate among men of the age of 65-75 is 64: so, as the age of the living in different professions may vary almost indefinitely, the gross rate of mortality affords only an imperfect indication of the influence of occupation on health and on the duration of life. The rate of mortality among farmers of the age of 20 and upwards, is 28 in 1000, among tailors 20 in 1000; yet it will be shortly shown that when the rates of mortality among men of *corresponding ages* are compared, the farmers are much the healthier of the two classes.

To obtain results upon which reliance can be placed for the purposes of sanitary inquiry and of life insurance, several extended series of observations are required, and have now been obtained in England. The Census Report exhibits the number of persons in each occupation at each decennial age in 1851, and the present Report shows the numbers in those professions dying at corresponding ages.

Upon examining the results of these two series of observations, it is evident that the unsettled nomenclature of the professions throws in the way of the inquiry another formidable difficulty, which can only be gradually removed. Thus it is impossible at present to determine the relative mortality of the classes that are respectively engaged in the silk, cotton, linen, and woollen manufactures, as great numbers of men are registered as *weavers* simply, without any further distinction; so all the

persons that are engaged in the textile manufactures are thrown together. *Miners* in iron, lead, copper, coal, and the manufactures of the metals, have for the same reason been thrown into one group. Again, as the large class of agricultural labourers has in the registers often been confounded, under the indefinite term "labourer," with labourers on roads, on railways, in quarries, labourers have been dealt with in the aggregate.

By selecting a few of the well-defined occupations in which large numbers of men are employed, and by grouping together in one line

TABLE XV.—ENGLAND. MALES aged 20 and upwards in the under-mentioned Occupations at the Census (31st March 1851); DEATHS in the same Occupations in the Year 1851; and MORTALITY per Cent.

OCCUPATIONS.	Living at the Census of 1851.	DIED in the Year 1851.	Mor- tality to 100 Living.

(a) The Seamen of the Royal Navy are included with Merchant Seamen in Class VIII, Sub-class 4.

classes easily confounded in the returns, certain striking and interesting results have been obtained, which are embodied in the Tables XVI., XVII. In some instances these results confirm preconceived opinions; in others they bring to light important facts of which we had before no idea.

Farmers.—Of the twelve classes in the Tables, the farmers are the oldest and the longest livers; out of 225747 there are 31720 of the age 25 and under 35; 48378 of the age 35–45; and 53608 of the age 45–55. Their numbers then decline, and there are 45585 of the age 55–65;

		</					

Note.—Several Occupations have been excluded from this Table, as from limited numbers or errors of nomenclature it is believed that the mortality is not truly expressed; thus,—Authors, Editors, Writers, and others engaged in Literature, mortality ·819 per cent.; Scientific Persons, 1·229 per cent.; Ship-agents, ·794; Actors and others connected with Theatres, 2·583; Civil Engineers, ·850; Metallists and Die Sinkers, 3·163; Gaswork service, ·940; Salt-makers and Dealers, ·599; Anconsmiths, ·504; Grinders (branch undefined), 4·128; Mechanics, Manufacturers, Shopmen (branch undefined), and others of indeterminate Occupations, 4·585 per cent.

28660 of the age 65-75; 11363 of the age 75-85; and 1711 of the age 85 and upwards. Their numbers, depending on the number of farms, have been probably stationary for some years in England, and it is evident that men enter the class at all the ages up to 45-55, when the number living is greater than the number at any other period of life. Few become farmers after that age. The total deaths in the year were 6426; and the deaths to 1000 living at each of the decennial ages commencing at 35-45 were nearly 9, 12, 25, 55, 148, 324.

The deaths to 1000 labourers at each of the corresponding ages were 13, 17, 29, 68, 174, and 418. The advantages in respect to health of the farmer over the labourer are considerable at every age after the age of 35; but, singularly enough, the mortality of the young farmers of the age 25-35 is rather higher (10·15) than the mortality (9·79) of the young labourers of the same age.

The labourers of all classes that are brought into the calculation were 1,192,909, of whom 25801 died in the year. They constitute nearly one fourth part of the male population of England; and their mortality is at nearly the same rate as that of the whole population, except in the very advanced ages, when the Poor Law apparently affords inadequate relief to the worn-out workman.

TABLE XVI.—NUMBER of MALES aged 20 Years and upwards in the under-mentioned Occupations living at the Census of 1851, and the Number in the same Occupations who died in the Year 1851, at different periods of age.

OCCUPATION.		MALES—AGES.							
		20 Years of Age and upwards.	20—	25—	35—	45—	55—	65—	75— and upwards.

ALL MALES aged 20 and upwards in England	{ Living in 1851 - Died in 1851 -	4,730,904 94,866	784,821 7,729	1,333,621 12,531	1,017,018 12,547	734,514 13,104	462,788 14,809	266,082 17,116	97,006 13,612

NOTE.—The numbers "Living in 1851" are those enumerated at the Census (March 31st 1851); the numbers who "Died in 1851" comprise all in the several Occupations whose Deaths were registered during the year 1851. In the last line but one the numbers aged 20 and upwards living in 1851 are estimated for the middle of the year 1851; and in calculating the rate of mortality a correction has been made for 326 deaths of Males whose ages were not stated by distributing a proportional part over the different ages.

The four classes which on the whole experience the heaviest rates of mortality are *miners, bakers, butchers, and inn and beershop keepers*. Thus at the age 45-55 out of every 1000 farmers 12 died; of 1000 shoemakers 15 died; of 1000 weavers and others employed in the manufacture of cotton, silk, and wool 15 died; out of an equal number of grocers 16 died; of blacksmiths 17 died; of carpenters 17 died; of tailors 17 died; of labourers 17 died; of miners 20 died; of bakers 21 died; of butchers 23 died; of inn and beershop keepers 28 died;—the mortality at that age among the whole population of England being at the rate of 18 in 1000.

At every period of life the mortality of the inn and beershop keepers is in excess of the mortality of all the other classes except the *butchers* at the age of 55-65 who died at the rate of 41 in 1000; while the rate among the *inn and beershop keepers* of the same age was 39 in 1000; the rate among the whole population being 30.

Among the important class of men, 55315 in number, variously designated hotel keepers, inn keepers, licensed victuallers, and beershop keepers, distributed all over the kingdom, but concentrated especially in towns, the causes of this unusually heavy rate of mortality deserve careful and extensive investigation. Many highly respectable men of the class lead regular lives, and are of steady habits; but others, exposed by their business to unusual temptations, live intemperately, and enjoy less quiet at night than the rest of the community. They are exposed also to zymotic diseases, by intercourse with large numbers of people.

But in a matter of so much importance, these remarks *must* only be viewed as indications of the direction that the inquiry should pursue in the hands of competent persons.

TABLE XVII.—MORTALITY per Cent. of MALES aged 20 Years and upwards in the under-mentioned OCCUPATIONS in the Year 1851, at different Periods of Age.

OCCUPATION.	MALES—AGES.							
	20 Years of Age and upwards.	25—	35—	45—	55—	65—	75—	85 and up- wards.

Butchers.—This useful body of men amounted to 49403; and they experienced a much heavier rate of mortality than any other class except that preceding—at the ages under 65. Thus at the age 35–45 the rate of mortality per 1000 among farmers was 9, carpenters and joiners 10, shoemakers 11, blacksmiths 12, tailors 14, bakers 15, butchers 17. At the next decennial age (45–55) the mortality of butchers was 23; at 55–65 it was 41, or higher than the mortality that any other class suffered. The mortality of the old butchers of the age of 65 and upwards is near the average.

While much has been written about the diseases of shoemakers, weavers, tailors, miners, and bakers, the extraordinary mortality of butchers appears to have escaped observation. Calculation alone has taught us that the red, injected face of the butcher is an indication of a frail habit of body.

Here is an important problem for solution. On what does the great mortality of the butcher depend? On his diet, into which too much animal food and too little fruit and vegetables enter?—on his drinking to excess?—on his exposure to heat and cold?—or, which is probably the most powerful cause, on the elements of decaying matter by which he is surrounded in his slaughter-house and its vicinity?

Bakers and confectioners.—The habits of bakers in town and country differ considerably; but the mortality among the 42717 was at the ages from 35 to 65 much above the average. The young bakers of the age (25–35) experienced a low rate of mortality (7·59 in 1000).

Miners die in undue proportion, particularly at the advanced ages, when their strength begins to decline. In this particular they resemble labourers.

Tailors die in considerable numbers at the younger ages (25 to 45); but their mortality after the latter age, though higher than that of the former, is below the average of the people in general.

Carpenters, grocers, weavers, and shoemakers in early manhood, 25–45, do not experience a high rate of mortality; and subsequently the range of the rate below or above the average of all classes is not considerable.

Blacksmiths, 75998 in number, are distributed all over the kingdom in shops, where they work under peculiar conditions. Their mortality differs little from that of labourers, but it is excessive after the age of 55, and from the age of 55 to 75 it exceeds the mortality of labourers.

In the annexed Table (XVIII.) the several classes are arranged in the order of the mortality at the age (45–55). The facts deserve to be carefully studied.

Every occupation has its peculiar dangers, which in their results sometimes counterbalance each other. Thus, the tailor is not exposed to the explosions which are fatal to the miner; and the labourer has exercise which is denied to the tailor. It is hence probable that the diseases of classes that experience the same rate of mortality differ; so, necessarily, do the measures by which those diseases may be obviated.

Insurance offices and Friendly societies will probably find the facts in these Tables of use to them in their transactions. For it is evident that the lives of farmers, for example, may be safely insured at much lower rates than the lives of licensed victuallers. Life Tables may be constructed from Table XVII., showing the probabilities of life or the mean life-time of several classes on a wider basis of facts than those which were employed by the eminent actuary, Mr. Milne, in constructing the Carlisle Table. But before the Tables are constructed the inquiry must be extended over other years ; and must embrace the diseases, and several other circumstances on which it is desirable to obtain satisfactory information before constructing new Tables on which large pecuniary investments may be made to depend.

The result of the inquiries which the facts that have been already analyzed suggest, will, I trust, lead to great reductions in the rate of mortality from which all the unhealthy professions now suffer.

The Causes of Death are briefly discussed by Dr. Farr in a letter addressed to me, which will be found in the Appendix.

I have the honour to be,

Sir,

Your faithful Servant,

GEORGE GRAHAM,

Registrar-General.

ANNUAL ABSTRACTS

NOTE.—The Sub-districts are sub-divisions of the Districts, and comprise the Parishes or Places in which the Births and Deaths are registered by Registrars severally appointed for that purpose.

The letter W denotes that the Sub-district contains within its limits a Workhouse belonging to the District or Union; w indicates that a Workhouse belonging to another District or Union is included.

Wherever the minus sign (-) is prefixed to the numbers given in the Column headed "Excess of Births over Deaths," it denotes that the Births in the Sub-district, instead of exceeding the Deaths, were, in fact, less than the Deaths to the extent stated.

* The Excess of Deaths over Births in these Sub-districts is attributable to the mortality in Hospitals for the sick situated therein. For the number of Deaths in the Hospitals, Workhouses, and other Public Institutions in London, see page 88.

	3. Providing Dress	208,903	6,844
Class VII.	Persons who BUY or SELL, KEEP, LET, or LEND, Money, Houses, or Goods of VARIOUS KINDS	114,337	2,301

NOTE.—In the present arrangement of Deaths according to Occupations, the principle of classification adopted for the Census of 1851 has been followed as closely as possible. At the Census considerable pains were taken to obtain an improved return of occupations: short instructions on important points to be attended to were printed upon every householders's schedule, and more elaborate instructions were distributed among the enumerators and registrars. The information obtained, although sometimes incomplete, was in general more precise and satisfactory than

that afforded by the Death registers, where the occupations are often imperfectly described. For instance, at the Census, labourers in husbandry were usually returned as "agricultural labourers," while in the Register of Deaths the same class of persons are commonly described as simply "labourers." A strict comparison of results cannot, therefore, be made until the effect of the steps taken to secure a better return of occupations is seen in the mortality registers. (See notes under the respective items in the following Tables).

ENGLAND. OCCUPATIONS of MALES aged 20 Years and upwards at the Census; and DEATHS in the Year 1851—continued.

CLASSIFICATION OF OCCUPATIONS.		MALES 20 Years of Age and upwards	
		Living at the Census of 1851.	DIED in the Year 1851.
SUB-CLASSES—continued.			
Class VIII. Persons engaged in the CONVEYANCE of Men, Animals, Goods, and Messages:			
Sub-class 1.	Carriers on Railways	22,797	260

(a) An imperfect return—most of the professors of science being returned among the three Learned Professions.

(b) See also *Musicians (not Teachers)*, Class XI. Sub-class 3.

(c) In the Census numbers besides the sons of other near male relatives (nephews, grandsons, &c.) of the heads of families are included, while the deaths here stated are only those of persons described as "Son of ——" and not otherwise returned.

(d) See also *Licensed Victuallers, Beer-shop Keeper*, Class XIII. Sub-class 2.

(e) Domestic servants (male) are often not well described in the returns, and it is probable that some coachmen, grooms, and gar-

deners, who properly belong to this sub-class, are included with those who are employed in similar capacities but not as domestic servants. Many of the *Ann Servants* are Ostlers.

(f) Undertakers usually follow other occupations, such as upholsterer, cabinet maker, and carpenter.

(g) At the Census persons of independent means were requested to describe themselves as "House Proprietor," "Landlord, Proprietor," &c. In the Death Registers the terms "Gentleman," "Esquire," are almost invariably used. See *Gentleman, Independent*, Class XVI.

ENGLAND. OCCUPATIONS OF MALES aged 20 and upwards; and Deaths in 1851—continued.

OCCUPATIONS.	Living at the Census of 1851.	DIED in the Year 1851.										Not specified.
		Age at Death.										
		Total.	20—	25—	35—	45—	55—	65—	75—	85 & upwards.		
VIII.—Persons engaged in the CONVEYANCE of MEN, ANIMALS, GOODS, and MESSAGES.												
1. Railways.

(a) In the Death Registers many persons, chiefly in the manufacturing districts of Lancashire and Yorkshire, are described as "Weaver," without mention of the particular material which they were employed in weaving. The deaths of such persons could not be correctly referred to the items of Wool, Cotton, or Silk; they are therefore entered at the end of the occupations in Class XII.

(b) See also Innkeeper, Hotel-keeper, Class VI. Sub-class 1.

Persons respecting whose Occupations no information whatever is given -	47512	823	57	112	126	112	110	106	100	84	56

(a) This return includes a large number of Agricultural, Railway, Dock, and other Labourers, who but for the indefinite description given of them would have been referred to one or other of the foregoing Classes.

(b) Persons returned in the Census numbers as *House Proprietor* (Class VII.), *Land Proprietor* (Class IX.), are usually described in the registers as "Gentleman," "Esquire," "Independent," and their deaths are here entered.

(c) The Registrars are required to insert in the registers the previous Occupations, if any, of persons in receipt of parish

relief, and of the inmates of workhouses, lunatic asylums, and other public institutions. Although the same instruction was given at the Census, the description "Pauper" appears to have been used in a much larger proportion of instances in the Census returns than in the death registers. With respect to "Prisoner," the converse of this was the case.

(d) The persons described in the Census returns as "Vagrants" were chiefly Gipsies and others sleeping in barns, tents, &c. on the night of March 31st, 1851.

NOTE.—In the foregoing Table a few Occupations are separately shown, which in the subsequent Tables are merged in the "Others" of their respective Sub-classes; and, on the other hand, some few items, distinguished in the Tables which follow, are here combined with others.

Persons engaged in more than one branch of trade are referred to that which appeared to be their chief pursuit. Where inadequate numbers are returned under particular employments the

apparent deficiencies in all probability arise from persons partly engaged in them being entered in other capacities.

The numbers stated for trades and manufactures comprise all persons employed in them, including labourers, apprentices, and assistants, as well as masters. Superannuated persons and others described as retired, as well as the inmates of public institutions, are classed under their former occupations, when they are stated in the returns.

OCCUPATIONS of MALES in the Population aged 20 Years and upwards at the Census (March 31st) 1851; also the Number in the same Occupations whose Deaths were registered in the Year 1851—in DIVISIONS. (For an Alphabetical List of the Occupations distinguished in this Table, see p. 224).

			Prisoner (no stated occupation) - - - - -	4	12

NOTE.—In addition to the Abstract of Deaths in reference to the occupations of males aged 20 years and upwards, the employments, where stated, of males aged 10 and under 20 years who died in 1851 have been classified. The value of the result is, however, greatly impaired by the mode in which the descriptions of the trade or calling are entered in the register books. It is proper for the Registrars in the case of young children to describe them as "Son of—", adding after the name of the father the father's rank or calling; but this practice is often extended to cases where the subjects of the entry have been themselves actually engaged in some occupation. No less than 6761 males between 10 and 20 years of age who died in 1851 were thus described only as Son, &c., and although many of them were, no doubt, without employments, a considerable number had probably been enrolled as apprentices, or followed an occupation of some kind. The above Table does not include some items to which only a very small number of deaths were referred.

ALPHABETICAL LIST of the Occupations of MALES returned in the Tables, pp. 148—222, with a reference to the classified arrangement adopted.

[Where the names are printed in *italics* the persons included are those only of the respective sub-classes not returned in the Tables under more specific denominations.]

APPENDIX.

EXTRACTS

FROM THE

QUARTERLY RETURNS

OF

MARRIAGES, BIRTHS, AND DEATHS

Issued in the Year 1851.

NOTE.—*The numbers of Births and Deaths published in these Returns were furnished by the Registrars at the end of each Quarter, when they could not be subjected to revision at the General Register Office; they will therefore be found to differ in some instances from the more correct numbers given in the preceding Abstracts.*

1851.]

QUARTERLY RETURN

[No. 1.

OF

THE MARRIAGES, BIRTHS, AND DEATHS IN ENGLAND.

THIS Return comprises the BIRTHS and DEATHS registered by 2189 Registrars in all the districts of England during the Winter quarter ending March 31st, 1851; and the MARRIAGES in more than 12000 churches or chapels, 2869 registered places of worship unconnected with the Established Church, and 623 Superintendent Registrars' offices, in the quarter that ended December 31st, 1850.

The return of Marriages is not complete; but the defects are inconsiderable, and have been supplied from previous years.

The results of the returns from the whole country are satisfactory. The mortality is low; the births and the marriages are much above the average.

MARRIAGES.

45296 marriages were celebrated in the autumn quarter, ending December 31st. The marriages are always more numerous in this quarter than in any other quarter of

* The numbers up to 1848 have appeared in the Annual Reports.

the year. The close of harvest, the genial season of Christmas, the termination of the ordinary periods of service, and perhaps the old practice of anticipating Lent, swell the marriage roll at the end of the year. So there is nothing very remarkable in the distribution of the marriages over the quarters of the year 1850, although the marriages in the last quarter exceeded those in the first quarter of the year by nearly 15000. The marriages of the whole year exhibit an extraordinary increase; in 1840 the number was 122665; in 1850 it amounted to 152235. In the 4 years, 1847-8-9-50, the marriages were 135845, 138230, 141599, and 152235. The first (1847) was a year of great depression and great suffering; the last (1850), as the marriages testify, was a year of prosperity, which showed no symptoms of decline in the last quarter.

The increase extended over 8 out of the 11 divisions of England and Wales. The South Midland and the Eastern Divisions exhibit a marked decrease in the proportion of marriages to population. The decrease was greatest in Suffolk; but was also evident in the counties of Hertford, Buckingham, Oxford, Cambridge, Northampton, Huntingdon, Bedford, Essex, and Norfolk. In some of the other divisions the marriages did not keep pace with the population. In Wilts, Lincoln, and the North Riding of Yorkshire, the numbers declined. The marriages increased in Berkshire, Devonshire, Gloucestershire, Warwickshire, Leicestershire, Nottinghamshire, Derbyshire, the East and West Ridings of Yorkshire, Durham, and South Wales. The increase was the greatest in London, and in the North Western Division comprising Cheshire and Lan-

† The Table may be read thus, without reference to the decimal points:—In the year 1848, to 100000 of the population of England, there were 791 marriages, 3222 births, 2288 deaths registered.—The annual rates of marriage in each of the 4 quarters were *655, *799, *748, and *952 per cent.; the rates of death 2*771, 2*294, 1*987, and 2*090 per cent. In reading the population on the first line add 3 ciphers (000). The 3 months January, February, March, contain 90, in leap year 91 days; the 3 months April, May, June 91 days; each of the 2 last quarters of the year 92 days. For this inequality, a correction has been made in the calculation. It was assumed that the population increased at the same rate as the females increased in 1831–41, namely 1*332 per cent. annually, or *331 quarterly. So $\lambda \text{ \& } \mu = \cdot 0014370$.

cashire. The marriages increased at St. George Hanover Square, St. Martin-in-the-Fields, and St. James Westminster; and at all the watering places, at Gravesend, Ramsgate, Margate, Hastings, Brighton, Worthing, Bath, Clifton, and Cheltenham. There was a great increase in the pottery districts of Wolstanton and Stoke-upon-Trent, in Walsall, Dudley, and Birmingham, in Coventry, in Basford and Nottingham, in Shardlow and Derby, in Stockport and Great Boughton (Chester), in West Derby, Wigan, Bolton, Ashton, Oldham, Rochdale, Blackburn, and Preston. In Liverpool and Manchester the marriages, though more numerous than in some previous quarters, exhibited no increase on the corresponding quarter of 1850. Bradford, Leeds, and Sheffield, exhibit a remarkable increase.

The marriages decreased, were stationary, or increased slowly in many agricultural districts; and this implies a certain degree of depression in those parts at the close of the year 1850. In many of the manufacturing districts the increase was remarkable. In the country generally, the great increase in the marriages indicates that the great body of the people were in prosperous circumstances. The classes who live on wages should now husband their resources, and with their surplus earnings provide against the periods of depression which according to past experience invariably follow years of prosperity.

BIRTHS.

157374 births were registered in the quarter ending March 31st, 1851. This is a greater number of births than was ever registered in any previous quarter; and the increase is distributed over all the divisions of the country, although it was greatest in Cheshire, Lancashire, and Yorkshire. In a few counties the births exhibit no increase, in the majority the increase is considerable.

INCREASE OF POPULATION.

As 157374 births and 105446 deaths were registered in the quarter ending March 31st, 1851, an excess is left of 51928 living. It is the natural increase of the population in 3 months. And as all the deaths are registered while all the births are not registered, the difference is less than the actual increase. The variations in the increase of population from fluctuations in the births and deaths since 1847 have been considerable; the excess of births over deaths was 19704 in the winter quarter ending March 1848, and 51928 in the corresponding quarter of 1851.

The emigration in the quarter ending March 31st, 1851, from the ports of the United Kingdom at which there are government emigration officers, was 56072. The emigrants from English ports amounted to 48929; namely, 1515 from Plymouth, 4502 from London, and 42912 from Liverpool. 2339 emigrants sailed from Glasgow and Greenock; 4804 from Irish ports. It is well known that many Irish emigrants sail from Liverpool.*

STATE OF THE PUBLIC HEALTH.

105446 deaths were registered in the quarter ending March 31st. This number is less by nearly 15000 than was registered in the corresponding quarters of 1847 and 1848; and more by 7000 than was registered in the March quarter of 1850. Taking the increase of population into account, the mortality was slightly below the average. It was at the rate of 2·365 per cent. per annum; whereas the average rate of the quarter is 2·457 per cent. The highest rate of mortality experienced in any winter quarter since 1839 was 2·830 in the cold winter quarter of 1847; the lowest was 2·144 in the mild winter quarter of 1846. A previous table shows that the average annual rate of mortality in winter is $2\frac{1}{2}$ per cent. nearly (2·457); the mortality being above this range in town, and below it in country districts. The mortality in the March quarter was somewhat lower than the average in the 117 districts including the chief towns; and considerably below the average in the 506 remaining country districts. The mortality of the towns was a fiftieth part, and of the country districts a twelfth part less than the average. The country districts are therefore enjoying more than their usual immunity, while the mortality in the town districts is scarcely reduced at all; yet it was in the town districts that cholera was most fatal, and according to a common theory cut off the weakly lives in 1849. The returns show that little impression has yet been made on the mortality of towns, which have practically been left unimproved. The drains, sewers, slaughter-houses, and churchyards are much the same as they were, and their effects therefore are the same.

The mortality was higher in LONDON than it was in the corresponding quarter of last year. Influenza was epidemic; and the mortality was raised during the weeks of March. 205 deaths were directly ascribed to this disease, which in ordinary seasons is not fatal to more than 50; and many of the 1612 deaths ascribed to bronchitis were the result of

* Return with which the Registrar-General has been favoured by the Emigration Commissioners.

influenza. The epidemic has ceased, and has been slight compared with that of 1847-8. Measles and hooping-cough have been more, scarlatina less than usually fatal. Small-pox was fatal in 275 cases, in the greater part of which vaccination had been neglected. Diarrhœa was fatal to 223 persons, dysentery to 30, cholera to 7. It is worthy of note that the winter diarrhœa shows no disposition to decline. The deaths referred to cholera in the 5 quarters ending March 1847-51, were 3, 9, 516, 8, and 7. Typhus has been more fatal than it was in the March quarter of 1850. The deaths by poison were 29, burns and scalds 100, hanging and suffocation 71, drowning 70, fractures and contusions 163, wounds 34.

The mortality was low in the SOUTH EASTERN, South Midland, Eastern, and South-Western divisions. Typhus raised the mortality at Maidstone, scarlatina and hooping-cough at Brighton, where the mortality was much above the average. The mortality was generally low in the Surrey and Sussex districts. Portsmouth and Southampton were unhealthy: at Southampton scarlatina prevailed. Measles and hooping-cough raised the mortality in Abingdon; measles and typhus in Wallingford. The mortality of Windsor, which has been recently drained, was much below the average; the deaths in the five quarters ending March 1847-51, were 132, 109, 114, 103, and 86.

In the SOUTH MIDLAND counties, Brentford, Edmonton, Ware, St. Albans, Aylesbury, and Oxford were the chief districts in which the mortality was higher than usual. Small-pox prevailed at St. Albans among the poor "who live in great numbers in ill-ventilated houses." Measles, hooping-cough, and typhus prevailed in Waddesdon, Aylesbury, in Winslow, and in Witney; measles and hooping-cough in Oxford. In Huntingdon low and intermittent fever prevailed. Seven deaths in the parish of Kings Ripton were ascribed to typhus; three-fourths of the population suffered from it. The want of drainage, and bad sanitary arrangements are supposed to have produced the disease. In the sub-district of Wisbeach St. Peter the births registered were 81, the deaths 107. 51 deaths took place in the union workhouse; 16 from measles, 18 from typhus, and 17 from other causes! This great mortality in a public institution requires investigation.

In the EASTERN DIVISION the mortality was high at Sudbury, Colchester, Yarmouth, and Kings Lynn, where measles and scarlatina prevailed. At Stow, 67 births were registered; the Registrar observes, that 20 still and premature births occurred during the quarter. Still births are not registered.

Plymouth, remarkable for its insalubrity, is almost the only district of the SOUTH WESTERN DIVISION in which the mortality is higher than in any previous winter quarter. Scarlatina, typhus, and hooping-cough have continued to prevail. At Morice in Stoke Damerel the oldest inhabitant of the town is said to have died in her 103d year. Such instances of longevity should never be admitted without scrupulous inquiry; they are rarely supported by valid evidence. Scarlatina raised the mortality in Taunton, Chard, and Wellington, Somersetshire.

The mortality has been high in many districts of the WEST MIDLAND DIVISION.

Scarlatina, measles, small-pox, typhus, hooping-cough, and bronchitis (influenza?), have been prevalent and have often terminated fatally. The mortality was low in Herefordshire, and the southern part of Shropshire. Vaccination is neglected in Shrewsbury; and several deaths from small-pox have in consequence occurred. Wolverhampton, West Bromwich, Birmingham, Aston, and Coventry experienced a considerable mortality. The deaths in Birmingham were 1252.

In the NORTH MIDLAND DIVISION the mortality was low in Lincoln, although scarlatina and typhus prevailed there; it was higher than it was in the previous winter

in Leicester, Nottingham, Derby, and Chesterfield; measles and hooping-cough prevailed in many parts of those counties.

The people of Stockport (in Cheshire, NORTH WESTERN DIVISION) have their children vaccinated with a most laudable regularity; and the result has been an almost complete immunity from small-pox. The registrar remarks:—

“I have registered one death from small-pox—that of a child, 5 years of age, which had lately been brought over from Ireland and had not been vaccinated. It is now more than three years since I registered a death from small-pox, out of a population of between 12,000 and 13,000, which I attribute to the appointment of public vaccinators, and the attention parents now pay to the vaccination of their children.”

In the same county, the people of Runcorn offer an example of criminal negligence, which is a reproach to the religion which they profess and the country in which they live.

“Births 132; Deaths, 112. Small-pox has prevailed during the last 3 months; in the above number, 40 deaths are from that disease, and only 3 of the deceased had been vaccinated. There appears a great want of attention on the part of parents, in not taking their children to be vaccinated. I trust that stringent measures will be adopted to compel parents to have their children vaccinated; the disease has been prevailing in this district 5 months, and at the present time very severely. There have been 11 deaths during the last 10 days.”

At Wigan the same negligence was observed. 139 children under 5 years of age died; and 25 were left destitute of medical advice. In Burnley 179 persons died; the cause of death was not certified in 40 instances, and 31 had no medical attendant. Small-pox, scarlatina, measles, typhus, or influenza were prevalent in Manchester, Prescott, Ashton, and Oldham. The same zymotic diseases prevailed in many districts of YORKSHIRE. The mortality was above the average in Bradford, Leeds, and Sheffield.

In the NORTHERN DIVISION we observe the loss of 27 lives by what it has too long been the practice to call vaguely an accident. The explosions in mines are now tolerably well understood; and with proper care and good arrangements could rarely or ever happen. Hooping-cough and bronchitis (apparently influenza) have raised the mortality in Newcastle-upon-Tyne: Bedlington and Morpeth have suffered from scarlatina and typhus; more than 50 persons suffered at one time from the latter disease in the lower part of Bedlington town.

The mortality in WALES was generally below the average. Scarlatina and measles prevailed in Newport, Cardiff, Merthyr-Tydfil, and raised the mortality. Scarlatina also prevailed in districts of Pembrokeshire. 18 persons died of small-pox in Holyhead, Anglesey; only 2 had been vaccinated.

Mr. Glaisher's description of the atmospheric conditions of the unusually mild, variable, and rainy winter, deserves attention. Cholera is scarcely mentioned in the Registrars' notes. The Registrar of Oldham records 3 deaths from English cholera. No trace of the great epidemic is left except the diarrhœa.

No pains should be spared to deprive another outbreak of half its terrors by sanitary measures. If the towns were supplied with pure water, the streets and houses drained, the slaughter-houses removed from the neighbourhood of dwellings, the dead buried in distant places, the progress of medical science, and well-ordered medical organization, would diminish the mortality not only from cholera, but from all other epidemics.

In 1841 the Military in Barracks, Hospitals, Guard-houses, &c., were included in the returns for the several parishes in which those institutions were situated; in 1851 they were not enumerated as part of the population of the parishes, but were returned in the General Summary of Great Britain. The number of Males in Barracks, 15 Years of age and upwards (nearly all Military), in 1841, is here stated, in order that by excluding them from the returns for that year the increase of population 1831 may be more precisely ascertained.

great increase of population (11,619 persons) in Easington (546) between 1831 and 1841 was occasioned by the opening of coal-mines at Haswell, Thornley, and other places in the District.
 * A change has taken place in the constitution of this District since 1st January, 1860.

NOTE.—The first 13 weeks of 1851, constituting the March quarter in the Weekly Tables of Mortality, ended March 29th, in which 15410 deaths were registered. In the quarter ending March 31st (p. 7), 15071 deaths were registered.

† Under the head of *sudden deaths* are classed not only deaths described as sudden, of which the cause has not been ascertained or stated; but also all deaths returned by the coroner in vague terms, such as “found dead,” “natural causes,” &c., &c.

In the years previous to 1848, “worms” and “infantile fever” were classed together. The former, of very rare occurrence, is now placed to diseases of stomach, &c.

On the Meteorology of England, South of Scotland, and parts of Ireland, during the Quarter ending March 31st, 1851. By JAMES GLAISHER, Esq., F.R.S., Sec. of the British Meteorological Society.

Till February 22nd, with the exception of a very few days, the mean daily temperatures of the air were above their average values, the excess at times was very large; on January 1st it amounted to 14° nearly, and on several days it was as large as 10°, 11°, and 12°; the average excess for the period was 4°. Between February 23rd and March 17th, the temperatures were, for the most part, below their average values, the defect for the period was 2°·2. From March 18th to the end of the quarter the weather was warm, and the average daily excess was 3°. The month of March was distinguished by rain falling frequently and heavily, the amount collected about London exceeded 4 inches, an amount unprecedentedly large.

The mean temperature at Greenwich of the 3 months ending February, constituting the 3 winter months, was 41°·2, exceeding the average of 80 years by 4°·3.

NOTE.—In reading this table it will be borne in mind that the sign (—) minus signifies below the average, and that the sign (+) plus signifies above the average.

Thunder-storms occurred on January 21st at Castlebar; on the 28th and 29th at Guernsey; on March 16th at Holbrook, near Trowbridge; on the 20th at Stonyhurst, Exeter, and Truro; on the 21st at Norwich, Cardington and Holkham, the lightning of this storm set fire to a barn at Rainham, 24 miles N. W. of Norwich; on the 22nd at Guernsey; on the 26th at Manchester, and on the 30th at Midhurst, Gainsborough, Wakefield, and Cardington.

Thunder was heard, but lightning was not seen, on January 8th and 11th at Nottingham; on March 13th at Markam, 17 miles N. W. of Norwich; on the 20th at Nottingham and Exeter; on the 22nd and 23rd at Cardington; on the 26th at Manchester; and on the 29th at Nottingham.

Lightning was seen, but thunder was not heard, on January 2nd at Nottingham; on the 14th at Truro; on March 15th and 16th at Nottingham; on the 21st at Durham and Stonyhurst; on the 23rd and 28th at Guernsey, and on the 30th at Manchester and Truro; on March 20th at Truro; on the 21st at Stone; on the 26th at Holbrook and Cardington; on the 27th and 28th at Thame; on the 29th at St. John's Wood; and on the 30th at Gainsborough.

Hail fell on January 8th at Guernsey and Truro; on the 17th at Helston, North Shields, Hartwell, Jersey, Newcastle, and Stokestown (in Ireland); on the 18th at Stonyhurst; on the 21st at Exeter, Guernsey, Truro, and Stokestown; on the 22nd at Ennis, in Ireland; on the 29th at Helston; on the 30th at Stonyhurst, Liverpool, Uckfield, Truro, and Bridgetown (in Ireland); and on the 31st at Falmouth, Guernsey, and Truro. On February 3rd at Manchester and Liverpool; on the 4th at Hawarden and Liverpool; on the 5th at Liverpool and Truro; on the 6th at Hawarden, Nottingham, Manchester, Helston, Truro and Jersey; on the 25th at Dunino, on the 26th at North Shields; on the 27th at Durham, Cardington, North Shields, Thame and Jersey; on the 28th at Durham and Nottingham; on March 1st at Durham and North Shields; on the 2nd at North Shields; on the 6th at Durham and North Shields; on the 9th at Guernsey, Falmouth, and Ennis; on the 10th at Hawarden, Southampton, Rose Hill, near Oxford, Liverpool, Helston, Uckfield, Jersey and Truro, at Jersey it was very violent, and continued with little intermission for nearly an hour, wind N.W.; none fell at St. Helens, 3 miles to the eastward across the water; on the 12th at Rose Hill and Helston; on the 13th at Bedford, Nottingham, Stonyhurst,

Manchester, Stone, Rose Hill, and Jersey; on the 14th at Rose Hill and Nottingham; on the 15th at Uckfield; on the 16th at Durham and Guernsey; on the 18th at Manchester; on the 19th at Ennis; on the 20th at Exeter, Leicester, Newcastle, and Stone; on the 21st at Cardington, Thame, Stone and Bridgetown; on the 23rd at Manchester; on the 26th at Manchester, Stonyhurst, and Bridgetown; on the 27th at Manchester; on the 28th at Stonyhurst; on the 29th at Rose Hill, Thame, Truro, Stone, Bedford, Cardington and Bridgetown; and on the 30th at Rose Hill, Nottingham, Linslade, Liverpool, Stone, Thame, Midhurst, Truro, and Gainsborough.

Snow fell on January 8th at Nottingham; on the 21st at Hawarden, Carrick-on-Shannon, Roscommon, and Longford, in Ireland; on the 22nd at Ennis and Longford; on the 23rd at Longford; on the 24th and 25th at Nottingham; on the 26th at Nottingham, Leicester, Stonyhurst, and Durham; on the 30th at Hawarden, Nottingham, Stonyhurst, St. John's Wood, Manchester, Hartwell, Carrick-on-Shannon, and Longford; and on the 31st at Thame, Rose Hill, Linslade, North Shields, St. John's Wood, Manchester, Stone, Stokestown, Carrick-on-Shannon, and Longford.

On February 1st at North Shields; on the 3rd at Hawarden, Durham, and York; on the 26th at Thame and Dunino; on the 27th at Thame, Durham, Linslade, North Shields, St. John's Wood, Stone and Grantham; on the 28th at Durham, Bedford and Wakefield; on the 30th at Norwich, and on the 31st at Rose Hill, near Oxford; on March 1st at Norwich, Rose Hill, Holkham and Stone; on the 2nd at Norwich, Bedford, Thame, York, St. John's Wood, North Shields and Stone; on the 6th at North Shields and Holkham; on the 8th at Norwich; on the 10th at Durham, Nottingham, Linslade, York, Gainsborough, and North Shields; on the 12th at Thame, Derby, Manchester, Gainsborough, Stone, Linslade, and Nottingham. David Tennant, Esq., of Dunino, observes that the low lands have not been whitened with snow this winter.

Sleet fell on January 8th at Hawarden; on the 21st at Hawarden, Stokestown, and Castlebar; on the 25th at Durham; on the 30th at Hawarden; on the 31st at Cardington; and on February 3rd at Hawarden.

Fog.—On January 3rd, at North Shields, Durham, Linslade, Thame, and Holbrook near Trowbridge, Holkham, Truro, Stokestown, Carrick-on-Shannon, Castlebar, and Ennis; on the 4th at Durham, Grant-ham, and Holkham; on the 5th at Durham; on the 6th at North Shields, Nottingham, and Wakefield; on the 7th at Durham, Grantham, North Shields, and Wakefield; on the 8th at Durham; on the 11th at Guernsey, Castlebar, and Holkham; on the 13th at Dunino, Lewisham, and St. John's Wood; at the two latter places the darkness was great, particularly at St. John's Wood, where the gas had to be lighted at 2 P.M.; on the 14th at Jersey; on the 24th at Thame, Wakefield, and Maidenstone Hill—at the two latter the fog unusually thick; and on the 31st at Grantham and Guernsey. On February 2nd at Durham, Grantham, Stokestown, Ennis, and Longford; on the 9th at Grantham and Youghal; on the 11th at Norwich; on the 12th at Durham, Holbrook, and Norwich; on the 13th at Grantham, Lewisham, Norwich, and Youghal; on the 14th at Thame, Jersey, Lewisham, Maidenstone Hill, and Uckfield; on the 15th at Linslade, Maidenstone Hill, Thame, Holkham, and Norwich; on the 16th at Thame, Grantham, and Stone; on the 17th at Thame and Stonyhurst; on the 21st at Grantham and Ennis; on the 22nd at Durham, Linslade, Maidenstone Hill, and Grantham; on the 23rd at Durham; on the 24th at Linslade; on the 25th at Linslade, Thame, and Stone. On March 4th at Grantham, Stonyhurst, and Liverpool; on the 8th at Grantham; on the 13th at North Shields, Uckfield, and Grantham; on the 14th at Holbrook; on the 15th at Grantham; on the 16th at Linslade; on the 17th at Durham and Uckfield; on the 20th at North Shields; and on the 25th at Stone.

Solar Halos were seen on January 6th at Dunino; on the 12th at Nottingham; on the 18th at Whitehaven; and on the 30th at Nottingham. On February 3rd at Uckfield; on the 9th at North Shields; on the 16th at Nottingham; on the 21st at Nottingham, Lewisham, and Stone; and on the 22nd at Nottingham, Lewisham, and Stone. On March the 2nd at Dunino and Nottingham; on the 3rd at Stonyhurst and Grantham; on the 7th at Liverpool; on the 10th at Dunino; on the 19th, 20th, and 25th at Nottingham; on the 29th at Rose Hill, Greenwich, and Thame; and on the 31st at Nottingham.

Lunar Halos were seen on January 9th at Dunino, Cardington, Linslade, Liverpool, and Stone; on the 11th at Stonyhurst; on the 13th at Gainsborough; on the 17th at Nottingham, Manchester, and Gainsborough; and on the 18th at Nottingham, Stonyhurst, and Manchester. On February 7th at Hawarden; on the 9th at Cardington; on the 11th at Uckfield; and on the 14th at Hawarden, Cardington, Stonyhurst, Uckfield, and Liverpool: at the latter it was, when best defined, 70° in diameter. On March the 10th at Stone, and Hartwell Rectory; on the 11th at Nottingham, on the 13th at Exeter, on the 14th at Cardington, Maidenstone Hill, Stone, and Hartwell Rectory; on the 15th at Hartwell Rectory a lunar corona; on the 16th at North Shields; on the 19th at Nottingham and Maidenstone Hill, and on the 30th at Jersey.

Aurora Borealis were seen on January 1st and 5th at Hawarden; on the 9th at Highfield House near Nottingham; and on the 24th at Stonyhurst and Dunino. On February 1st at Rose Hill near Oxford, Dunino, Stonyhurst, and Highfield House; on the 5th at Durham and North Shields; on the 6th at Rose Hill; on the 7th at Stone; on the 11th at Jersey; on the 18th at Grantham and Stone; on the 19th at Hawarden, Durham, and Dunino; on the 20th at Hawarden; on the 23rd at Durham; on the 24th at Hawarden. On March 7th at Hartwell Rectory and Stone; on the 8th at Stone; on the 10th at North Shields; on the 14th at Durham; and on the 18th at Hartwell.

Remarkable falls of Rain.—On January 1st at Roscommon; between January 1st at 9 P.M. and January 2nd at 9 A.M., there fell 0.87 in.; within the 12 hours following January 14th, 9 P.M., there fell at Roscommon 1.15 in.; at Stokestown 0.88 in.; at Longford 0.73 in.; at Castlebar 1.16 in.; on the 20th 1.14 in. at Truro; on the 21st 1.22 in. at Falmouth. On February 7th at Stonyhurst, 1.04 in. In March, on the 9th, at York, 0.52 in.; on the 15th at Lewisham, 1.725 in. fell between 1 A.M. and 4 P.M., and within the same time 1.4 in. fell at the Royal Observatory; at Jersey, 0.4 in.; at Guernsey, 0.9 in.; at Gosport, 0.9 in.; at Southampton, 1.1 in.; at Midhurst, 1.0 in.; at Uckfield, 1.2 in.; at London, 1.2 in., and generally at places N. of 52° no rain fell. So large a fall of rain on one day in March, is unprecedented in and about London.

The mean of the numbers in the first column is 29.604 inches, and it represents that portion of the reading of the barometer due to the pressure of air; the remaining portion, or that due to the pressure of water, is 0.249 inch; the sum of those two numbers is 29.853 inches, and it represents the mean reading of the barometer for the quarter at the level of the sea.

The highest readings of the thermometer in air, were 63° 5 at Guernsey, 61° 0 at Jersey and Highfield House; and the lowest readings were 21° at Midhurst, 20° at Linslade, and 22° at Wakefield. The extreme range of temperature, therefore in England during the quarter, was about 40°. The least daily ranges of temperature took place at Guernsey, 6° 0, at Liverpool 7° 3, and at Whitehaven 7° 3, and their mean value was 6° 9; and the greatest occurred at Highfield House 14° 5, at Hartwell 14° 0, and at Exeter 13° 6, and their mean value was 14° 0.

Rain fell on the least number of days at Dunino and York, and on the greatest number of days at Helston, Truro, Exeter and North Shields. The places where the least falls took place are Leicester, Gainsborough, and Durham; and the mean amount at those places was 4.0 inches. The largest falls occurred at Truro, Whitehaven, and Falmouth; and their average was 16.7 inches.

the formation of this Table the results from Jersey and Guernsey have not been combined as usual, on account of the difference in the ranges of temperature between these two places; those from Chiswell-st. have not been used, on account of high temperatures there recorded; and those from Dunino have not been used, on account of no observations having been received from adjacent latitudes.

1851.]

QUARTERLY RETURN

[No. 2.]

OF

THE MARRIAGES, BIRTHS, AND DEATHS IN ENGLAND.

THIS Return comprises the BIRTHS and DEATHS registered by 2189 Registrars in all the districts of England during the Spring quarter ending June 30th, 1851; and the MARRIAGES in more than 12000 churches or chapels, 2869 registered places of worship unconnected with the Established Church, and 623 Superintendent Registrars' offices, in the quarter that ended March 31st, 1851.

The Return of Marriages is not complete; but the defects are inconsiderable, and approximative numbers have been supplied from the records of previous years.

The Returns still show a great increase of Marriages and Births. The mortality is near the average.

MARRIAGES.

The Winter quarter, including the months of January, February, and March, has always fewer marriages in its records than any other quarter of the year. The marriages in the Winter quarter of 1851 were, however, 32619; which is the largest number ever registered in the Winter season of any year; it exceeds by 8172 (one third) the marriages in the Winter quarter of 1841; by 4190 the marriages in the Winter quarter of 1849, and by 2194 the marriages in the Winter quarter of 1850. An increase in the marriages almost invariably accompanies a prosperous state of the country; and it is gratifying, in this sense, to see that the increase now extends over eight out of the eleven divisions. While the marriages in London have increased, a stationary or declining rate of marriage is remarked in the three divisions

* The numbers up to 1848 have appeared in the Annual Reports.

round London, comprising the parts of Surrey and Middlesex out of London, Hampshire, Berkshire, Hertfordshire, Oxfordshire, Northamptonshire, Cambridgeshire, Suffolk, and Norfolk. An increase in some of the towns of Kent and Sussex gives these counties a character which is exceptional in the South-eastern Division, but is quite in accordance with the results of the returns for the South-western Division, where the marriages were evidently on the increase in Wiltshire, Dorsetshire, Devonshire, and Cornwall, and only slightly declined in Somersetshire. In Exeter, Plymouth, Tiverton, Barnstaple, Liskeard, Saint Austell, Redruth, and Penzance marriages in unusual numbers were celebrated. The West Midland Division exhibits a considerable increase, particularly in the seats of the iron, coal, and earthenware manufactures—in Newcastle-under-Lyme, Wolstanton, Stoke-upon-Trent, Wolverhampton, Walsall, Dudley, Worcester, Kings Norton, Birmingham, Aston, as well as in Coventry, one of the seats of the silk trade. The marriages declined in Lincoln; in Leicester the two last winters show an increase; in Basford, Nottingham, and Derby the increase was greater than in the other districts of the North Midland Division. In Cheshire and Lancashire the marriages increased most in Stockport, Macclesfield, Congleton, and Nantwich; Liverpool, West Derby, Ashton-under-Lyne, Oldham, and Blackburn. Huddersfield, Bradford, Leeds, Sheffield, and York were the chief contributors to the increase of marriages in Yorkshire; Durham, Sunderland, South Shields, Newcastle-upon-Tyne, and Kendal to the increase in the Northern Counties. The marriages in Wales during the two last winters exceeded the marriages in the three winters preceding. Monmouth and Pontypool exhibit a decrease; Cardiff, Merthyr Tydfil and Swansea, Brecknock, Presteigne, Holywell, and Wrexham, a decided increase.

BIRTHS.

The number of births registered in the quarter ending June 30th amounted to 159,138; which is more than the births registered in any preceding quarter. It

† The Table may be read thus, without reference to the decimal points:—In the year 1848, to 100000 of the population of England there were 738 marriages, 3243 births, 2307 deaths registered.—The annual rates of marriage in each of the 4 quarters were .661, .665, .755, and .861 per cent.; the rates of death .2794, .2318, .2004, and .2108 per cent. (In reading the population on the first line add 3 ciphers (000). The 3 months January, February, March, contain 90, in leap year 91 days; the 3 months April, May, June, 91 days; each of the 3 last quarters of the year 92 days. For this inequality a correction has been made in the calculation. It was assumed that the population increased at the same uniform rate as the females increased in 1841–51, namely 1.212 per cent. annually, or .302 quarterly. So $\frac{1}{4} \times 1.212 = .303$).

exceeds by nearly 30000 the births registered in the corresponding quarter of 1841, when the number was 129,884. The births in the year 1851 already amount to 316,512. The increase is distributed over nearly all the divisions of England, but is greatest in London, in Yorkshire, and in the northern counties.

INCREASE OF POPULATION.

The census has been taken since the appearance of the previous number of the quarterly Tables; and an unrevised statement of the population of each district is given in the present publication. The annual rate of increase from 1841 to 1851 is found to have been 1·212 per cent.; whereas it was 1·332 per cent. in the 10 years 1831-41. The Tables have all been consequently recalculated, and the former rate has been substituted for the latter in estimating the population of each year. To a slight extent the rate of mortality has hitherto been understated in the Tables of the Quarterly Return; but the results for 1850, when the error is greatest, are only affected in the second decimal place.

The population of England and Wales was 15,914,148 on June 7th, 1841, and 17,922,768 on March 31st, 1851; and this implies such a rate of increase that the population, exclusive of persons in ships, must have been about—

17,977,000 in the middle of the year 1851.
15,930,000 " " 1841.

And the increase in 10 years - 2,047,000

The population of England and Wales, therefore, increased on an average 204,700 annually; 51175 quarterly; 3923 weekly; and 560 daily. Prior to 1850 the excess of registered births over deaths does not account for the whole of the

increase; but in 1850 the births exceeded the deaths by 223,888; and in the June quarter of 1851 there is an equivalent excess: for the births of 159,138 children the deaths of 99,639 persons were registered, which leaves an excess of 59,499 persons in the population. The number of emigrants in the quarter from the ports of the United Kingdom at which there are Government emigration officers amounted to 115,568, of whom 28,696 sailed from ports of Ireland, 6,926 from Glasgow and Greenock, 3,473 from Plymouth, 10,451 from London, and 66,022 from Liverpool, making 79,946 from English ports.* Many of the emigrants that sail from Liverpool are of Irish birth; and there has also hitherto been a regular immigration of the Irish population into England.

STATE OF THE PUBLIC HEALTH.

99,639 deaths were registered in the quarter ending June 30, 1851; the deaths in the corresponding quarter of 1850 were 93,005; and 102,143 in the corresponding quarter of 1849, when cholera was in the kingdom. The Table, p. 34, shows that the *annual rate of mortality in the Spring quarter* (April, May, June) was very uniform in the years 1841-46, or 2·141 per cent. on an average, 2·174 when highest (1841), and 2·077 when lowest (1844); in the Spring of 1847, after the potato failure, the mortality rose to 2·506, and remained 2·314, and 2·341 in the Springs of 1848 and 1849; in 1850 it fell to 2·106. In the Spring quarter of 1851 the mortality was at the rate of 2·228 per cent. per annum, which is lower than the mortality of the three bad seasons (1847-8-9), but higher considerably than the mortality in the corresponding quarter of the 7 years 1841-46 and 1850. Measles, scarlatina, small-pox, and hooping-cough were epidemic in many districts, and the chief causes of the high mortality.

Different epidemics prevail in different places at the same time, and the kinds of disease-matter are distributed over the face of the country like clouds over the sky: the outbreaks are partial, segregate, or universal; an epidemic arises and disappears in a village; at other times it radiates from a town; and at rare intervals infests the whole population. This law of the distribution of disease disclosed by the registration returns has a practical application. For if it is advantageous to know the places of the country which are generally salubrious, it is also useful to know at any particular time whether they are free from epidemics. Every disease of the zymotic class appears in almost every place at irregular intervals; and when people living in cities leave them, and visit watering places or open healthy districts, they may arrive in the midst of an epidemic to which their families are thus unnecessarily exposed. The Quarterly Returns show generally what places are healthy, what are unhealthy, in each season, and with the local registers furnish the information that is required to avoid the dangers of temporary residence in districts either habitually or casually the seat of epidemic visitations.

The health of LONDON exhibits no improvement. The deaths out of 2,361,640 living were 13,093; which exceed the deaths in the corresponding June quarter of the preceding year by 1855, and are 88 more than were registered in 1849; 209 persons, chiefly children, died of small-pox, 495 of measles, 169 of scarlatina, and 734 of hooping-cough. The mortality from diarrhoea is declining; it caused 202 deaths in the June quarter of 1847, and 191 deaths in the corresponding quarter of 1851. The deaths from cholera in the 5 June quarters, 1847-51, were 4, 17, 268, 9, 3. Influenza has been prevalent, and 108 deaths are referrible directly to that cause, besides deaths from bronchitis and pneumonia which are frequent terminations of influenza, and properly belong to the epidemic. It is a favourable circumstance that few deaths are ascribed to purpura and scurvy. Typhus, metria (childbirth fever), erysipelas, and rheumatic fever have been less fatal than usual. No death from hydrophobia occurred in London. Consumption is more fatal than any other disease; it has destroyed 1815 lives in the three months. The deaths from consumption in the June quarter of the year 1850 were only 1548. So great a fluctuation in the mortality of this disease is unusual, and deserves attention. Chorea (St. Vitus's dance), epilepsy, and tetanus (lock-jaw) have been more than usually fatal; of metria and other diseases incidental

* Return with which the Emigration Commissioners have favoured the Registrar General.

to childbearing 82 mothers died, or *one* to every 234 births of living children registered; 16 deaths were directly ascribed to intemperance; 32 to delirium tremens. By poison 19 deaths were caused; the number is considerably less than the average, and will, we may hope, be still further reduced under the operation of Lord Carlisle's Act. Burns and scalds caused 48 deaths; by hanging, strangling, and suffocation 50 persons died; by drowning 70. The deaths from fractures and contusions amounted to 159; from wounds to 31. Both the latter numbers exceed the averages.

The health of the SOUTH-EASTERN DIVISION, Surrey out of London, Kent, Sussex, Hampshire, and Berkshire, is always above the standard of England, and is in this quarter better than usual. The deaths (7597) are considerably below the average. Yet there has been much sickness in Chertsey; scarlatina, measles, hooping-cough, and croup, have been prevalent in Rochester and Gillingham; low fever in Beckley, Rye; influenza in two subdistricts of Hungerford, Kintbury and Lambourn, where scarlatina has also been fatal in ill-ventilated apartments, too small for the large families of the poor occupiers. Scarlatina still exists in Shrivenham; hooping-cough and measles in Sutton Courtney. The mortality was somewhat above the average in Gravesend, Brighton, Southampton, and Reading, from epidemics or causes which the registrars have not named.

The health of the SOUTH MIDLAND DIVISION is above the average in every county from Buckinghamshire to Cambridgeshire. The deaths were 6189 out of 1,234,283 inhabitants. Small-pox and measles were prevalent at Uxbridge; cases of small-pox occurred in North Mimms parish, Hatfield; 13 persons died from small-pox in St. Albans; hooping-cough prevailed and was fatal in Quainton, Whitchurch, and Waddesdon; scarlatina was very fatal in Oxford, and in Wing, Leighton Buzzard; hooping-cough in Wisbeach.

The EASTERN DIVISION was less healthy than usual; of about 1,113,710 inhabitants 5994 died in the quarter. Norfolk suffered extensively from *scarlatina*; and the mortality was above the average. Measles prevailed almost universally among children in Manningtree, Essex; but only 2 deaths from the disease were registered. Many persons were attacked by small-pox in Coggeshall; only 3 died. In Hedingham the deaths of the quarter were doubled from bronchitis and pneumonia, chiefly in children. Hooping-cough, measles, and pulmonary affections were fatal in Sudbury, Suffolk, during the early part of the quarter. An increase of births is ascribed to the revival of the silk manufacture in the town. The registrar notices that the cutting of the Norfolk estuary has induced an afflux of population to Kings Lynn, and that measles has been rife. The mortality was above the average in the districts of Chelmsford, Tendring, Halstead, Cosford, Mutford, Yarmouth, Flegg, Kings Lynn, Downham, and Thetford.

The SOUTH-WESTERN DIVISION was generally healthy; the deaths out of about 1,803,706 inhabitants were 9352. Wiltshire was healthy; but a parish in the Chippenham District offers an example of one of those circumscribed epidemics which so well deserve attention. See remarks of the registrar of Corsham, No. 252; 2.

Diarrhoea was common, but not fatal, in Heavitree near Exeter. *Scarlatina* declined in Plymouth, was prevalent in Torrington, and fatal in Bideford, where it still prevails.

Scarlatina and small-pox were prevalent in Cornwall, and raised the mortality of the county above the average. The registrar of St. Ives gives an instance of the effects of the mistaken fatalism of an ill-instructed people:—

"People have a superstitious fear of having their children vaccinated. They say "it is taking the "cause out of the hands of God."

The influx of labourers into Redruth continues, and to this the increase of births is ascribed.

Taunton and Bridgewater, Chard and Bedminster, have suffered from scarlatina. Bath was healthy. *Ilchester* (No. 319; 5.) is an example of unusual exemption from disease.

The WEST MIDLAND DIVISION presents considerable diversities in the six counties of which it is composed; in Staffordshire and Warwickshire the mortality was

above the average; in Gloucestershire, Herefordshire, Shropshire, and Worcestershire the mortality was below or not above the average; out of 2,132,853 inhabitants 12662 died in three months. The mortality was great in West Bromwich, Dudley, Birmingham, and Aston. The deaths in Birmingham amounted to 1295 out of 173,878 inhabitants; measles, small-pox, bronchitis, and pneumonia prevailed; vaccination and other sanatory precautions appear to have been neglected in this important town. In Shrewsbury the mortality was high; of the 34 persons who fell a sacrifice to small-pox in the sub-district of St. Mary not *one* had been vaccinated. Measles was fatal in many districts of the division. Scarlatina is rarely mentioned.

The population has decreased in the agricultural, and typhus has prevailed in the mining parts of the district of Shiffnal.

The NORTH MIDLAND DIVISION has been unusually healthy; and out of 1,214,621 inhabitants 6521 died in 3 months. The mortality in Leicester was remarkably low. Measles prevailed in several districts of Lincolnshire, in Nottingham and Basford; yet the mortality in Lincoln, Nottingham, and Derby was low.

The NORTH-WESTERN DIVISION comprises Cheshire and Lancashire. Out of 2,487,351 inhabitants the deaths were 15812; the mortality is therefore high, but lower than it was in some previous years. Small-pox was epidemic in many districts; measles, hooping-cough, and scarlatina also prevailed. The Registrar of Heaton Norris states, that 7 persons in one house were attacked by small-pox; all had been vaccinated in infancy, and all recovered. Stockport is healthy. "The factory operatives have regular employment, enjoy more exercise in the open air, and seem to pay greater attention to sanatory measures." The deaths in Liverpool were 1898 out of 255,055 inhabitants; the mortality was below the average. The Registrar of Howard-street notices one death from English cholera. Wigan is in an unhealthy state; small-pox, measles, and typhus are very prevalent; many nuisances still exist. The increase of births in Bolton is ascribed to the influx of people consequent on an improved state of trade, which affords pretty "regular employment to the labouring classes. Immense numbers of them are employed at very low wages; but provisions are cheap." The mortality is low. In the Manchester district the deaths were much below the average, or 1599 out of 228,437 inhabitants.

The YORK DIVISION presents some contrasts, but the health of the county is above the average condition. The deaths were 10751 out of 1,788,767 inhabitants. Small-pox, measles, scarlatina, and influenza were epidemic in some districts; but the prosperous state of trade is said to have led to an increase of births, and diminished mortality. Thus, the Registrar reports, that in Bradford East End: "the inhabitants of the sub-district are in full employment; provisions are good and cheap; people are better fed and clothed. We have no particular epidemic prevailing. The majority of the deaths have been amongst the young, principally from pneumonia."

A similar state of things in Ecclesall Bierlow is accounted for "by the progressive improvement in the trade of Sheffield." The mortality in Sheffield, Leeds, York, and Hull was above the average. Measles was epidemic in several of the districts.

The NORTHERN DIVISION was comparatively healthy. Out of 968,934 inhabitants 4985 died. Measles prevailed epidemically in Stockton, Durham, Easington, Houghton-le-Spring, Gateshead, and Morpeth, in Durham, Alston and Kirkoswald in Cumberland, Kirkby Lonsdale in Westmoreland. This division contains some of the healthiest as well as some of the unhealthiest districts in the kingdom.

The WELSH DIVISION was in a less favourable state. Of 1,288,821 inhabitants 6616 died. Scarlatina, measles, and small-pox prevailed in certain districts. In Abergavenny the deaths exceeded the births in number.

MARRIAGES Registered in the Quarters ending March 31st, 1847-51; BIRTHS and DEATHS Registered in the Quarters ending June 30th, 1847-51, in the Divisions, Counties, and Districts of England.

* Aithon-under-Lyne (474) and Oldham (475) formed one District down to March 21st, 1848, when each of the Unions of Aithon and Oldham became a separate District.
 † Changes have taken place in the constitution of these Districts since 1st January 1849.

NOTE.—The 13 weeks of 1851, constituting the June quarter in the Weekly Tables of Mortality, ended June 28th, in which 13003 deaths were registered. In the quarter ending June 30th (p. 34), 13100 deaths were registered.

* Under the head of sudden deaths are classed not only deaths described as sudden, of which the cause has not been ascertained or stated; but also all deaths returned by the coroner in vague terms, such as "found dead," "natural causes," &c. &c.

† In the years previous to 1846, "worms" and "infantile fever" were classed together. The former, of very rare occurrence, is now placed to diseases of stomach, &c.

On the Meteorology of England, South of Scotland, and parts of Ireland, during the Quarter ending June 30th, 1851. By JAMES GLAISHER, ESQ., F.R.S., Sec. of the British Meteorological Society.

The weather during the past quarter has been for the most part cold and unseasonable, particularly from the 14th of April to the 9th of May, which period was distinguished by frequent thunderstorms, with snow, sleet, and hail showers almost daily all over the country. Some snow fell as late as the 4th of June at Leicester and on the 11th of June at North Shields.

At Greenwich till April 16th the average daily deficiency of temperature was $3^{\circ} \cdot 8$. From April 17th to April 24th the period was warmer, the average daily excess was $4^{\circ} \cdot 1$. On the 25th a period of severe weather set in, and the daily temperatures continued below their average values till June 18th. The deficiency on May 3d, 4th, 5th, was 11° daily, and the mean deficiency for the 55 days was 4° . After June 19th the daily temperature was about 3° daily in excess.

The mean temperature at Greenwich of the 3 months ending May, constituting the 3 spring months, was $46^{\circ} \cdot 1$, being below the average of 80 years by $0^{\circ} \cdot 4$.

NOTE.—In reading this table it will be borne in mind that the sign (—) minus signifies below the average, and that the sign (+) plus signifies above the average.

Thunderstorms occurred, or thunder was heard and lightning seen, on April 2d at Chichester; on the 17th at Stonyhurst; on the 18th at Gainsborough, Leeds, Stonyhurst, Newcastle, and North Shields; on the 23d at Gainsborough; on the 24th at Newcastle, Grantham, Hawarden, Gainsborough, Liverpool, Wakefield, and Castlebar (in Ireland); on the 25th at Exeter and North Shields; on the 26th at Midhurst, Camberwell, Rose Hill, and Cardington; on the 27th at Jersey, Leicester, and Liverpool; on the 28th at Guernsey and Uckfield; on the 29th at Camberwell, Stone, and Hartwell Rectory; on the 30th at Uckfield, Lewisham, St. John's Wood, Rose Hill, Stone, Hartwell House, Hartwell Rectory, and Hawarden; on May 1st at Chichester, Hartwell House, Hartwell Rectory, Linslade, and Manchester; on the 3d at Chichester and Uckfield; on the 4th at Jersey, Stone, Cardington, and Bedford; on the 5th at Guernsey, Uckfield, Stone, and Hawarden; on the 10th at Cardington, Bedford, and Nottingham; on the 11th at Rose Hill, Thame, Stone, Hartwell House, Hartwell Rectory, Linslade, Cardington, and Leicester; on the 19th at Uckfield, Cardington, Norwich, Grantham, Gainsborough, Wakefield, Durham, Newcastle, and North Shields; on June 5th at Dunino; on the 20th at Guernsey; on the 21st at Stone, Hartwell Rectory, Leicester, Grantham, Nottingham, Hawarden, Gainsborough, Liverpool, Manchester, Wakefield, Stonyhurst, Durham, Newcastle, North Shields, and Dunino; on the 30th at Bridgetown, near Wexford (Ireland).

Thunder was heard, but lightning was not seen, on April 5th at Hartwell House; on the 17th at Nottingham and Durham; on the 18th at Nottingham and Durham; on the 23d at Rose Hill, Thame, Cardington, and Norwich; on the 24th at Exeter, Thame, Hartwell House, Cardington, and Grantham; on the 25th at Helston, Hartwell House, and Whitehaven; on the 26th at Helston, Midhurst, Uckfield, Thame, Stone, Linslade, Wakefield, and North Shields; on the 27th at Exeter, Camberwell, Hartwell Rectory, Stone, Bridgetown, and Nottingham; on the 28th at Jersey, Stone, and Hartwell; on the 29th at Jersey, Thame, Hartwell House, Linslade, Cardington, Nottingham, and d; on the 30th at Camberwell and Cardington; on May 1st and 2d at Stone; on the 2d at Hartwell Rectory; on the 3d at Rose Hill, Stone, and Hartwell Rectory; on the 5th at Hartwell and Cardington; on the 10th at Uckfield, Hartwell Rectory, and Linslade; on the 11th at

Midhurst and Norwich; on the 12th at Camberwell; on the 16th at Durham; on the 18th at Stone, on the 19th at Gainsborough; on the 22d at Thame; and on the 31st at Durham; on June 4th at Norwich, Nottingham, and Whitehaven; on the 12th at Cardington; on the 20th at Stone; on the 21st at Rose Hill, Thanet, Hartwell Rectory, Cardington, Grantham, Nottingham, Gainsborough, and Whitehaven; on the 29th at Helston.

Lightning was seen, but thunder was not heard, on April 21st and 22d at Thame; on the 23d at Holkham; on the 27th at Falmouth, Truro, Uckfield, and Nottingham; on the 28th at Helston and Thame; on the 30th at Cambridge, Nottingham, Wakefield, Stonyhurst, and Whitehaven; on May 4th at Guernsey; on the 11th at Cambridge; on the 12th at Wexford; on the 19th at Nottingham and Gainsborough; on June 5th at Stone; on the 20th at Jersey; on the 21st at Rose Hill, near Oxford; and on the 28th, 29th, and 30th at Helston.

Hail fell on April the 4th at Bedford, Nottingham, and Gainsborough; on the 6th at Guernsey; on the 8th at Uckfield and Camberwell; on the 10th at Nottingham; on the 11th at Nottingham and Wakefield; on the 12th at Wakefield; on the 15th at Newcastle; on the 17th at Liverpool; on the 18th at Gainsborough and North Shields; on the 24th at Falmouth and Truro; on the 25th at Exeter and North Shields; on the 26th at Rose Hill, Radcliff Observatory, Ennis in Ireland, Hawarden, Stonyhurst, North Shields, and Dunino; on the 27th at Jersey, Guernsey, Helston, Truro, Exeter, Uckfield, Camberwell, St. John's Wood, Linslade, Bedford, Hawarden, Gainsborough, Liverpool, Wakefield, Whitehaven, North Shields, and Dunino; on the 28th at Jersey, Guernsey, Falmouth, Exeter, Camberwell, St. John's Wood, Hartwell Rectory, Hawarden, Stonyhurst, Whitehaven, and North Shields; on the 29th at Jersey, Guernsey, Falmouth, Exeter, Chichester, Uckfield, Lewisham, Camberwell, St. John's Wood, Rose Hill, Stone, Hartwell Rectory, Linslade, Bedford, Hawarden, Stonyhurst, Whitehaven, Durham, and North Shields; on the 30th at Guernsey, Helston, Southampton, Uckfield, Camberwell, Rose Hill, Hartwell Rectory, Liverpool, and North Shields; on May the 1st at Jersey, Helston, Chichester, Southampton, Hawarden, Leeds, and North Shields; on the 2d at Rose Hill, Stone, Hartwell Rectory, and North Shields; on the 3d at Radcliff Observatory, Linslade, Hawarden, Gainsborough, Liverpool, Stonyhurst, Whitehaven, North Shields, and Dunino; on the 4th at Jersey, Guernsey, Helston, Falmouth, Truro, Lewisham, Radcliff Observatory, Stone, Hartwell House, Hartwell Rectory, Linslade, Bedford, Nottingham, Hawarden, Gainsborough, Liverpool, Manchester, Leeds, Stonyhurst, Whitehaven, Newcastle, North Shields, and Dunino; on the 5th at Jersey, Guernsey, Falmouth, Midhurst, Radcliff Observatory, Stone, Hartwell Rectory, Bedford, Nottingham, Hawarden, Liverpool, and Manchester; on the 6th at Southampton and Camberwell; on the 7th at Southampton; on the 10th at Linslade and Hawarden; on the 11th at Falmouth; on the 18th at Rose Hill; on the 19th at Uckfield, Rose Hill, Radcliff Observatory, Linslade, Bedford, Norwich, Holkham, Nottingham, Hawarden, Gainsborough, Liverpool, Leeds, Stonyhurst, Durham, North Shields, and Dunino; on the 20th at Nottingham; on June the 4th at Hawarden, Liverpool, North Shields, and Dunino; on the 5th at Whitehaven; on the 6th at Dunino; on the 19th at Newcastle; on the 21st at Nottingham and Durham.

Snow fell in April on the 5th at Holkham; on the 25th at North Shields; on the 26th at Hawarden, Wakefield, Whitehaven, Durham, and Newcastle; on the 27th at Chichester, Uckfield, Hartwell, Linslade, Cardington, Leicester, Nottingham, Durham, Newcastle, North Shields, and Dunino; on the 28th at Stone, Hartwell, Hawarden, Durham, North Shields, and Dunino; on the 29th at Camberwell, Stone, Hartwell, Cardington, Holkham, Hawarden, Gainsborough, Stonyhurst, Durham, and North Shields; on the 30th at Camberwell, Cardington, and North Shields; and on the 31st at North Shields; on May the 1st at Hawarden; on the 3d at Norwich, Leicester, Nottingham, and Hawarden; on the 4th a few flakes fell at Guernsey; on the 5th at Southampton and Cardington; on the 11th at Leicester; on the 19th at Holkham; on June the 4th at Leicester; and on the 11th at North Shields.

Fog was prevalent on April 1st, 3d, and 19th at Midhurst; on the 20th at Rose Hill; on the 24th at Durham; on the 26th at Linslade; on May the 11th at Rose Hill, Thame, Hartwell Rectory, Linslade, Hawarden, and Durham; on the 17th at Helston; on the 23d at Thame; on the 28th and 29th at Stonyhurst; on June the 20th at Midhurst and Durham; on the 22d at Midhurst; on the 24th at Helston; and on the 26th at Linslade.

Aurora were seen on April the 7th at Leeds; on the 18th at Nottingham; on the 21st at Grantham and Hawarden; on May the 15th at Whitehaven; and on June the 19th and 30th at Nottingham.

Swallows were first seen in April, on the 6th at Whitehaven; on the 11th at Hawarden; on the 14th at Stone, Hartwell Rectory, and Grantham; on the 16th at Nottingham; and on the 17th at Lewisham.

The Cuckoo was first heard in April, on the 11th at Hartwell House; on the 12th at Hawarden; on the 15th at Guernsey; on the 16th at Jersey; on the 18th at Grantham; on the 20th at Stone, Hartwell Rectory, and Linslade; on the 22d at Nottingham; and on the 23d at Whitehaven.

Wheat was in ear in June, on the 15th at Linslade; on the 4th at Jersey; on the 7th at Helston and Linslade; on the 9th at Holkham; on the 12th at Cardington; on the 21st at Nottingham; and on the 22d at Hawarden.

Wheat was in flower in June, on the 12th at Helston, on the 13th at Guernsey and Rose Hill; on the 14th at Jersey; on the 16th at Uckfield; on the 17th at Thame and Holkham; on the 20th at Camberwell; on the 22d at Stone and Linslade; on the 24th at Derby; on the 27th at Hawarden and Wakefield.

The common Lilac was in flower in April, on the 16th at Jersey; on the 22d at Guernsey; on the 4th of May at Uckfield; on the 6th at Helston; on the 11th at Thame; on the 12th at Stone and Leicester; on the 13th at Rose Hill; on the 14th at Norwich; on the 15th at Nottingham; on the 18th at Hartwell Rectory and Linslade; on the 20th at Cardington; and on the 22d at Derby.

NAMES OF THE PLACES.	Mean Pressure of dry Air reduced to the level of the Sea.										WIND.		RAIN.		Mean degree of Humidity.			
	Mean Temperature of the Air.	Highest Reading of the Thermometer.	Lowest Reading of the Thermometer.	Mean Daily Range of Temperature.	Mean Monthly Range of Temperature.	Range of Temperature in the Quarter.	Mean Temperature of the Quarter.	Mean Temperature of the Month.	Mean Temperature of the Day.	Mean estimated Strength.	General Direction.	Mean Amount of Cloud.	Number of Days on which it fell.	Amount collected.	Mean Weight of Vapour in a cubic foot of Air.	Mean additional Weight required to saturate a cubic foot of Air.	Mean degree of Humidity.	Mean whole Amount of Water in a vertical column of Atmosphere.

The mean of the numbers in the first column is 59° 06.3 inches, and it represents that portion of the reading of the barometer due to the pressure of air; the remaining portion, that due to the pressure of water, is 0.006 inch; the sum of those two numbers is 59° 06.3, and it represents the mean reading of the barometer for the quarter at the level of the sea.

The highest readings of the thermometer in air were 91° at Gainsborough, 90° at Uckfield and Bedford, and 86° at Jersey; and the lowest readings were 25° at Holkham, 25° at Rose Hill, and 25° at Linslade. The extreme range of temperature, therefore, in England, during the quarter, was 66°. The least daily ranges of temperature took place at Guernsey 5° 6, at Liverpool 10° 6, and at Whitehaven 11° 7, and their mean value was 10° 6; and the greatest occurred at Uckfield 22° 7, at Highfield House 22° 6, and at Linslade 21° 6, and their mean value was 22° 3.

Rain fell on the least number of days at Guernsey, Uckfield, Midhurst, and Hawarden; and on the greatest number at Thame, Gainsborough, and Hartwell Rectory. The places where the least falls took place are Bedford, Chislehurst, and St. John's Wood; and the mean amount at those places was 5.01 inches. The largest falls occurred at Jersey, Stonyhurst, and Newcastle; and their average was 9.41 inches.

OF

THE MARRIAGES, BIRTHS, AND DEATHS IN ENGLAND.

THIS Return comprises the BIRTHS and DEATHS registered by 2189 Registrars in all the districts of England during the Summer quarter ending September 30th, 1851; and the MARRIAGES in more than 12000 churches or chapels, about 3190 registered places of worship unconnected with the Established Church, and 623 Superintendent Registrars' offices, in the quarter that ended June 30th, 1851.

The Return of Marriages is not complete; but the defects are inconsiderable, and approximative numbers have been supplied from the records of previous years.

The marriages still exceed the average, but are less numerous than the marriages in the corresponding quarter of last year. The births continue to increase rapidly, and the mortality is below the average. The returns therefore present a favourable view of the state of the country.

MARRIAGES.

38498 marriages were registered in the quarter ending June 30th. This number is less by 520 than the number registered in the Spring quarter of 1850, but more by 3777 than the number registered in the Spring quarter of 1848. The marriages only amounted to 30048 in the Spring quarter of 1842; they rose to 34268 in the Spring quarter of 1844; to 37111 in the Spring quarter of 1846; declined to 35197 in 1847; and rose again to 39018 in the Spring quarter of 1850. Every marriage is the establishment of a family, and is generally the result of some deliberation; it is not surprising therefore that the prosperity of the country and the prospects

MARRIAGES, BIRTHS, and DEATHS, returned in the Years 1840-51 and in the Quarters of those Years.

* The numbers up to 1848 have appeared in the Annual Reports.

of the people should be expressed pretty accurately by the fluctuations in the marriage returns.

While the marriages increased rapidly in some parts, they were stationary or decreased in others. In London 6515 couples were married; which exceeds the number married in the summer of 1848 by 1106. In Surrey out of London, in Sussex, Kent, and Berkshire the marriages were nearly stationary; in Hampshire they decreased. In the South Midland, the Eastern Counties, as well as in Wiltshire, Dorsetshire, and Devonshire, marriage was stationary or decreased; in Cornwall and Somersetshire there was an increase. In Gloucestershire marriage was stationary; in Herefordshire and Shropshire the numbers married were unprecedentedly low; in Staffordshire, Worcestershire, and Warwickshire—including the chief seats of the Midland iron trade—the marriages increased. The marriages rose from 383 in 1848 to 487 in Birmingham. In Leicestershire, Rutlandshire, and Lincolnshire the marriages were below, in Nottinghamshire and Derbyshire above, the average number; the excess occurring chiefly in the districts of Nottingham, Chesterfield, and Hayfield. The marriages in Cheshire and Lancashire decreased. The decrease was considerable in Liverpool, and greater still in Manchester. In the West Riding of Yorkshire there is an excess; and this is most conspicuous in Sheffield, where the marriages in the five Summer quarters ending June 1847–51 were 283, 273, 289, 339, and 404! In Leeds the marriages were 351 in the June quarter of 1848; 530 and 487 in the corresponding quarters of 1850 and 1851. In Hull the marriages increased from 147 in the June quarter of the cholera year 1849 to 175 in 1850, but have fallen again to 158. The marriages decreased in the North Riding of Yorkshire, in Northumberland and Cumberland; increased in the coal districts of Durham. In Monmouthshire and Wales marriages were less frequent than in 1850.

† The Table may be read thus, without reference to the decimal points:—In the year 1848, to 100000 of the population of England there were 798 marriages, 3249 births, 2307 deaths registered.—The annual rates of marriage in each of the 4 quarters were ·661, ·805, ·755, and ·961 per cent.; the rates of death 2·794, 2·313, 2·005, and 2·108 per cent. In reading the population on the first line add 3 ciphers (000). The 3 months January, February, March, contain 90, in leap year 91 days; the 3 months April, May, June, 91 days; each of the 2 last quarters of the year 92 days. For this inequality a correction has been made in the calculation. It was assumed that the population increased at the same uniform rate as the females increased in 1841–51, namely 1·212 per cent. annually, or ·302 quarterly. So $\frac{1}{4} \times 1 \cdot 212 = \cdot 303$.

It has been observed that the marriages increase after a fatal epidemic; and in the present return the marriages, it is seen, have been in excess generally where cholera was most fatal in 1849.

BIRTHS.

150,584 births have been registered in the quarter ending September 30th, 1851. This is the greatest number of births ever registered in the same season of the year, and exceeds by 23411, and 15361, and 3614, the births in the September quarters of 1847, 1849, and 1850. The births of 467,096 children have already been registered, and it is probable that in the year the numbers will not fall short of 600,000. The increase is distributed over all the divisions of the country except the South Midland.

INCREASE OF POPULATION.

While 150,584 children were born and registered in the summer quarter, 91600 persons died; leaving an excess of 58984 in the population. The excess of births over deaths in the first 9 months of the present year has been 170,411, which is probably more than equivalent to the actual increase of the population.

It is well known that up to a late period there has been a constant immigration of the Irish and Scotch into England, which appears to have been fully equivalent to the emigration of the English into the colonies and to foreign parts; but no exact statistical information on this subject exists.

85603 emigrants left the ports of the United Kingdom at which there are government emigration officers in the quarter ending September 30th, 1851. This is at the rate of 930 a day; 6510 a week. 13963 sailed from Irish ports, 4378 from Glasgow and Greenock, and 67262 from three English ports; namely, 10062 from London, 2799 from Plymouth, and 54401 from Liverpool. Many of the Irish emigrants are returned at Liverpool. Of the total number 68960 emigrants sailed to the United States, 9268 to British North America, 6097 to the Australian Colonies, and 1278 to other places. The emigration has hitherto been greater in 1851 than it was in the corresponding quarters of 1850.*

The present movement of the population is in many respects remarkable. The free admission of grain, fruit, and meat since the scarcity is equivalent to an addition to the country of a vast tract of fertile soil, which calls for cultivators, and, as the land is abroad, for agricultural emigrants who prefer the cheap though distant lands of America to the high-rented farms of Ireland, no longer possessing a monopoly for its produce in the English market. The fact deserves attention, that while the United Kingdom has been importing food in unprecedented quantities, it has been sending out swarms of emigrants from the population, of which the marriages and births promise to keep up a perpetual and increasing supply.

PRICES OF PROVISIONS, &c. in the Quarter ending September 30th, 1851.

Average Price of Consols.	Average Price of Wheat per Quarter in England and Wales.	Quarters of Wheat sold in the 290 Cities and Towns in England and Wales making Returns.	Quarters of Wheat and Wheat Flour entered for Home Consumption at Chief Ports of Great Britain.	Average Prices of Meat per lb. at Leadenhall and Newgate Markets (by the Carcase).		Potatoes (York Regents) per Ton at Waterside Market, Southwark, when the supply of old Potatoes ceased.

STATE OF THE PUBLIC HEALTH.

The health of different parts of the country differs widely, and the difference is greatest in summer. In the 10 summer quarters of 1841—50 the mortality in 506 districts, comprising, when the census was taken, 10,126,886 people, was at the rate of 18·15 in 1000 annually; while in 117 districts, comprising the chief towns, and

* Return with which the Registrar General has been favoured by the Emigration Commissioners. At the time the Return was made it was not quite complete.

7,795,882 people, the mortality was at the rate of 25 in 1000 *annually*. Thus, at least, 7 in every 25 deaths which occur in towns are the result of artificial causes. The mortality in the quarter ending September 1851 was at the rate of 23 and 17·93 in 1000 in the two groups of districts; it was a little below the average in the country, and considerably below the average in the towns. The *annual rate* of mortality per cent. in all England was, on the average of 10 summers, 2·099; in the summer quarter of 1851 it was 2·020.

POPULATION; and MORTALITY per Cent. in the Summer Quarters of 11 Years, 1841-51.

LONDON has enjoyed a degree of health above the average in the last Summer quarter: 13064 deaths were registered, which is a less number than was registered in the Summer quarters of 1847 and 1848, and half the number (27172) registered in the Summer quarter of 1849, when cholera was epidemic. During the three months of July, August, and September, more people have passed through or resided temporarily in London, with its 2,361,640 inhabitants, than ever passed through any city before in the same time. The past experience of large armies, or of the pilgrimages of the east and of the middle ages, might have justified the sinister forebodings which some entertained; but the railways and the improvement in sanatory arrangements have now rendered it possible to move masses of men about in thousands and millions without danger to the public health, as the event has here proved. The deaths by violence, though less than in previous summers, were 363; 10 by poison, 35 by burns and scalds, 43 by hanging or suffocation, 89 by drowning, 156 by fractures and contusions, 21 by wounds, and 9 by other violence.

The number of Suicides and Murders registered in London was less in 1851 than in the summer quarters of 1847, 1848, and 1850.

	1847	1848	1849	1850	1851
Suicides	65	59	48	58	48
Murders	5	7	3	4	4
Manslaughters . .	4	2	2	—	4
	74	68	53	62	56
Found drowned . .	35	42	38	35	31
TOTAL	109	110	91	97	87

The deaths by poison in the summer quarters of 1848-50, were 15, 20, 26; and instead of increasing, they were only 10 in the summer of 1851. This decrease is highly gratifying, as it follows so immediately the recent legislation on the subject. Fractures and contusions were more fatal than in 1849-50, but not more fatal than in 1848. That other form of poisoning, intemperance in the use of alcoholic drinks, seems also to be declining; 16 deaths were ascribed to intemperance, 55 to delirium tremens, in the summer quarter of 1850; while 13 and 35 were referred to the same causes in the summer quarter of 1851. No person has died of hydrophobia in any summer quarter since 1843. The deaths from that

cause in the 6 years 1846-51 were 3; in the 6 years 1840-5 they amounted to 15; in the year 1839 to 4; in 1838 to 12. The decrease of this dreadful form of disease may be fairly ascribed to improved police regulations. 34 women died of metria; 55 of the other incidents of childbirth. 1683 persons died of consumption; next to this disease in fatality, and far above all other diseases, was diarrhœa, which destroyed 1456 lives in 3 months. Summer cholera was more fatal than it was in the summer quarters of 1847-8; and more than twice as fatal as it was in the summer of 1850. There has been a progressive increase of diarrhœa since the summer of 1841, when only 228 persons died of the disease; 627 deaths were referred to typhus, 38 to remittent fever. Typhus was increasing at the close of the quarter.

The SOUTH-EASTERN DIVISION has been less healthy than it was last year. The mortality was above the average in the Medway district (including Rochester), the Isle of Thanet (including Margate, Ramsgate, and Broadstairs), Dover, Brighton, Worthing, Newport in the Isle of Wight, Hungerford, and Abingdon. Diarrhœa was prevalent, as well as typhus and scarlatina, in several of the districts. 3 cases of cholera were fatal at Newport in the Isle of Wight.

The SOUTH MIDLAND DIVISION was generally healthy. The mortality was much below the average in the counties of Hertford, Northampton, Huntingdon, Bedford, Buckingham, and Cambridge. In Oxfordshire the mortality was above the average in the districts of Thame, Headington, and Oxford. In Oxford 19 persons died of scarlatina, 16 of diarrhœa, and 3 of typhus. The health of Cambridge has, on the contrary, been unusually good. The deaths were only 105 in the quarter; whereas the deaths in the corresponding quarters of 1847-50 were 135, 137, 133, and 151. The Registrar of St. Andrew-the-Great, Cambridge, states that "very great improvements have been made in the sanatory arrangements of the town." There was a small local outbreak of Asiatic cholera in Leighton Buzzard.

"Three deaths from cholera occurred as follows:—At Lonslade, a woman aged 51 years, "cholera, 24 hours." She had been from home some time, and had recently returned from "Manchester.—At Leighton Buzzard, a woman aged 43 years, "cholera (6 hours) and apoplexy." "The cottages where this case occurred are below the public road; the back premises confined, and "drainage bad.—At Bellington, a woman aged 17 years, "cholera, 60 hours." Drainage bad; the "situation adjoining a farm-yard. It was stated by informant that the carcase of a calf was lying "in a barn near the house in a putrid state."

In the EASTERN DIVISION the mortality was below the average in Essex and Suffolk, above the average in Norfolk. Diarrhœa prevailed at Leyton in West Ham, Wickford, and Rayleigh; in Rochford fever of the remitting and typhoid type prevails. Ipswich suffered from diarrhœa; Lowestoft from scarlatina and English cholera. Diarrhœa was fatal in Norwich and Yarmouth; scarlatina in Yarmouth, Flegg, Walsingham, and Docking; hooping-cough in Downham.

The SOUTH-WESTERN DIVISION, with the exception of Cornwall, was healthier than is usual. In Amesbury and Salisbury the mortality was high. Scarlatina was prevalent in Marlborough, Wilts; typhus in Wareham, where, in the opinion of medical men, it was aggravated by bad drainage. Scarlatina and diarrhœa prevailed in Plymouth and Stoke Damarel. Scarlatina was the chief cause of the high mortality in Cornwall. Small-pox has also been there. Dysentery is now prevailing in St. Ives. In the Penzance sub-district the deaths exceeded the births registered; and sanatory measures are so grossly neglected by the inhabitants, that 57 of their children have died of small-pox, which is still prevailing. In Bath diarrhœa was prevalent "in confined, dirty localities, where there were bad effluvia "from nuisances."

In the WEST MIDLAND DIVISION the public health was as good as usual in Gloucestershire, Herefordshire, and Shropshire. One death from cholera occurred in St. Mary Redcliffe, Bristol, and one in St. John the Baptist, Gloucester; a low fever and scarlatina were fatal in Stroud; dysentery prevailed in Albrighton, Shifnal; and it is stated that the population is decreasing in Shifnal "from "emigration and want of employment in the agricultural districts." Small-pox

has nearly disappeared from Shrewsbury ; one person died of cholera in Burslem where diarrhoea prevailed, as it did also in Longton, Darlaston, and Dudley. The deaths in Birmingham were 1237 ; diarrhoea was rife, and several cases of cholera were registered. The high rate of mortality in this well placed town proves how much wise and timely sanitary measures are neglected. Coventry is in a still worse condition ; the mortality is higher.

In the NORTH MIDLAND DIVISION the mortality was high in Nottinghamshire ; Leicestershire, Lincolnshire, and Derbyshire enjoyed an average degree of health. In the towns of Leicester and Derby, however, as well as in Nottingham, the mortality was above the average. Diarrhoea and cholera prevailed in Nottingham and Chesterfield.

The NORTH-WESTERN DIVISION constantly suffers more from death than the other divisions of England ; the mortality of the summer has been less than usual. In Manchester the decrease of deaths is considerable. Diarrhoea prevailed in many districts. The Registrars mention 7 cases of cholera in Liverpool, 2 in Toxteth Park, 2 in Wigan, 7 in Warrington, and 3 in Little Bolton. In Hulme, Chorlton, 40 children and 8 adults died without medical assistance. The Registrar of Market Street, Manchester, says,

"The improved health and, it may be added, temper of the people of the district may assuredly be ascribed to the cheapness of provisions, which are not only abundant but also of better quality, because the temptation to adulterate food is not so great."

The population is quitting Colne in Burnley, in search of employment ; and increasing in Blackburn in consequence of the erection and enlargement of cotton mills. The Registrar of Poulton-le-Fylde says,

"The harvest has proved very good, and the labouring classes have been fully employed, which, together with the inestimable blessing of cheap food, I presume has been the cause of the healthiness of my district."

The Registrar of Sedbergh says,

"The deaths have, for upwards of 2 years, been much below the average of former years. I am at a loss to account for it otherwise than that the labouring population have in general been better employed than in former years, and with the low price of provisions that class has been able to procure all the necessities of life."

In Yorkshire the mortality has been slightly above the average of ordinary summers. Diarrhoea and summer cholera prevailed, with scarlatina, and in some parts influenza. The mortality was higher than is usual in Huddersfield, Leeds, Sheffield, and York. A few cases of cholera, said to be Asiatic, occurred in Sheffield, and diarrhoea was exceedingly prevalent. The Guardians acting with praiseworthy promptness supplied the poor with medical aid and medicines, which diminished the mortality.

The mortality in the NORTHERN DIVISION was above the average. Diarrhoea prevailed in several districts ; scarlatina, small-pox, measles, and dysentery are referred to ; and the Registrar of Sedgefield mentions one case of cholera. Typhus prevails in Bewcastle, High Longtown, and has been fatal to two persons.

The mortality has been above the average in Merthyr Tydfil and Pembroke ; but Wales and Monmouthshire generally have been healthy. The Registrar of Llantrissaint, Cardiff, remarks,

"It is a most singular circumstance, that not one death happened within this district between the 15th of August last and the 11th of September, a space of 27 days, though the population is nearly 11,000. No movement of the population has taken place, and no sanitary arrangements have been effected."

Mr. Glaisher has given a full and interesting account of the weather.

MARRIAGES Registered in the Quarters ending June 30th, 1847-51; BIRTHS and DEATHS Registered in the Quarters ending September 30th, 1847-51, in the DIVISIONS, COUNTIES, and DISTRICTS of ENGLAND.

* The Edmonton District (187) included the District of Hampstead down to May 1848, but the numbers here given refer to Edmonton exclusive of Hampstead (see No. 7.) for all the years.
 * The Parish of Edgoots (containing 43 persons in 1841) was taken from Brickley (164) and added to Banbury (163) July 2nd, 1847.
 * The Parish of Overstone (population 187 in 1841) was transferred from Wellingborough (171) to Brinkworth (170) September 29th, 1849.

NOTE.—The 13 weeks of 1851, constituting the September quarter in the Weekly Tables of Mortality, ended September 27th, in which 12887 deaths were registered. In the quarter ending September 30th (p. 7), 13064 deaths were registered.

* Under the head of sudden deaths are classed not only deaths described as sudden, of which the cause has not been ascertained or stated; but also all deaths returned by the coroner in vague terms, such as "found dead," "natural causes," &c. &c.

† In the years previous to 1848, "worms" and "infantile fever" were classed together. The former, of very rare occurrence, is now placed to diseases of stomach, &c.

On the Meteorology of England, South of Scotland, and parts of Ireland, during the Quarter ending September 30th, 1851. By JAMES GLAISHER, ESQ., F.R.S., Sec. of the British Meteorological Society.

Till July 26th, with the exception of a very few warm days, the mean daily temperatures of the air were below their average values, but the defect was not at any time large; the average defect for the period was $1^{\circ} \cdot 9$. Between July 27th and August 25, the daily temperatures were generally in excess, on some few days to the amount of 6° , 7° , or 8° ; the average excess was $2^{\circ} \cdot 4$. This period was followed by one of an opposite character, though of short duration, the daily temperatures being below their average value, on one day (August 29th) to the amount of 11° nearly; the average defect to August 31st was $5^{\circ} \cdot 3$. This was followed by 4 days of warm weather, the excess of temperature being $4^{\circ} \cdot 2$, and from September 5th, the daily temperatures departure from their average values for the most part by small quantities, at times being slightly in excess, but generally in defect; the average defect for the period was 1° .

The mean temperature at Greenwich of the 3 months ending August, constituting the 3 Summer months, was $60^{\circ} \cdot 4$, exceeding the average of 80 years by $0^{\circ} \cdot 5$.

NOTE.—In reading this table it will be borne in mind that the sign (—) minus signifies below the average, and that the sign (+) plus signifies above the average.

Thunderstorms occurred, or thunder was heard and lightning seen, on 30th June P.M. at Castlebar in Ireland, with heavy rain; on July 1st at Exeter, St. John's Wood, Thame, Padcliff Observatory, Hartwell Rectory, Hawarden, Manchester, and Stonyhurst; on the 8th at Cowes, Isle of Wight, Uckfield, Lewisham, Maidenstone Hill, Hartwell House, and Hartwell Rectory; on the 10th at Uckfield, Thame, Hartwell Rectory, and Norwich; on the 15th at Lewisham, Holkham, and Nottingham; on the 17th at Jersey, Helston, Falmouth, Truro, Exeter, Cowes, Uckfield, Lewisham, Maidenstone Hill, Nottingham, Gainsborough, Manchester, and Stonyhurst; on the 18th, at Hartwell House, Norwich, Holkham, Durham, Newcastle, and North Shields; on the 23d at Uckfield, St. John's Wood, Rose Hill near Oxford, Thame, Radcliff Observatory, Hartwell House, and Hartwell Rectory; on the 27th at Carrick-on-Shannon in Ireland; on the 28th at Falmouth, Truro, Manchester, Stonyhurst, York, and North Shields; on the 29th at Jersey, Exeter, Hartwell House, Holkham, Nottingham, Hawarden, Gainsborough, Liverpool, Manchester, Stonyhurst, Durham, and Newcastle; on the 30th at Cowes, Uckfield, Hartwell House, and Hartwell Rectory; on August the 13th at Lewisham, Maidenstone Hill, Hartwell Rectory, Cardington, Bedford, Norwich, Holkham, Hawarden, Gainsborough, Wakefield, York, Newcastle, and North Shields; on the 14th at Ennis (in Ireland), Holkham, Nottingham, Gainsborough, Wakefield, Leeds, Stonyhurst, York, Newcastle, North Shields, and Dunino (distant); on the 17th at Oxford, Gainsborough, and Durham; on the 23d at Stokestown (in Ireland), Stonyhurst, and Whitehaven; on the 24th at York; on the 29th at Jersey, Uckfield, Hartwell Rectory, and Cardington; on September the 18th at Jersey.

Thunder was heard, but lightning was not seen, on July 1st at Uckfield, Thame, Stone Observatory, and Liverpool Observatory; on the 2d at Exeter; on the 8th at Cowes, Thame, Hartwell Rectory, Cardington, and Nottingham; on the 9th at Nottingham; on the 10th at Linslade and Nottingham; on the 11th at Norwich; on the 15th at Thame and Norwich; on the 17th at Cowes, Oxford, Radcliff Observatory, Cardington, and Norwich; on the 18th at Uckfield, Thame, Cardington, and

Norwich; on the 20th at Nottingham and Hawarden; on the 23d at Jersey, St. John's Wood, and Linslade; on the 26th at Uckfield and Oxford; on the 28th at Wakefield; on the 29th at Oxford, Hartwell Rectory, Linslade, Cardington, Grantham, Wakefield, and Leeds; on the 30th at Oxford, Thame, and Grantham; and on the 31st at Cowes; on August 12th at Falmouth; on the 13th at Uckfield, Oxford, Thame, Stone, Linslade, Nottingham, Hawarden, Liverpool Observatory, and Stonyhurst; on the 14th at Norwich; on the 17th at Norwich, Nottingham, Hawarden, and North Shields; on the 23d at Radcliff Observatory; on the 27th at Oxford, Thame, Linslade, and Nottingham; and on September the 23d at Linslade.

Lightning was seen, but thunder was not heard, on July 1st at Stone; on the 4th at Bedford; on the 17th at Hartwell House; on the 19th at Helston; on the 20th at Helston; on the 22d at Jersey and Guernsey; on the 28th at Hawarden, Wakefield, and Leeds; on the 29th at Hartwell House, Linslade, Bedford, and Nottingham; and on the 30th at Cowes; on August the 7th at Uckfield and Thame; on the 12th at Helston and Falmouth; on the 13th at Uckfield, Oxford, Thame, Radcliff Observatory, Stone, Hartwell House, Linslade, Cardington, Bedford, Nottingham, Hawarden, Stonyhurst, and Durham; on the 14th at Radcliff Observatory, Stone, Hartwell House, Hartwell Rectory, and Cardington; on the 17th at Maidenstone Hill, Hartwell Rectory, Linslade, and Cardington; on the 23d at Uckfield, Oxford, Radcliff Observatory, Cardington, and Hawarden; on the 27th at Hartwell Rectory and Nottingham; on the 28th at Stone; on the 30th at Stone; on the 31st at Guernsey; on September 8th at Radcliff Observatory; and on the 18th at Guernsey.

Hail fell on July 15th at North Shields; on the 17th at Exeter, Stone, and Hartwell Rectory; on the 18th at Gainsborough and Durham; and on the 29th at Hartwell Rectory; on August the 7th and 13th at Thame (snow fell); on the 13th at Gainsborough and Wakefield; on the 29th at Jersey, Uckfield, Cardington, and Hawarden; and on the 26th of September at Guernsey, Helston, and Hawarden.

Fog was prevalent on July the 2d and 19th at North Shields; on the 21st at Hartwell House (4 A.M. with frost); on the 23d and 24th at Hawarden; on the 29th at North Shields; and on the 31st at Cowes; on August the 13th and 14th at Hartwell Rectory; on the 16th at Thame and Hartwell House; and on the 30th at Cowes; on September the 1st at Stonyhurst; on the 3d at Thame and Stonyhurst; on the 5th, 6th, 7th, 8th, 9th, and 10th at Stonyhurst; on the 11th at Cowes, Thame, Stone, and Stonyhurst; on the 12th at Cowes, Thame, Stone, and Stonyhurst; on the 13th at Cowes, Lewisham (A.M.), Thame, Stone, and Stonyhurst; on the 14th at Hartwell Rectory and Stonyhurst; on the 15th at Hartwell Rectory and Stonyhurst; on the 16th at Thame and Stonyhurst; on the 20th at Thame; on the 21st at Thame and Stonyhurst; on the 22d and 23d at Thame; on the 24th at Thame and North Shields; on the 26th at Stonyhurst; and on the 29th at Hartwell Rectory.

Aurora were seen on August the 13th and 14th at Stone; on the 21st at Nottingham; on the 24th at Hawarden and North Shields; and on the 30th at Stonyhurst and Whitehaven; on September the 6th at Whitehaven and Durham; on the 7th at Whitehaven; on the 14th at Hartwell Rectory and Whitehaven; on the 15th at Stone, Hartwell Rectory, Nottingham, Gainsborough, Stonyhurst, Whitehaven, Harpham, near Driffeld, Yorkshire, and Durham; on the 27th at Hawarden and Durham; on the 28th at Norwich, Harpham, near Driffeld, and Durham; on the 29th at Maidenstone Hill, Stone, Hartwell House, Hartwell Rectory, Cardington, Nottingham, Wakefield, Durham, and North Shields; and on the 30th at Nottingham. On all those days the magnets were disturbed. The aurora of September 29th as seen at Nottingham was very brilliant; it commenced at about 7 h. 30 m. and continued visible till 1 h. A.M. of the morning of September 30th. The colours were orange, scarlet, and pink. After 9 h. 50 m. many clouds obstructed the view of the streamers; at 10 h. many very brilliant streamers were seen; at 10 h. 14 m. orange coloured streamers rose up in N.N.E. and dimmed the stars; at 11 h. faint streamers passed E. of the Pointers; at midnight many clouds appeared as though illuminated by a full moon behind them. The distant hills were seen as if by daylight, and strong shadows were cast around.

Remarkable Rain fell on July the 14th, at Ennis in Ireland, amounting to 0.55 in. in depth, at Manchester to 1.104 in., and at Stonyhurst in eight hours 1.104 in.; at Helston on the 17th in two hours 1.12 in., and at Falmouth in 24 hours 1.008 in.; at Lewisham on the 23d 0.983 in., at Rose Hill near Oxford 1.051 in.; on the 23d and 24th at Lewisham a depth of 1.953 in. was recorded; at Grantham, from 9 h. A.M. on the 23d till noon on the 24th, 2.105 in.; on the 24th at Norwich 1.19 in., at Holkham 2.000 in., and at Nottingham 1.160 in. On the 28th at Strokestown in Ireland 0.475 in.; on the 29th at Longford 0.330 in., at Carrick-on-Shannon, accompanied with thunder and lightning, 0.830 in.; and on the 31st at Castlebar 0.640 in. On August the 13th at Gainsborough in one hour 0.82 in. (the streets were flooded and houses filled); on the 14th at Helston there fell in a few hours 1.04 in.; at North Shields on the night of the 16th 1.189 in.; on the 24th at Ennis 0.78 in., with a storm; at Longford 0.900 in., and at Strokestown 0.810 in.; on the 26th at Whitehaven 0.807 in.; on the 28th at Uckfield 1.300 in., at Lewisham 1.550 in. (which fell in the night). On September the 25th at Ennis 0.460 in., at Wakefield 1.410 in., at Newcastle (from 9 h. A.M. till 9 h. A.M. on the 26th) 3.000 in.; at North Shields on the 25th 3.007 in.; on the 26th at Whitehaven 1.167 in.; on the 27th at Hartwell Rectory 1.005 in., at Holkham 1.225 in.; on the 30th at Longford 0.580 in., at Strokestown 0.630 in., and at Carrick-on-Shannon 1.100 in. At North Shields on September the 25th, at 10 h. 15 m. A.M., a thin rain began to fall; at a quarter after 12 the darkness was extreme, and from that time till 11 h. A.M. nearly on the following day rain fell to the depth of 3.007 inches.

At Derby on September 25th, at 4 h. P.M. a very heavy rain began to fall, and by the 27th the amount was 1.062 in.: it was accompanied by a hurricane, and which did much damage on the coast.

The mean of the numbers in the first column is 59° 61 inches, and it represents that portion of the reading of the barometer due to the pressure of air; the remaining portion, or that due to the pressure of water, is 0° 04 inch; the sum of those two numbers is 59° 65 inches, and it represents the mean reading of the barometer for the quarter at the level of the sea.

The highest readings of the thermometer in air, were 85° at Uckfield, 82° at Jersey and 80° at Nottingham, and 80° at the Royal Observatory, Greenwich; and the lowest readings were 29° 2 at Radcliff Observatory, 32° 5 at Cardington and Wakefield, and 32° at Rose Hill, Hartwell House, Linslade, and Norwich. The extreme range of temperature, therefore, in England, during the quarter, was 55° 4. The least daily ranges of temperature took place at Guernsey 10° 6, at Liverpool 10° 2, at North Shields 11° 0, and at Chislehurst-street 11° 9; and their mean value was 10° 7; and the greatest occurred at Uckfield 22° 6, at Nottingham 22° 5, and at Hartwell House and Linslade 22° 0; and their mean value was 22° 4.

Rain fell on the least number of days at Cowes, Isle of Wight, Dunino, Uckfield, and Guernsey; and on the greatest number at Nottingham, Stonyhurst, Thame, and North Shields. The places where the least falls took place are Guernsey, Jersey, Chichester, Southampton, Cowes, Cardington, and the mean amount at those places was 3° 9 inches. The largest falls occurred at Stonyhurst and Holkham, and their average was 12° 61 inches.

QUARTERLY METEOROLOGICAL TABLE for different PARALLELS of LATITUDE.

PARALLELS OF LATITUDE, &c.											RAIN.								
											Average Number of Days.	Average fall.	Mean Weight of Vapour in a cubic foot of Air.	Mean additional Weight required to saturate a cubic foot of Air.	Mean degree of Humidity. In the formation of this Table the results from Jersey and Guernsey have not been combined, on account of the great differences in the ranges of temperature between those two places.

ERRATA.—In the quarter ending June 30, 1851, at Jersey, amount of rain collected, for 11° read 3° 8; and insert Jersey among the places of least falls of rain, and remove it from the list of places of largest falls; also alter in foot note, for 76 read 2° 8, and for 11 read 8° 1.

OF

THE MARRIAGES, BIRTHS, AND DEATHS IN ENGLAND.

THIS Return comprises the BIRTHS and DEATHS registered by 2190 Registrars in all the districts of England during the Autumn quarter ending December 31st, 1851; and the MARRIAGES in more than 12000 churches or chapels, about 3228 registered places of worship unconnected with the Established Church, and 623 Superintendent Registrars' offices, in the quarter that ended September 30th, 1851.

The Return of Marriages is not complete; but the defects are inconsiderable, and approximative numbers have been supplied from the records of previous years.

The marriages and the births exceed the average numbers; and the deaths are also slightly above the average of the corresponding quarters.

For the whole of the year 1851 the births have greatly exceeded the numbers in any previous year, and the mortality has been lower than it was in any of the 10 years 1841-50, except 1843, 1845, and 1850. The births, deaths, and marriages show a balance of births over deaths, and an increase of families; which are only observed in a state of prosperity. The tendency at the end of the year to decline towards the average state of things will no doubt attract attention to the great interests and to the public health of the country.

MARRIAGES.

74310 persons were married in the 3 months ending September 30th. The rapid increase of the marriages in England from 29221 in the September quarter of 1840 to 37155 in 1851 is partly due to the increase of the population and partly to the

* The numbers up to 1849 have appeared in the Annual Reports.

increased disposition to marriage. In the September quarter of 1841 and 1851 out of 100,000 persons 365 and 409 married; consequently out of the same number of persons 8 married in 1841 and 9 in 1851.

The number of marriages is less than it was in the previous June quarter, which is usually the case, and slightly less also than it was in the corresponding quarter of 1850. In parts of the country the decrease is not inconsiderable; in others the marriages of 1851 exceeded those in the corresponding quarter of 1850. Thus in London the marriages in the quarter ending September 1851 were 7345, or 583 more than in the September quarter of 1850, and 1548 more than in the quarter of 1847! In Kent, Sussex, and Hampshire the marriages still exceed the average; in Berkshire the excess is inconsiderable. The excess was chiefly in Guildford, Dartford, Tunbridge, Dover, Eastbourne, and Lewes. In Brighton the marriages were 154, which is near the average, but less than in the corresponding quarters of 1849-50. In the South Midland Division, Buckinghamshire, Oxfordshire, Northamptonshire, Bedfordshire, and Cambridgeshire have fewer marriages in the quarter of 1851 than in the corresponding quarter of the previous year. In Essex and Norfolk, Wiltshire, Dorsetshire, and Somersetshire a similar decline took place; in Suffolk and Cornwall the marriages slightly increased. In the South Midland, Eastern, and South-western counties, the number of marriages, though less than in the corresponding quarter of 1850, was not below the average. The same state of things is observed in the West Midland Division; the marriages were less numerous in Herefordshire, Gloucestershire, and Shropshire than they were in the previous year; in Staffordshire and Worcestershire the numbers remained above the average, and there was a considerable increase in Wolverhampton, and Stourbridge; in Warwickshire the marriages are more numerous than they were in 1850, and the increase is chiefly in Birmingham and its suburbs. In Leicestershire, Nottinghamshire, and Derbyshire the marriages rapidly increased from

† The Table may be read thus, without reference to the decimal points:—In the year 1848, to 100000 of the population of England there were 798 marriages, 3249 births, 2307 deaths registered.—The annual rates of marriage in each of the 4 quarters were ·661, ·805, ·755, and ·861 per cent.; the rates of death 2·794, 3·313, 3·006, and 3·108 per cent. In reading 4 quarters were on the first line add 3 ciphers (000). The 3 months January, February, March, contain 90, in leap year 91 days; the 3 months April, May, June, 91 days; each of the 2 last quarters of the year 92 days. For this inequality a correction has been made in the calculation. It was assumed that the population increased at the same uniform rate as the females increased in 1841-51, namely 1·212 per cent. annually, or ·302 quarterly. So $\lambda r = \cdot0012078$.

1847 up to 1850, and have now slightly declined. Lincolnshire, which was at the lowest point in 1850, increased in 1851. The marriages in nearly all the districts of Lancashire, including Liverpool and Manchester, declined, but were more numerous than in any previous September quarter except that of 1850. The marriages have progressively declined in the North Riding of Yorkshire since 1848; they still remain above the average in the West Riding. In Keighley, Halifax, Leeds, and Sheffield the number of marriages in the quarter exceeds the number in the corresponding quarter of any previous year since 1847. In Leeds and Sheffield the increase is remarkable. In Hull and Sculcoates the rate of marriage declined. In the Northern Counties and in Wales the rate of marriage remained above the average, but was rather lower than it was in the September quarter 1850.

The Marriage Returns of 1850 and 1851 exhibit the excess which since 1750 has been invariably observed when the substantial earnings of the people are above the average; and the experience of a century, during which the prosperity of the country though increasing has been constantly fluctuating, shows that it is prudent to husband the resources of good times against future contingencies. Workmen, if they are wise, will not now squander their savings.

BIRTHS.

149,155 births were registered in the last quarter, and 616,251 in the year 1851. These are the greatest numbers ever before registered. The average annual rate of births in the 10 years 1841-50 was 3.261 per cent.; in the year 1851 the rate was 3.428 per cent. To every 100,000 of the population 3428 children were born in 1851 instead of 3261; and there was consequently an excess of 167, or of 5 per cent. The excess appears to have been distributed very generally over the whole country.

INCREASE OF POPULATION.

While the births in the last quarter of the year 1851 were 149,155, the deaths were 99,248; leaving an excess of 49,907 in the population. The deaths in the year 1851 were 385,933, the births 616,251; consequently 230,318 at least was the natural increase in England and Wales of a population amounting to 17,977,000 in the middle of that year, and now exceeding 18 millions of souls.

Emigration still continues; 59200 people left their homes and the ports of the United Kingdom in the last 92 days of the old year. 52292 sailed from English ports; namely, 42680 from Liverpool, 6252 from London, and 3360 from Plymouth.

1524 persons sailed from Glasgow and Greenock; 5384 from Irish ports. A great proportion of these emigrants from Liverpool were of Irish birth.*

Provisions have been cheap.—The price of beef by the carcase has for the last half-year been 4d. a pound, of mutton 4½d. a pound, at Leadenhall and Newgate markets. Potatoes, which were at the average price of 5s. the hundred-weight at the time the supply of old potatoes ceased in the September quarter, fell to 3s. 6d. in the 13 weeks ending December 31st. In the same periods wheat was 40s. 7d. and 36s. 7d. a quarter. The subjoined Table shows that while 74,714 quarters of wheat were sold weekly in the 290 cities and towns making returns in July, August, and September, the amount sold after the harvest, in October, November, and December, was 109,506 quarters weekly. The average weekly amount sold during the 6 months was 92,110. The amount of wheat consumed is unknown; but at the estimated annual rate of a quarter a head it is 345,712 quarters weekly in England and Wales; and it will be observed that in wheat and flour, 69,513 quarters, equal to three-fourths of the wheat sold, were imported weekly and entered for Home Consumption on the average during the 6 months.

The AVERAGE PRICES of Consols, Wheat, Meat, and Potatoes, also the AVERAGE QUANTITY of Wheat sold and imported weekly, in the Two last Quarters of 1851.

Quarter ending	Average Price of Consols.	Average Price of Wheat per Quarter in England and Wales.	† Wheat sold in the 290 Cities and Towns in England and Wales making Returns.	† Wheat and Wheat Flour entered for Home Consumption at Chief Ports of Great Britain.	Average Prices of Meat per lb. at Leadenhall and Newgate Markets (by the Carcase).		Potatoes (York Regents) per Ton at Waterside Market, Southwark.
					Beef.	Mutton.	
Sept. 30	96½	40s. 7d.	74,714	91,040	3d.—5d. Mean 4d.	3½d.—5½d. Mean 4½d.	90s.—110s. Mean 100s.
Dec. 31	97½	36s. 7d.	109,506	47,986	3d.—5d. Mean 4d.	3½d.—5½d. Mean 4½d.	65s.—75s. Mean 70s.

† Note.—The total number of quarters of wheat sold in England and Wales for the 13 weeks ending Sept. 30th was 971,276; for the 13 weeks ending Dec. 31st, 1,423,582. The total number of quarters entered for Home Consumption was respectively 1,183,523 and 671,803; the latter total however embraces the returns of 14 weeks. The price of potatoes in the quarter ending September refers to the period during which the old supply continued.

STATE OF THE PUBLIC HEALTH.

England is one of the few countries of the world in which the rate of mortality is lowest in the hot season. In the three months ending September 1851 the mortality, calculated on the population, was at the rate of 2.020 per cent., which was slightly below the average (2.099) of the 10 preceding summer quarters; in the three months ending December 1851 the mortality was at the rate of 2.182 per cent., which, on the other hand, is slightly above the average (2.162) of the 10 preceding Autumn quarters. The spring months of April, May, June, stand higher than the Autumn quarter in the order of mortality; while in the three months of January, February, and March the mortality is highest in winter. The mortality of the quarters of the year is seen in the subjoined Table; which also presents a strong argument in favour of the improvement of the sites, dwellings, drainage, cleansing, and water supply of the large towns of the kingdom.

The mortality of the large towns is, in the first and second half of the year respectively, one fifth and one third part higher in the large towns than it is in the country districts and small towns; where many causes of insalubrity also exist. The same causes that destroy the lives of so many people, degrade the lives of more, and may ultimately, it is to be feared, have a very unfavourable effect on the

* From a return with which the Registrar General has been favoured by the Emigration Commissioners.

energies of a large proportion of the English race. Here is then a wide field for salutary and beneficent reforms.

The mortality of the large town districts in the last quarter of 1851 is slightly below the average; and this may be hailed with satisfaction as an indication of sanatory activity. Unfortunately the mortality in the small towns and in the country districts has increased to some extent, and thus left the mortality of the kingdom above the average.

Scarlatina, measles, small-pox, and fever have been epidemic in many districts, and are still prevailing.

ANNUAL RATES of MORTALITY per Cent. deduced from the Returns of 1841-51.

The weather in the three months is shown by the returns collated by Mr. Glaisher to have presented some extraordinary deviations from the ordinary state of things. The fall of rain in the three months was only two fifths of the usual quantity; many springs and small streams ceased to flow; and the atmosphere, containing less vapour than usual, was dry. The effect of the change in the meteorology on the public health and the growing crops must be carefully watched during the present year.

In LONDON 14355 deaths were registered in the quarter, while only 12956 deaths were registered in the corresponding quarter of the previous year. Upon looking back to 1847, when influenza was epidemic, and 18586 persons died, there is matter of congratulation in the fact that at present the metropolis is exempt from any extraordinary epidemic, and is, allowing for increase of population, losing less than the average number of lives. 3137 persons died in 13 weeks of zymotic diseases; by small-pox 339, measles 204, scarlatina 603, whooping-cough 286, diarrhoea 401. These were chiefly children. Only 15 deaths were referred to cholera, 34 deaths were referred to influenza, 1050 to bronchitis, and 1053 to pneumonia. The inflammations of the air tubes and lungs have thus been rather more prevalent than usual, which may be partly the result of the extremely cold weather in November, and partly the consequence of influenza. Consumption was unusually fatal: 1737 persons died of this disease, which was the cause of one eighth part of the total deaths. Typhus or continued fever was fatal in 770 instances, erysipelas in 116, metria in 69, other accidents incidental to childbirth in 59. Carbuncle was fatal in 9 cases, and 18 deaths were referred to purpura or scurvy. These diseases are important, as their unusual prevalence denotes a low tone of health, only to be combated by fruit or wine, which is not within the reach of the people. Only 7 deaths were directly ascribed to privation, while 15 were ascribed to intemperance, and 33 to delirium tremens. The deaths by poison are above the average, and call for greater vigilance on the part of their vendors, the chemists and druggists. It is painful to find that in London 28 persons died of poison in 13 weeks. Burns and scalds (69), fractures and contusions (164), and wounds (33) were also unusually fatal; 55 persons died of hanging and suffocation, 58 of drowning, and 12 of other kinds of violence.

In the SOUTH-EASTERN DIVISION the mortality was near the average. Brighton, however, was exceedingly unhealthy, chiefly from scarlatina and measles; the deaths in the quarter were 510 from all causes, out of a population of upwards of 66000.

The health of the people of Hertfordshire, Buckinghamshire, Oxfordshire, Bedfordshire, Cambridgeshire, of all the South Midland counties, was unusually good.

The EASTERN COUNTIES, Essex, Suffolk, and Norfolk, had fewer deaths than usual. Of the 31 deaths registered in the sub-district of Docking, only 16 had the attendance of medical men ! Of six children who died of inflammation of the chest and of scarlatina *three* were without medical attendance. This criminal negligence of sick children by their parents deserves the attention of the local authorities. It will be recollected that it was in the Eastern Counties that the crime of poisoning by arsenic was some time ago brought to light.

In the SOUTH-WESTERN DIVISION the mortality was above the average in Wiltshire, Cornwall, and Somersetshire, below the average in Devonshire.

The WEST MIDLAND DIVISION experienced the average rate of mortality.

The mortality in the counties of the NORTH MIDLAND DIVISION differs little from the average. Scarlatina prevailed at Melton Mowbray, small-pox in Great Grimsby and in Hayfield. The effects of the agricultural improvements now going on have been strikingly illustrated in a part of the Newark district.

"The Registrar of North Collingham reports that the births are 54; deaths 20. The deaths are below the average. Some *important drains* have been cut within the last year; hence it has followed that in places where there was much stagnant water there have been no epidemics. Formerly epidemic diseases were very common in these localities. In the village of *North Clifton*, where the drainage was bad, *low fever was seldom out of the place; but now, through the influence of an intelligent farmer, the place has been well drained, and nuisances removed, and, as a consequence, there has not been any fever in the place for about a year and a half.* The district contains nearly 5000 inhabitants. The soil is almost entirely light and sandy. The rate of wages amongst the labourers is 10s. a week, and it is very seldom that a good labourer is in want of work. The allotment system, by which each labourer has a small quantity of land at a low rate, is very generally carried out, and contributes much to his comfort. There is scarcely a labourer who does not feed a pig."

Such arrangements as are here referred to, when generally carried out, will exercise a beneficial influence much beyond common expectation, on the well-being, vigour, and character of the people. Agriculturists understand better perhaps than any other class, the effect of external circumstances not only on breeds of cattle but on races of men; and it is gratifying to see measures for the improvement of the dwellings and dwelling places of the people so ardently taken up, not only by the great and enlightened landowners of the country, but by men like this "intelligent farmer," who has delivered North Clifton from low fever, and from the epidemics which were once so common.

The mortality of Cheshire and Lancashire was higher than the high average of those counties: where the population is often crowded in places unfit for the habitations of men, and the children and houses are not, as they are elsewhere, attended to by the wives and mothers, whose occupation carries them, unfortunately, all day from home. The population of the districts of Lancashire in 1851 was 2,063,913; the funerals were 54938.

The population of the WEST MIDLAND DIVISION, comprising Gloucestershire, Herefordshire, Shropshire, Staffordshire, Worcestershire, and Warwickshire, with Bristol, Birmingham, and the population of the coal districts, was 2,132,853; the deaths were 49238; too numerous, unquestionably, but less by 5700 than the deaths out of a smaller number of people in Lancashire.

The excess of sickness and death in Lancashire is constant; in infancy, in adult age, and in both sexes.* Yet the land of a great part of the county is high and salubrious, and the occupation of the people has nothing in it essentially injurious. What then is wanting? Apparently only this one thing: that the leading men of Lancashire, animated by goodwill, should apply that skill and vigour which have been so successful in the use of machinery and the production of clothing for mankind, to the amelioration of the social condition of the two millions of Englishmen around them.

The health of the YORK, the NORTHERN, and the WELSH DIVISIONS was nearly as usual; the prevalent epidemics are specified in the Registrars Notes.

* See Registrar General's Ninth Annual Report, pp. 178-9.

NOTE.—The 13 weeks of 1851, constituting the December quarter in the Weekly Tables of Mortality, ended December 27th, in which 13964 deaths were registered. In the quarter ending December 31st (p. 7), 14853 deaths were registered.

* Under the head of sudden deaths are classed not only deaths described as sudden, of which the cause has not been ascertained or stated; but also all deaths returned by the coroner in vague terms, such as "found dead," "natural causes," &c. &c.

† In the years previous to 1848, "worms" and "infantile fever" were classed together. The former, of very rare occurrence, is now placed to Disease of stomach, &c.

On the Meteorology of England, South of Scotland, and parts of Ireland, during the Quarter ending December 31st, 1851. By JAMES GLAISHER, Esq., F.R.S., Sec. of the British Meteorological Society.

Till October 28th, with the exception of a very few days, the mean daily temperatures of the air were above their average values at times to the amount of 8° to 10° ; the average daily excess for the period was $3^{\circ} \cdot 7$. On October 29th a period of exceeding cold weather set in, and for thirty-seven days the daily temperature was below its average value, frequently amounting to 8° , 9° , and 10° , less frequently to 11° and 12° , and in one case exceeded 13° ; the average defect for the period was $6^{\circ} \cdot 2$. So cold a November has not been since the year 1786. The period from December 5th to 24th was mostly warm, though at times it was cold; the average daily temperature was $2^{\circ} \cdot 5$ in excess, and to the end of the year from the 25th it was $2^{\circ} \cdot 5$ in defect. The reading of the barometer was in excess in each month, and greatly so in December. The fall of rain has only amounted to two fifths of its average fall for the quarter, and this deficiency of rain has been general over England, Scotland, and Ireland, excepting only the county of Norfolk. There has been much less water mixed with the air, and the degree of humidity of the air has been unusually low, particularly in December.

The mean temperature of the air at Greenwich for the quarter ending November, constituting the 3 Autumn months, was $49^{\circ} \cdot 1$, being $0^{\circ} \cdot 2$ below the average of 80 years.

NOTE.—In reading this table it will be borne in mind that the sign (—) minus signifies below the average, and that the sign (+) plus signifies above the average.

Thunderstorms occurred, or thunder was heard and lightning seen, on 1st October at Nottingham; on the 4th at Guernsey and St. John's Wood; on the 5th at Uckfield; on the 15th at Jersey and Helston; on the 29th and 30th at Guernsey; On November 18th at Norwich; on the 21st at North Shields, and on the 28th and 29th at Guernsey.

Thunder was heard, but lightning was not seen, on October 2d at Hawarden and Stonyhurst, and on the 29th at Stonyhurst; on the 2d of November at Hawarden; on the 16th at North Shields; and on the 17th and 18th at Holkham.

Lightning was seen, but thunder was not heard, on 1st October at Nottingham and Hawarden; on the 2d at Linslade and Norwich; on the 3d at Uckfield; on the 5th at Thame, on the 8th and 11th at Exeter; on the 14th at Jersey; on the 15th at Stone, Hartwell Rectory; on the 16th at North Shields; and on the 21st at Hartwell House; on the 17th of November at Nottingham and Wakefield; on the 19th of December at Linslade; and on the 26th at Nottingham.

Hail fell on the 2d at Helston and Maidenstone Hill; on the 3d at Jersey; on the 4th at Jersey and Guernsey; on the 5th at Uckfield and Stonyhurst; on the 6th at Nottingham; on the 15th at Liverpool and Whitehaven; on the 16th at Thame; on the 18th at Guernsey; on the 24th and 25th at Jersey; on the 29th at Guernsey, Falmouth, Torquay, and North Shields; on the 30th at Guernsey and North Shields; on 1st November at Falmouth, Liverpool, and Whitehaven; on the 2d at Falmouth, Torquay, Maidenstone Hill, Thame, Hartwell House, Hartwell Rectory, Nottingham, Hawarden, and Liverpool; on the 3d at Guernsey, Helston, Torquay, and Hawarden; on the 4th at Guernsey and Hawarden; on the 10th at Guernsey, Helston, and Falmouth; on the 11th at North

Shields; on the 16th at Helston; on the 17th at Falmouth and Torquay; on the 20th at North Shields; on the 24th at Guernsey, Falmouth, Hawarden, and Liverpool; on the 25th at Guernsey, Helston, Falmouth, Torquay, and North Shields; on the 26th at North Shields; and on the 28th at Guernsey.

Fog was prevalent on October the 9th and 11th at St. John's Wood; on the 17th at St. John's Wood and Gainsborough; on the 19th at Helston; on the 20th at Stonyhurst and Durham; on the 21st and 22d at Stonyhurst and Durham; on the 23d at Gainsborough and Durham; on the 24th at Stonyhurst and Durham; on the 25th at Stone, Hartwell House, Linslade, Stonyhurst, and Durham; on the 26th at Hartwell House and Stonyhurst; and on the 27th at Hartwell House; on November the 3d at Gainsborough; on the 7th at Glasgow; on the 8th at Hartwell House; on the 11th at Thame, Stone, Hartwell House, Linslade, and Gainsborough; on the 12th at Stone, Hartwell House, Hartwell Rectory, Linslade, Bedford, Grantham, and Glasgow; on the 13th at St. John's Wood, Lewisham, Thame, Stone, Hartwell House, Hartwell Rectory, Linslade, and Norwich; on the 14th at Hartwell House; on the 15th at Hartwell Rectory and Glasgow; on the 16th at St. John's Wood and Stone; on the 19th at Thame, Stone, Hartwell Rectory, and Glasgow; on the 20th at Durham and Glasgow; on the 21st at Norwich; on the 25th at St. John's Wood, Hartwell Rectory, Linslade, Bedford, Gainsborough, Durham, and North Shields, at the latter very dense; on the 26th at St. John's Wood, Lewisham, Stone, Hartwell House, Hartwell Rectory, Linslade, and Grantham; on the 27th at Norwich and Glasgow; on the 28th at Stone, Hartwell House, Linslade, and Norwich; on the 29th at St. John's Wood, Thame, Stone, Hartwell House, Hartwell Rectory, Linslade, Bedford, Norwich, Gainsborough, and Durham; on the 30th at Thame, Stone, Hartwell House, Hartwell Rectory, Linslade, Bedford, Gainsborough, and Durham; on December the 1st at Stone, Hartwell House, Hartwell Rectory, Linslade, and Glasgow; on the 2d at Lewisham, Hartwell Rectory, and Glasgow; on the 3d at Helston, Lewisham, Hartwell Rectory, and Glasgow; on the 4th at Stone, Hartwell House, and Glasgow; on the 8th at Helston; on the 11th at Helston and Stone; on the 12th at St. John's Wood, Stone, Hartwell House, Hartwell Rectory (Linslade Travelling), Grantham, Gainsborough, Durham, and North Shields; on the 13th at Lewisham, Stone, Hartwell House, Hartwell Rectory, Bedford, Grantham, Gainsborough, Durham, and North Shields; on the 14th at Stone, Hartwell House, Hartwell Rectory, Grantham, and Durham; on the 15th at Hartwell House and Stonyhurst; on the 16th at Hartwell House; on the 18th at Hartwell Rectory; on the 19th at Guernsey (Durham very dense), and North Shields; on the 20th at Hartwell House; on the 21st at Durham; on the 22d at Stone, Hartwell Rectory, Gainsborough, Stonyhurst, and Durham; on the 23d at Stone, Linslade, Bedford, and Durham; on the 24th at Hartwell House, Hartwell Rectory, Gainsborough, Stonyhurst, Durham, and Glasgow; on the 25th at Durham and Glasgow; on the 26th at Durham; on the 27th at Hartwell House; on the 30th at Hartwell House and Hartwell Rectory; and on the 31st at Hartwell House and Gainsborough.

Aurora were seen on October the 2d at Maidenstone Hill, Oxford, Redcliff Observatory, Cardington, Norwich, Nottingham, Stonyhurst, Whitehaven, Durham, North Shields, and Dunino; on the 3d at Cardington and Nottingham; on the 4th at Nottingham and Durham; on the 14th and 15th at Stonyhurst; on the 18th at Durham; on the 28th at Wakefield, Stonyhurst, Durham, Whitehaven, and North Shields; and on the 29th at Hartwell Rectory, Nottingham, Wakefield, and Dunino; on the 4th of November at Aylesbury and Nottingham; on the 5th at Stonyhurst; on the 13th at Stonyhurst; on the 20th and 21st at Aylesbury; on the 24th at Dunino; and on the 26th at Stonyhurst; on the 6th of December at Hawarden, Liverpool, Wakefield, Durham, and North Shields; on the 8th at Hawarden; on the 22d at Nottingham, Hawarden, Stonyhurst, Whitehaven, Durham, North Shields, and Dunino; on the 23d at Whitehaven and Dunino; on the 28th at Grantham and Dunino; and on the 29th at Grantham, Stonyhurst, North Shields, and Dunino.

Snow fall on the 29th of October at Stonyhurst, and sleet at Durham; on the 3d of November at Stone, Derby, Hawarden, Liverpool, and Manchester; on the 4th at Uckfield, Stone, Hartwell Rectory, Aylesbury, Linslade, Cardington, Bedford, and Nottingham; on the 14th at Norwich; on the 15th at Norwich, Nottingham, Manchester, and Stonyhurst; on the 16th at Thame, Holkham, Durham, and North Shields; on the 17th at Falmouth, Thame, Linslade, Holkham, and North Shields; on the 18th at Uckfield, Cardington, Gainsborough, Durham, and North Shields; on the 19th at Linslade, Nottingham, Liverpool, Manchester, Wakefield, Whitehaven (a little), Durham, and Dunino; on the 20th at Oxford, Thame, Stone, Hartwell House, Hartwell Rectory, Aylesbury, and Bedford; on the 21st at Aylesbury; on the 22d at Hartwell House; on the 24th at Stonyhurst; on the 26th sleet at Gainsborough; on the 27th at Stone, Hartwell House, and Hartwell Rectory; and on the 29th at Hartwell House.

Solar halos were seen on 1st of October at Stone and Nottingham; and on the 14th at Stone, Hartwell Rectory, and Nottingham; on the 23d of November at Stone, Hartwell Rectory, and at Nottingham (a mock sun); on 4th December at Stone; on the 12th at Hartwell Rectory; and on the 13th at Uckfield.

Lunar halos were seen on the 6th of October at Cardington, Nottingham, and Liverpool Observatory; on the 8th at Hartwell House and Nottingham; on the 10th at Uckfield; and on the 11th at Nottingham; on the 1st of November at Whitehaven and Durham; on the 4th at Whitehaven and North Shields; on the 6th at Hartwell Rectory, Nottingham, Hawarden, Liverpool Observatory, Stonyhurst, and Dunino; and on the 14th at Stone, Hartwell Rectory, Cardington, and Nottingham; on the 1st of December at Norwich and North Shields; on the 3d at Durham and North Shields; on the 8th at Maidenstone Hill, Hartwell House, and Hartwell Rectory (a lunar coronae); on the 11th at Uckfield and (Thame at midnight); on the 12th at Uckfield and Hartwell Rectory; and on the 29th at Stonyhurst and North Shields.

NAMES OF THE PLACES.	Mean Pressure of dry Air reduced to the level of the Sea.	Mean Temperature of the Air.	Highest Reading of the Thermometer.	Lowest Reading of the Thermometer.	Mean Daily Range of Temperature.	Mean Monthly Range of Temperature.	Range of Temperature in the Quarter.	Mean Temperature of the Quarter.	Mean Temperature of the Month.	Mean Temperature of the Day Point.	Mean estimated Strength.	WIND. General Direction.	RAIN.		Mean Weight of Vapour in a cubic foot of Air.	Mean additional Weight required to saturate a cubic foot of Air.	Mean degree of Humidity.	Mean whole Amount of Water in a vertical column of Atmosphere.	Mean Weight of a cubic foot of Air.	Height of Column of the barometer above the level of the Sea.
													Mean Amount of Cloud.	Number of Days on which it fell.

The mean of the numbers in the first column is 29.767 inches, and it represents that portion of the reading of the barometer due to the pressure of air; the remaining portion, or that due to the pressure of water, is 0.082 inches, the sum of those two numbers is 29.849 inches, and it represents the mean reading of the barometer for the quarter at the level of the sea.

The highest readings of the thermometer in air were 71° at Falmouth, 70° at the Royal Observatory, 70° at Jersey, Hartwell House, Linslade, and Highfield House; and the lowest readings were 19° at Uckfield and Linslade, 18° at Highfield House, 20° at Radcliff Observatory, 20° at Stonyhurst, and 21° at Thame, Hartwell House, Cardington, Derby, and Manchester. The least daily ranges of temperature took place at Guernsey 6°, at Liverpool Observatory 6°, at Whitehaven 7°, at Glasgow 7°, at North Shields 8°, and their mean value was 7.3; and the greatest occurred at Aylesbury 15°, at Highfield House 14°, and at Manchester 14°; and their mean value was 14°.

Rain fell on the least number of days at Dunino, Newcastle, Bedford, Maldenstone Hill, and the Royal Observatory; and on the greatest number of days at Helston, Falmouth, and Whitehaven. The places where the least falls took place are Durham, North Shields, and Dunino, and the mean amount at those places is 1.74 inches. The largest falls occurred at Guernsey, Helston, Truro, Falmouth, and Norwich, and their average was 10.02 inches.

QUARTERLY METEOROLOGICAL TABLE for different PARALLELS OF LATITUDE.

PARALLELS OF LATITUDE, &c.	Mean Temperature of the Air.	Mean of Highest Readings of the Thermometer.	Mean of Lowest Readings of the Thermometer.	Average Daily Range of Temperature.	Average Monthly Range of Temperature.	Average Quarterly Range of Temperature.	Mean Temperature of the Quarter.	Mean Temperature of the Month.	Mean Temperature of the Day Point.	WIND. General Direction.	Mean Amount of Cloud.	Average Number of Days.	RAIN. Average fall.	Mean Weight of Vapour in a cubic foot of Air.	Mean additional Weight required to saturate a cubic foot of Air.	Mean degree of Humidity.	Mean whole Amount of Water in a vertical column of Atmosphere.	Mean Weight of a cubic foot of Air.	Mean Height above the Sea level.

In the formation of this Table the results from Jersey and Guernsey have not been combined, on account of the great difference the ranges of temperature between these two places.

LETTER from WILLIAM FARR, Esq., M.D., F.R.S., to the REGISTRAR
GENERAL, on the CAUSES of DEATH in ENGLAND, 1851.

SIR,

General Register Office.

THE health of the people during the year 1851 was better than it is usually in this country, and the mortality of the year was below the average. The temperature of the winter quarter was mild ($41^{\circ}9'$), for it was $3^{\circ}6'$ above the average; and although the temperature of the months of April, May, and June was below, the temperature of the subsequent six months was slightly above the average. Provisions were cheap, and the trade of the country prospered. No great epidemic prevailed; but the rate of mortality was higher in 1851 than it was in the preceding year, and the deaths that were registered amounted to 395,396. The causes of 388,676 deaths were assigned, and the numbers by each cause are detailed in the tables. I now proceed to notice a few of the results of this extensive inquiry and of this analysis of the circumstances attending the deaths of so many people.

It will be observed, that the causes of 6720 deaths were not specified, and of this number 4029 consisted of children under five years of age; namely, of 3234 infants under 1 year of age, and of 795 children of the age of 1 and under 5 years. The remaining 2691 persons, of whose deaths the causes are unspecified in the returns, were of every age, from 5 to 100 years.

The diseases of infants and young children are often obscure, and in some districts the medical treatment which a certain number of children obtain is imperfect; so that the absence of correct information regarding the cause of death is only the index to the negligence with which their ailments are watched during life.

Inquests are held in many cases of sudden death with unsatisfactory results, as the precise cause is unascertained with any degree of probability, and such terms as the "visitation of God" only occur in the registered verdict. Of these sudden deaths by unascertained causes 3458 occurred; namely, 1986 in males, 1472 in females. Of the males 1456, of the females 1043, were of the age of 5 years and upwards; and it would hence appear that sudden death from obscure causes is much more frequent in men than in women.

The causes of death may now be considered in five great classes.

I. ZYMOTIC DISEASES (Z.)

By this great class of diseases 86,600 deaths were caused in the year, a number exceeding by 11,767 the deaths from the same causes in 1850, but 51,170 less than the deaths in the preceding year (1849), when cholera was epidemic.

42,770 males and 43,830 females died of diseases of this class; and 26,141 of the males, 25,515 of the females, were children under five years of age.

The diseases in the class most fatal to children were diarrhœa, scarlatina, measles, hooping-cough, small-pox, croup, continued fever; and the last disease was the most fatal to adults, as out of 19,412 deaths of the age of 20 and upwards by zymotic diseases, 8718 were ascribed to "typhus."

The rate of mortality by zymotic diseases alone was nearly 5 on every 1000 of the population; and to these causes one in 5, or, more exactly, 22 in every 100 deaths, were referred.

II. SPECIFIC DISEASES (S.): or (1) *Diseases of uncertain or variable Seat*; and (2) *Tuberculous Diseases*.

Under the first order in this class of diseases 19,420 deaths are registered, including 5218 deaths from cancer and 1329 from mortification, 9872 from dropsy, and 1376 from hæmorrhage. Many of the causes of death, which according to the practice of former days would have been called dropsy, are now, in the progress of medical science, referred to their organic origin, chiefly in the heart and in the kidneys.

The 64,075 deaths in the second order of tubercular diseases include 2592 from scrofula in its various forms, 4510 from tabes mesenterica,

TABLE (1)—CAUSES OF DEATH registered in ENGLAND in each of the Years 1848, 1849, 1850, and 1851.

43 Disease of Brain, &c. - -	175	7,978			

The Table may be read thus: The first column of figures shows that to every 1,000,000 Persons living in 1851, there were 21,987 deaths from All Causes (nearly 23 deaths to 1000 persons living); 536 deaths from small-pox; 530 from measles; 771 from scarlatina, and so on. The second column of figures shows that to 1,000,000 deaths from All Causes there were 18,002 deaths from small-pox; 24,107 from measles; 35,078 from scarlatina, and so on. By placing a decimal point before the three figures on the right hand side the proportions will be shown to 1000 instead of 1,000,000; thus there were 18·002 deaths from small-pox to every 1000 deaths from All Causes.

III. ORGANIC DISEASES (O.): or Diseases of particular Organs.

The parts of the body as they are variously endowed, and have different functions, are, some more, some less, intimately concerned in the tenure of life. The deaths by inflammation, by other affections, and by functional disorders of the eight principal organic systems, amounted to 143,644, or to nearly 37 in every 100.

Diseases of the nervous system.—The diseases of the brain, spinal marrow, and nerves caused 49,854 deaths; 3628 by inflammation of the brain (cephalitis), 7946 by apoplexy, 7587 by paralysis. Of convulsive diseases, including chorea, epilepsy, tetanus, and the common convulsion, 26,547 persons died. Convulsion is chiefly incidental to children; and of 24,592 deaths, 13,831 happened to males, 10,761 to females; 11,854 were in boys, 8710 in girls under one year of age. The means of medical observation are imperfect, and the diseases of infancy are often enveloped in great obscurity; and it is probable that other latent diseases exist in these cases of which convulsions are only the striking symptoms. Delirium tremens, which is generally the result of intemperance, was returned as the cause of 503 deaths; and the numbers fluctuated little within the last 5 years. Insane persons die of phthisis, paralysis, and a great variety of affections, some of which are and others are not the result of the mental disease; so that the 542 deaths under the head "Insanity" constitute only a small proportion of the deaths occurring among lunatics.

Diseases of the organs of circulation.—11,817 deaths were the result of heart diseases, aneurisms, and other diseases of the circulatory system. These caused 3 in every 100 deaths.

Diseases of the organs of respiration.—The respiratory organs were affected by diseases which were fatal in 48,759 cases; 17,294 of bronchitis, 22,001 of pneumonia, and 4896 of asthma. This aggregate constitutes 12.55 in 100 of the specified deaths, or nearly the same proportion of the total deaths as the deaths by diseases of the nervous system.

If phthisis (consumption), which, however, is a disease that affects the intestines as well as the lungs, is added to the diseases of this order, it doubles the aggregate; for the deaths from that disease are as numerous as the deaths from all the diseases of the respiratory organs. 25 in 100 deaths are caused by consumption and by the diseases of the respiratory organs. If the deaths by diseases of the organs of circulation are added, the proportion represents the deaths by diseases of the chest, as they are popularly designated.

Diseases of the digestive organs.—The diseases of the stomach, intestines, liver, and other organs concerned in digestion were the causes of 23,219 deaths; 4410 by teething, 5825 by gastritis, enteritis, and peritonitis; namely, 721 by gastritis, 3854 by enteritis, and 1250 by peritonitis. 16,701 deaths were referred to some one or other of the diseases of the stomach and intestines, and 8 to diseases of the pancreas; 6444 to diseases of the liver; and 66 to diseases of the spleen. Of 100 deaths, 6 were caused by diseases of this group.

Diseases of the urinary organs.—Diseases of the urinary organs were fatal to 3416 persons, including 403 whose deaths were referred to diabetes, 204 to stone.

Diseases of the organs of generation.—The diseases of childbirth, paramenia, ovarian dropsy, and other affections of this order, were fatal in 3327 instances. The deaths by childbirth were 2281, in addition to 1009 by metria (puerperal fever), making 3290 deaths of the mother to 615,865 children born alive; 1 mother died, therefore, to every 187 children born; or the mortality of the mother was at the rate of .00534. This does not, however, precisely represent the danger of pregnancy, as some of the deaths undoubtedly occurred after miscarriage, or after the

birth of *stillborn* children, which are not registered; and, on the other hand, as a certain number of the children were twins, two children in such cases only represent one mother.

Diseases of the organs of locomotion.—The bones, the joints, and the muscular system are subject to diseases which were fatal in 2412 cases; besides the instances that are found under *scrofula*, which specially affects the bones and joints. 1320 of the deaths are, however, referred to rheumatism.

Diseases of the integumentary organs.—The diseases of the skin and cellular tissue are now rarely fatal. Carbuncle was the cause of 161 deaths, or of nearly six times as many as were registered 10 years before; and as it has prevailed extensively in the epidemic form, proving, however, rarely fatal, it should be referred to the zymotic class.

IV. DISEASES OF GROWTH, NUTRITION, AND DECAY (D.)

(The total deaths by this class of causes was 57,920).

Malformations.—It has been ascertained that the human embryo goes through several changes of form in the course of its evolution, and that in a certain number of instances the evolution is arrested at some of the earlier forms; hence *spina bifida*, *hare-lip*, *nonclosure* of the *oval foramen*; and in consequence the life of the child cannot go on, or it is cut short at the end of a few years; thus 786 of the deaths in the year are referred to malformations of various kinds.

Premature birth and debility.—Many children are prematurely born, or possess little vitality, so that they expire in a short time after birth; and these cases, as well as some occurring at advanced ages, have generally been called debility in the registers; 18,943 have been registered as from premature birth or debility. Of this number 17,236 were infants; namely, 9801 males, 7435 females. The excess in the vital debility or prematurity of birth is striking in the males.

Atrophy.—Wasting and loss of substance, without any discoverable disease, is put down as the cause of 12,195 deaths; of which number 3080 are the deaths of boys, 2743 of girls, under *one* year of age. The decay of men after the age of 60 and under 70 has in numerous cases been set down as atrophy.

Old age.—But a large number of the deaths of persons of the age of 70 and upwards is set down as simply the result of old age, or that decay which is apparently as much a stage of human existence as growth. Thus, in the year's abstracts, 25,996 deaths were referred to age, including the deaths of 11,243 old men, and of 14,753 old women. As the aggregate deaths of persons of the age of 70 and upwards amounted to 57,416, it is evident that 31,420 of such deaths were referred to diseases of various kinds, including typhus, dropsy, mortification, cancer, consumption, apoplexy, paralysis, heart-disease, bronchitis, pneumonia, asthma, kidney-disease, and fractures.

V. DEATHS FROM EXTERNAL CAUSES (E.)

Fatal injuries of a peculiar character are inflicted by external agents of various kinds; and in some instances, as in deaths by drowning, by hanging, and by poison, the attention is directed apparently to the cause, which acts quickly, rather than to the peculiar morbid state, which is induced. 13,559 persons died of causes that are classed under this head.

There are five heads in this class to which a certain number of deaths are referred; namely, 289 to intemperance, 58 to privation, 553 to the want of breast-milk, 15 to neglect, and 52 to cold; as, however, many diseases of various kinds arise under the influence of the excess or of the privation of natural food or stimulants, of heat or of cold, these deaths are but a small proportion of the number that are indirectly or directly the result of such causes.

444 deaths were the result of poisoning, 2620 of burns and scalds, 1162 of hanging and suffocation, 2280 of drowning, 4433 of fractures and contusions, 586 of wounds, either gunshot or incised, and 1067 of other violence. Nearly 8 in every 10,000 of the people living died by violent causes in 1851.

Such is a brief and rapid survey of the causes of the deaths of 395,396 people in the year 1851.

I have the honour to be,

Sir,

Your very obedient and humble Servant,

WILLIAM FARR.

[The following Index furnishes a reference to the *Number* of each DISTRICT in the topographical arrangement adopted in the Tables of Abstracts contained in the Report, the numbers running consecutively from 1 to 623.* In forming the alphabetical arrangement the principle is adopted of placing compound names in the order in which they are pronounced: thus, East Ashford will be found under the letter E, and not under A, as Ashford, East.]

REPORT

TO

The Right Honourable SIR GEORGE GREY, Bart., G.C.B., Her Majesty's Principal Secretary of State for the Home Department, &c. &c. &c.

General Register Office,
30th August 1855.

SIR,

I HAVE the honour to submit to you the detailed Abstracts, for the year 1852, of the Marriages, Births, and Deaths, which have been already laid before Parliament in a compendious form.

TABLE I.—Estimated POPULATION, Number of MARRIAGES, BIRTHS, and DEATHS registered in England in each Year from 1838 to 1852.

Years ended Dec. 31st.	Estimated POPULATION in England in the Middle of the Years.*	MARRIAGES.	PERSONS Married.	BIRTHS (exclusive of Still-born).	DEATHS.	Excess of Births over Deaths.
1838	15,312,256	118867	236134	462787	242780	121027
1839	15,515,296	123106	246232	492274	239864	153360
1840	15,721,029	122665	245330	502308	239837	142616
1841	15,929,492	122466	244692	512156	243947	168211
1842	16,123,798	118635	237650	517739	246519	169220
1843	16,390,479	123618	247636	522335	244445	190890
1844	16,519,685	133349	264495	540763	250663	189920
1845	16,721,981	143743	287493	545381	260666	194155
1846	16,925,051	145684	291328	573635	260315	193810
1847	17,131,612	135645	271600	536665	253804	116661
1848	17,340,493	123390	276400	563059	263853	162286
1849	17,552,690	141863	283765	573129	244639	137250
1850	17,768,129	148744	295498	568423	266665	224427
1851	17,982,849	154906	308419	615845	266394	220469
1852	18,206,637	158783	317564	628012	267185	216677

* The Population has been deduced on the assumption that the annual rate of increase was uniform; viz. 1.220 per cent. in each of the 10 years 1841-51, and 1.236 per cent. in each of the 3 years 1838-40. For 1843 the increase of Population has been obtained by taking the excess of births over deaths in the four quarters ending June 30th, 1843.

TABLE II.—Proportion of MARRIAGES, BIRTHS, and DEATHS to the Population of England.

Years ended Dec. 31st.	To 100 Persons living.				The Number of Persons living.			
	MARRIAGES.	PERSONS MARRIED.	BIRTHS.	DEATHS.	To one Marriage.	To one Person Married.	To one Birth.	To one Death.
1838	.771	1.512	3.029	2.238	130	65	33	45
1839	.794	1.588	3.175	2.185	126	63	31	46
1840	.780	1.560	3.196	2.268	128	64	31	44
1841	.760	1.538	3.215	2.150	130	65	31	46
1842	.737	1.474	3.211	2.168	134	66	31	46
1843	.759	1.518	3.231	2.123	132	66	31	47
1844	.801	1.909	3.273	2.161	125	62	31	46

1846	.861	1.722	3.283	2.206	116	58	30	43
1847	.793	1.581	3.163	2.471	126	63	32	49
1848	.797	1.394	3.247	2.306	125	63	31	43
1849	.806	1.616	3.294	2.112	124	62	30	46
1850	.800	1.720	3.340	2.077	116	58	30	46
1851	.756	1.716	3.425	2.199	117	58	29	45
1852	.872	1.744	3.428	2.236	115	57	29	45
Mean	.808	1.616	3.237	2.235	124	62	31	45

NOTE.—By disregarding the decimal points the Table will show the proportion to every 100,000 persons living. A correction for increase of population has been made in calculating the above results.

The tables and the calculations are nearly of the same nature as those which were in my Report for the previous year.

1852 was a prosperous year; and the price of provisions was low until after harvest, when the price of wheat rose, and potatoes, which are consumed so largely by people of all classes and ages, became dear.

317,564 persons were married; 624,012 children were born; 407,135 deaths were registered, in the year 1852.

The rate of marriage was 1·744, of birth 3·428, of death 2·236 per cent. on the population; or, in other terms, but less exactly, there was *one* person married to 57 living, *one* birth to 29 living, and *one* death to 45 living. The rates of marriage and of birth greatly exceeded the average. The mortality was at the average rate.

MARRIAGES.

158,782 marriages were celebrated in the year. The increase in the rate of marriage is evident on comparing this number with the 118,067 marriages in 1838. The increase, it will be seen, in fourteen years is in the proportion of *four* to *three*. (Tables I., II.)

133,882 of the marriages were performed according to the rites of the Established Church; in 19,469, or one-seventh of the cases, marriage it is

TABLE III.—MARRIAGES registered in ENGLAND in each Year from 1841 to 1852.

1851	120108	6635	14313	7250	21563	13875	7737	24296	47439	69612	36186	44879
1852	130672	6696	14044	7370	21414	14066	8351	26078	48421	70772	36036	45921

stated was by licence or special licence, in 106,497 instances after banns, and in 3610 instances on superintendent registrars certificates. It is gratifying to observe that the clergy generally say whether the marriage was celebrated after banns or by licence; still in this year the point is left unrecorded in 4306 instances.

The marriages performed not according to the rites of the Established Church were 12,240 in the year 1844, and 24,900 in the year 1852; and of these numbers 2280 and 7479 were in the registered places of Roman Catholics. The Roman Catholic marriages have thus increased more than threefold in eight years. 7100 marriages took place in superintendent registrars offices. 57 marriages of Quakers, 247 marriages of Jews, were registered.

Conjugal condition of persons married.—130,672 marriages were contracted between bachelors and spinsters, 6696 between bachelors and widows, 14,044 between widowers and spinsters, and 7370 between widowers and widows; consequently 21,414 widowers and 14,066 widows married in the year. Of 100 men who married 13·49 were widowers, of 100 women 11·18 were widows.

Minors.—8551, or 5·39 per cent., of the men; 26978, or 16·99, of the women, were under age. The proportion of *minors* of both sexes was 11·19 per cent. in 1852, and 8·83 in 1841.

Signatures of the persons married.—48,421 men, and 70,772 women, signed the marriage register by making marks; in 36,636 instances both parties signed with marks; in 45,921 instances one party signed with a mark; and one wrote his or her name. It is gratifying to find that the proportional numbers of men and women who write their names is increasing; still, however, 30·5 per cent. of the men, and 44·6 per cent. of the women, sign with marks. And in several counties more than half of the women are unable to write their names. (Tables III., IV., V.)

Registered Places for Marriages.—At the close of the year 3340 buildings were registered for the solemnization of marriages. (Table VI.)

TABLE IV.—MARRIAGES. The Proportion per Cent. of *Minors* of each Sex, of Males and Females who signed the Register with Marks, and of Persons who were *Widowers* or *Widows*.

* The proportion of Widowers and Widows in the Year 1841 is for the September and December quarters only.

BIRTHS.

The births were in the proportion of 3·428 in 100 of the population. Of the 624,012 children whose births were registered 319,050 were boys, 304,962 were girls; so to every 1000 girls 1046 boys were born.

Seasons.—Births occur in all seasons and on every day of the year. In England during the year 1852 the number of births was on an average

TABLE V.—ENGLAND. MARRIAGES.—PROPORTIONAL NUMBER of MARRIAGES in the several Counties of England during the Year 1852; of Persons who signed their Names; of Persons not of full Age; and of the Re-marriages of Widowers and Widows.

1710 daily. We have only the means of showing in the present abstracts the quarterly variations in the rate of birth; which, taking the average rate as the unit (1'000), was 1'037 in the first quarter, 1'019 in the second quarter, '969 in the third quarter, and '974 in the fourth quarter of the year. The proportions vary in the several parts; thus in North Wales and in Monmouthshire, in the North Riding and the East Riding of Yorkshire, the births in the winter quarter are below, in the spring quarter above, the average. (Table VIII.)

Births out of Wedlock.—42,482 children were born out of wedlock, or 6·8 in 100 children born. One in 15 children of England and Wales

births consisted of *three boys*, in 10 cases of *three girls*, in 7 cases of *two boys and one girl*, in 5 cases of *two girls and one boy*. It is evident that in these cases the boys preponderate, and that the cases in which the children are of the same sex occur in undue proportion; for, instead of being in the proportion of 15, 10, 7, and 5, the above numbers would have been in the proportion of 3, 3, 1, and 1, had the theoretical probabilities not been interfered with by a natural law tending to create children of the

same sex at one birth. Thus, in accordance with the doctrine of chances, the cases of twins in which both children are boys, or both are girls, should be equal in number to the cases in which the children are of different sexes; instead of which, in 3587 instances the children were of the same sex, and in only 2159 of different sexes.

DEATHS.

Sex.—407,135 deaths were registered in the year 1852, and of that number 207,042 were males, 200,093 were females. Thus to every 100 females, 103 males died; but the corrected relative mortality is 100 females to 108 males, inasmuch as the number of females living in England is greater than the number of males. The range in the relative mortality of the two sexes was 106 to 109 in the 15 years.

The annual rate of mortality among males was 2·320, females 2·156, on every 100 of each sex living; the average rates during 15 years having been 2·315, and 2·154. The mortality of the whole population of both sexes was at the rate of 2·236 per cent. in 1852; while on the average of the 15 years the mortality was 2·235. (Table X.)

1851	2·276	2·124	106	107
1852	2·230	2·156	108	108
Average of 15 years, 1838-52	2·315	2·154	108	108

The Table may be read thus:—In the year 1838 to every 100 males living there were 2·335 deaths of males; to every 100 females living there were 2·123 deaths of females; and to every 100 females who died there were 105 deaths of males. The last column shows the relative mortality of males and females; and that out of equal numbers living the deaths of males were 109 to every 100 deaths of females in 1838.

Age and sex.—The mortality of males under 5 years of age was at the rate of 7·500 per cent., of females 6·445. Thus the excessive mortality of males at this early period of life, reduces the excessive number of boys born nearly to an equality with the number of girls. At the age 10–15 the mortality of males was only ·520, of females ·537. After this age the mortality-rate increases gradually up to the age of 55, and then more rapidly; thus at the age 65–75 the mortality-rate of males was 6·284, of females 5·708; at the ages 75–85 the mortality-rate of males was 14·161, of females 13·177 per cent. The mortality at this advanced stage of life becomes so great, that it surpasses the mortality in infancy.

The mortality of 1852 was *above* the average at the ages under 5 years, and in puberty (10–15), but at all other ages the mortality was *below* the average. This is probably referable to the prevalence of epidemical diseases affecting particular ages of life. (Table XI.)

These diseases, and the other causes of death in the year, are enumerated in the letter of Dr. Farr, which will be found in the Appendix.

85–	27·655	28·434	27·569	30·350	32·104	27·623	26·028	25·923	26·337	27·427	28·147
85 & upwds.	46·679	44·618	42·036	52·209	53·220	46·816	43·333	43·927	45·017	40·676	45·752

The Table may be read thus:—Of 100 Males living of the age of 35 and under 45, 1·218 died in 1843, 1·225 in 1844, 1·202 in 1845, and so on for other years, a correction for increase of Population having been made for each Age at each Year; and the deaths of persons whose ages were not returned have been distributed proportionally over each age. The data upon which this Table is constructed appear in this or have appeared in the previous Reports, and in the Census Report. See Census Report 1851; and the Annual Reports of the Reg. Gen., particularly the 8th and 9th.

Seasons.—Deaths take place every day in England, and the deaths on an average were 1115 daily in the year 1852. The respective numbers in each of the four quarters of the year did not differ considerably; for they were in the proportions of 1·045, ·989, ·986, and ·980, the average being taken as a point of comparison at 1·000. (Tables XII, XIII.)

The mortality-rate in England is now generally highest in the winter and lowest in the summer quarter; and when this order is reversed the cause is some epidemic, such as cholera, which is most fatal in the hot season of the year.

The rate of mortality exhibits a much more extensive range than the rate of birth; for it was as high as 1·201 in the winter quarter of 1848, and 1·227 in the summer quarter of 1849; as low as ·917 in the winter quarter of 1846, and ·877 in the summer quarter of 1848.

Great fluctuations almost invariably imply a high rate of mortality, and such an equality in the visitation of mortality as is recorded in this year may be always regarded as a favourable auspice.

I have the honour to be,

Sir,

Your faithful Servant,

GEORGE GRAHAM,

Registrar-General.

* The Registration Counties consist of groups of entire Registration Districts; which Districts are, in general, identical with the Poor Law Unions. As the principle adopted has been to place a District or Union which extends into more than one County with the County in which the principal town or the greater part of the population is located, the limits of the Registration Counties differ more or less from the boundaries of the Counties proper.

MARRIAGES, BIRTHS, and DEATHS registered in the Year 1852.

* The Districts are collections of contiguous Parishes or Places combined for purposes connected with the Registration of Births, Deaths, and Marriages; and are generally identical with the Poor Law Unions of the same names. The Districts, 624 in number, are arranged topographically under the Registration Counties.

† For a table of the Deaths in the principal Public Institutions situated in the Districts of London see page 85.

Note.—Wherever the minus sign is prefixed to the number in the column headed "Excess of Births over Deaths," it denotes that the Births in the District, instead of exceeding the Deaths, were, in fact, less than the Deaths to the extent stated.

II.—SOUTH EASTERN COUNTIES.—MARRIAGES, BIRTHS, AND DEATHS, 1852—DISTRICTS—continued.

NOTE.—The Sub-districts are sub-divisions of the Districts, and comprise the Parishes or Places in which the Births and Deaths are registered by Registrars severally appointed for that purpose.

The letter W denotes that the Sub-district contains within its limits a Workhouse belonging to the District or Union; w indicates that a Workhouse belonging to another District or Union is included.

Wherever the minus sign (-) is prefixed to the numbers given in the Column headed "Excess of Births over Deaths," it denotes that the Births in the Sub-district, instead of exceeding the Deaths, were, in fact, less than the Deaths to the extent stated.

The Excess of Deaths over Births in this Sub-district is attributable to the mortality in the Charing Cross Hospital.

For the number of Deaths in the Hospitals, Workhouses, and other principal Public Institutions in London, see page 85.

LETTER from Dr. FARR to the REGISTRAR GENERAL on the CAUSES OF DEATH in 1852 - - - - -	65—70

APPENDIX.

EXTRACTS

FROM THE

QUARTERLY RETURNS

OF

MARRIAGES, BIRTHS, AND DEATHS

Issued in the Year 1852.

NOTE.—*The numbers of Births and Deaths published in these Returns were furnished by the Registrars at the end of each Quarter, when they could not be subjected to revision at the General Register Office; they will be found therefore to differ in some instances from the more correct numbers now given in the preceding Abstracts.*

OF

THE MARRIAGES, BIRTHS, AND DEATHS IN ENGLAND.

THIS Return comprises the BIRTHS and DEATHS registered by 2190 Registrars in all the districts of England during the Winter quarter ending March 31st, 1852; and the MARRIAGES in more than 12000 churches or chapels, about 3228 registered places of worship unconnected with the Established Church, and 623 Superintendent Registrars' offices, in the quarter that ended December 31st, 1851.

The Return of Marriages is not complete; but the defects are inconsiderable, and approximative numbers have been supplied from the records of previous years.

The general results of the Return are satisfactory; the marriages exceed the average number, the births are above, the deaths are below the average of the kingdom.

MARRIAGES.

99936 persons were married in the last quarter of the year ending December 31st, 1851. In England the greatest proportion of marriages is always celebrated in the months of September, October, November, after harvest; and the numbers in the last season not only exceeded the marriages in the previous quarters of 1851, but those in the corresponding quarters of previous years. Allowing for increase of population, the proportion of marriages was slightly less than in the autumns of 1845 and 1850, but greater than in any other autumn since 1842. One in 58 of the

MARRIAGES, BIRTHS, and DEATHS, returned in the Years 1840-52 and in the Quarters of those Years.

* The numbers up to 1849 have appeared in the Annual Reports.

† ERRATUM in last Quarterly Return, No. 12, page 1. For 395933 deaths in 1851, read 39533.

persons living was married in 1851; or there was *one marriage* to every 117 persons living.

The marriages increased chiefly in London, Cornwall, Gloucestershire, Worcestershire, Warwickshire, Rutlandshire, Nottinghamshire, Lancashire, and North Wales. They declined in the Southern, South Midland, and Eastern counties; in Wiltshire and Devonshire, Cumberland, Westmoreland, and Monmouthshire. The increase was most striking in Reigate, Croydon, Maidstone, East Ashford, Faversham, Brighton, Falmouth, Taunton, Bristol, Gloucester, Wolverhampton, Birmingham, Derby, Preston, Hull, Durham.

The rate of marriage was high but stationary, or slightly declining, in Liverpool, Manchester, Leeds, and Sheffield.

BIRTHS.

The births of 161776 children, born alive, were registered in the months of January, February, and March 1852. The number greatly exceeds the average of the season, which is generally the most prolific of the year. So many births were never registered before in the same time. London, the West Midland counties, Yorkshire, and the Northern counties exhibit the greatest excess over their ordinary average.

INCREASE OF POPULATION.

As the births registered were 161776, the deaths 106682, an addition is made to the population in 3 months of 55094 persons. This is the natural increase. During the same period an army of 57874 emigrants sailed from the ports of the United Kingdom at which there are government emigration officers; 51999 of

† The Table may be read thus, without reference to the decimal points:—In the year 1848, to 100000 of the population of England there were 798 marriages, 3249 births, 2307 deaths registered.—The annual rates of marriage in each of the 4 quarters were ·661, ·805, ·755, and ·961 per cent.; the rates of death 2·794, 2·313, 2·006, and 2·108 per cent. In reading the population on the first line add 3 ciphers (000). The 3 months January, February, March, contain 90, in leap year 91 days; the 3 months April, May, June, 91 days; each of the 2 last quarters of the year 92 days. For this inequality a correction has been made in the calculation. It was assumed that the population increased at the same uniform rate as the females increased in 1841–51, namely 1·212 per cent. annually, or ·303 quarterly. So that $r = .0013073$.

them sailed from three English ports; 8438 from London, 1798 from Plymouth, and 41763, comprising an indefinite number of the Irish people, from Liverpool. 1399 emigrants sailed from Glasgow and Greenock; 4476 from Irish ports.*

The average price of wheat during the 3 months was 40s. 10d., or 4s. higher than it was in the last three months of 1851, when more wheat was sold. The quantities of wheat and wheat flour entered for home consumption at the chief ports of Great Britain rapidly diminished in the three last periods from 91040 to 47986 and 27540 quarters weekly. The price of potatoes at the waterside market, Southwark, was 70s. a ton, and ranged from 3s. to 4s. a hundred weight. The average price of mutton by the carcase ranged from 3½d. to 5½d.; and has scarcely varied for 9 months. The price of the inferior beef rose from 3d. to 3½d. The average price of consols was 97½.

The AVERAGE PRICES of Consols, Wheat, Meat, and Potatoes, also the AVERAGE QUANTITY of Wheat sold and imported weekly, in the Three last Quarters ending March 31st, 1852.

† Note.—The total number of quarters of wheat sold in England and Wales for the 13 weeks ending Sept. 30th was 971,276; for the 13 weeks ending Dec. 31st, 1,423,582; for 13 weeks ending March 31st, 1,241,921. The total number of quarters entered for Home Consumption was respectively 1,183,523; 671,803; and 358,024; the second total, however, embraces the returns of 14 weeks. The price of potatoes in the quarter ending September refers to the period during which the old supply continued.

STATE OF THE PUBLIC HEALTH.

The mortality of England is highest in the winter quarter. Notwithstanding the peculiarities of the weather, the mortality in the past winter has been considerably below the average of the season. The annual rate of mortality in the winter quarter of 1852 was 2.364 per cent., which is less by 0.111 than the mean annual rate of mortality in the 10 previous winters. To every 22 deaths in previous winters, after allowing for increase of population, there were 21 deaths in the past winter, during which, as Mr. Glaisher has shown in his valuable account of the meteorology, the temperature was 3 degrees above the average.

The health of the districts comprising chiefly small towns and country parishes was considerably above the average standard; the towns exhibited less improvement, and lost a fourth part more of the population by death than the country districts.

* From a return with which the Registrar General has been favoured by the Emigration Commissioners.

In LONDON 14,592 deaths were registered in the three months of January, February, and March; 14,481 in the thirteen weeks ending March 27th. Small-pox, scarlatina, and hooping-cough prevailed to a considerable extent. Influenza, bronchitis, and pneumonia were fatal to 40, 1,422, and 908 persons; whereas the deaths in the previous winter of 1851 from the same diseases were 205, 1612, and 1244. Consumption, on the other hand, was more fatal in the two last than it was in the two previous winters. Scurvy and purpura were only fatal to 10 persons. 527 persons died in the thirteen weeks of typhus. 62 women died of metria or puerperal fever; and 62 of other diseases incidental to child-bearing. 120 cases of erysipelas are recorded. Cancer is an example of great regularity in the mortality some diseases cause; in the five last winters the deaths from cancer were 222, 231, 213, 236, and 231. Deaths from diseases of the nervous system remained very uniformly the same. Diseases of the heart are returned in increasing numbers; to that cause 425 deaths were referred in 1848, and 603 in 1852. The increase is probably due to the advancement and diffusion of medical knowledge; for many of these deaths would in former years have been referred to dropsy. Nephria, or Bright's disease, has increased from the same cause. One of the most singular facts in the return is the increase of *deaths* by carbuncle; which from an average of about 2 rose to 17 in the quarter. 19 deaths were directly ascribed to intemperance, 29 to delirium tremens, 12 to privation, 64 to the want of breastmilk, 4 to cold, 23 to poison, 88 to burns and scalds, 76 to hanging and suffocation, 72 to drowning, 161 to fractures and contusions, 35 to wounds, and 11 to other violence.

SOUTH-EASTERN DIVISION.—The mortality has declined sensibly in Berkshire and Hampshire. In the counties of Surrey, Kent, and Sussex little or no improvement is visible. The mortality in the districts of Canterbury, Thanet, Eastry, Dover, Romney Marsh, Brighton, Chichester, Portsea Island, the Isle of Wight, and Reading was greater than in corresponding quarters of previous years. Scarlatina, small-pox, and bronchitis have prevailed in several districts.

In the **SOUTH-MIDLAND DIVISION** the mortality in Northamptonshire increased, while it decreased in all the other counties, and more particularly in Hertfordshire, Bedfordshire, and Cambridgeshire. Measles and small-pox occurred in some districts. Scarlatina and measles were fatal to children in Northampton. In the Luton sub-district 189 births and only 77 deaths were registered. "The deaths," says the Registrar, "are a little below the average. I believe it may be accounted for by the absence of any general epidemic, and the full employment of the

“labouring population, who are thus enabled to procure a good supply of the necessaries of life.”

The health of Cambridge continues unusually good, and the mortality in the last quarter was, as has not hitherto been the case, lower than the mortality of Oxford.

Districts of	Population in 1851.	Deaths in the Winter Quarters of 5 last years.				
Cambridge . .	27803	194	153	155	158	121
Oxford . . .	20173	113	111	94	146	115

The Registrar of St. Andrew, Cambridge, remarks that “the deaths are 10 less than in this period last year. Several are those of persons nearly 90 years of age, and several those of very young children. I consider there are very great improvements in the sanatory arrangements of the town, and a great increase of medical skill in operation upon the increasing population. Much credit is due to the medical profession for early information of nuisances, and to the Corporation for prompt measures to remove them.”

In the EASTERN DIVISION, the mortality was near the average in Essex and below the average in Norfolk.

It is gratifying to find that in several cases the better health of the population is ascribed to sanatory measures. The Registrar of West Wymer, Norwich, says : “My sub-district is unusually healthy, and there is no prevalent epidemic at this time. I am of opinion that the sanatory measures which have lately been carried into effect have had a considerable share in producing this result ; at the same time much requires to be done, and particularly as regards the low lodging-houses of this city, which ought to be immediately placed under proper regulations by the sanatory committee.”

The mortality of the counties in the SOUTH-WESTERN DIVISION differs little from the average, but exceeds it slightly. Scarlatina, small-pox, measles, or hooping-cough prevailed in many districts of Wiltshire, Dorsetshire, Devonshire, Cornwall, and Somersetshire. The Registrar of Moretonhampstead notices that there were 21 births and 16 deaths in his district. He ascribes a decrease of 12 births to “emigration, and the want of employment in agricultural districts, which causes the inhabitants to leave for larger towns.” In Plymouth, East Stonehouse, and Stoke Damerel the mortality was exceedingly high ; the deaths in several sub-districts exceeded the registered births. Measles, scarlatina, small-pox, and fever prevailed to a great extent in this low region. In Crowan, Helston, the births were increased by the influx of labourers, for whom there was a great demand. In Glastonbury, Wells, the village of Street has a manufactory for shoes, slippers, mats, &c., in consequence of which the population, says the Registrar, “increases, and consists principally of young men and women, who get married ; hence arises an increase of births over the average.” The decrease of deaths in Redruth, Cornwall, is “mainly attributed to the cheapness of provisions and the full employment of the population.” Small-pox was brought to Bath by tramps from Keynsham, and would, it is believed, have spread rapidly, “had not vaccination been immediately resorted to, and urged upon parents without delay, which checked it in time.”

Small-pox has prevailed very extensively ; and the provision of gratuitous vaccination for the people, by the legislature, appears to be insufficient to stem its terrible progress. Several of the Registrars, who witness its effects, urge that many lives would be annually saved,—sickness, misery, and deformity prevented,—if vaccination were enforced by law. The grounds of objection, independently of negligence and apathy, lie generally in the ignorance, often in the prejudices of the parents. These prejudices can be best and most permanently overcome by the persuasion and argument of zealous vaccinators, fortified as they will be by the experience of the neighbourhood. and such facts as the following, which cannot be too generally known :—

"One extraordinary case," says the Registrar of Tardebigg, Bromsgrove, "which shows most strongly the advantages and importance of vaccination, has occurred in my district:—A man residing in a rural part of this neighbourhood had five children, varying from 3 to 10 years of age; three of these had been vaccinated, the other two had not. The eldest was attacked by small-pox, but had it so lightly that he was confined scarcely a single day; the two next were not affected at all with the disease—these were the three that had been vaccinated. The two youngest were seized with small-pox almost simultaneously, both died and lay dead in the house at the same time,—these were the two that had not been vaccinated."

Small-pox and typhus raged to a great extent in Nuneaton. Five of the deaths in Bulkington occurred near a place where there was a large pool of stagnant water; two of them occurred in one family, two in another, and one in a third. The Local Board of Health has now caused the pool to be drained. It would be a great progress if, satisfied with the experience of Nuneaton, the local authorities would drain all such large stagnant pools of water in the country at once, before the lives of the people living in their neighbourhood are destroyed.

In the NORTH MIDLAND DIVISION the health of Lincolnshire, Nottinghamshire, and Derbyshire was better than usual. A mysterious case, which requires further investigation, is described minutely in a statement addressed to the Registrar of East Retford, which will be found in the notes. Derby suffered from small-pox.

In Lancashire and Cheshire the mortality shows a disposition to rise. Diseases of the respiratory organs prevailed in Liverpool; where two deaths from cholera, one after 3 days', and one after 12 hours' illness, were recorded. One death from cholera occurred also in Lancaster, which experienced much sickness. Typhus is at present prevalent in Slaidburn, Clitheroe; 3 deaths out of 4 cases happened in one house, a low-thatched building, almost without ventilation, and partly under ground. In well-ventilated situations the disease has assumed a milder type.

The catastrophe at Holmfirth, Huddersfield, is noticed by the Registrar, who recorded 124 births and 97 deaths in the quarter:—"On the morning of the 5th of February, at 1h. 15m. A.M., the reservoir at Billberry in this district burst, and before 2 o'clock 81 (as nearly as I am able to ascertain) human beings perished in the rushing torrent. Of these 47, viz., 22 males and 25 females, were registered in this district; 2 bodies are yet wanting."

Leeds and Hunslet were less healthy than usual. The births and deaths in Sheffield exceeded the average. The population is rapidly increasing. Vaccination has been greatly neglected, and in consequence small-pox has been prevalent and fatal.

In the NORTHERN DIVISION the mortality exceeded the average, in Durham, Northumberland, and Westmorland. At Bedlington, Morpeth, ten persons were labouring under small-pox at the same time in one house; in another, 4 had typhus, of whom 2 died. Scarlatina was exceedingly fatal in Kendal.

The deaths in Monmouthshire, North Wales, were below, in South Wales above, the average of corresponding quarters. Scarlatina prevailed in the lower part of Shirenewton, Chepstow, where the land is low and marshy.

In Cardiff the births are considerably above the average. The deaths also exceed the average. The Registrar remarks that "the rapid increase of the population of Cardiff, and the influx of labourers and their families induced by the large works in progress in that town, may in part account for this excess. Typhus has much prevailed, and has particularly affected the healthy labourers coming into town in search of work, and going into the over-crowded and in many cases already infected lodging-houses. The easterly winds during the last 6 weeks have not been favourable to health. The population of the town of Cardiff has increased 60 per cent. since the census of 1841."

MARRIAGES Registered in the Quarters ending December 31st, 1847-51; BIRTHS and DEATHS Registered in the Quarters ending March 31st, 1848-52, in the Divisions, Counties, and Districts of England.

* In the present publication the "Counties" (which may be denominated *Registration Counties*) comprise groups of entire Registration Districts, or Poor Law Unions; and when a District runs into two or more Counties, it has been placed with the County in which the greater part of the Population is situated: hence these groups of Districts rarely, if ever, correspond with the strict boundaries of the respective Counties named.

A TABLE OF THE DEATHS IN LONDON FROM ALL CAUSES,

Registered in the March Quarters of the 5 Years 1848 to 1852.

NOTE.—The first 18 weeks of 1853, constituting the March quarter in the Weekly Tables of Mortality, ended March 27th, in which 14461 deaths were registered. In the quarter ending March 31st (p. 7), 14593 deaths were registered.

* Under the head of sudden deaths are classed not only deaths described as sudden, of which the cause has not been ascertained or stated; but also all deaths returned by the coroner in vague terms, such as "found dead," "natural causes," &c. &c.

† In the years previous to 1846, "worms" and "infantile fever" were classed together. The former, of rare occurrence, is now placed to Diseases of stomach, &c.

On the Meteorology of England, South of Scotland, and parts of Ireland, during the Quarter ending March 31st, 1852. By JAMES GLAISHER, Esq., F.R.S., Sec. of the British Meteorological Society.

Till February 9th the mean daily temperatures were above their average values, at times to the amount of 10° , 11° , and 12° ; the average daily excess for the period was $4^{\circ} \cdot 4$; the direction of the wind was chiefly S.W., and rain fell on 23 days. From February 10th to the end of the quarter the temperature was generally below its average value, though seldom to a large amount, the average daily defect was $1^{\circ} \cdot 1$; the direction of the wind was mostly N.E., the sky cloudless, and rain fell on 6 days only, and to small amounts. During the period from February 10th to March 22d the reading of the barometer was almost continuously very high; on March 6th the reading reduced to the level of the sea was as high as $30 \cdot 8$. The weather from the middle of February was distinguished by being unusually fine, cold, the almost total absence of rain, and the air dry and harsh. Vegetation has been subjected to a temperature below 32° on 70 nights during the quarter.

The mean temperature of the air at Greenwich for the quarter ending February, constituting the 3 winter months, was $41^{\circ} \cdot 1$, being $4^{\circ} \cdot 2$ above the average of 80 years.

NOTE.—In reading this table it will be borne in mind that the sign (—) minus signifies below the average, and that the sign (+) plus signifies above the average.

Thunderstorms occurred, or thunder was heard and lightning seen, on 9th January at Grantham; on the 14th at Holkham; on the 22d at Jersey, Guernsey, Helston, and Falmouth; on the 24th at Aylesbury; on the 25th at Helston, Falmouth, Hartwell Rectory, and Whitehaven; on 3d February at Glasgow; and on the 8th at Guernsey and Highfield House.

Thunder was heard, but lightning was not seen, on 16th January at Roscommon; on the 25th at Truro; on the 30th at Dunino; and on 21st March at Whitehaven.

Lightning was seen, but thunder was not heard, on 6th and 9th January at Aylesbury; on the 11th at Helston; on the 22d at Helston and Norwich; on the 25th at Rose Hill, Thame, Linslade, and Cardington; on 8th February at Torquay and Cardington; on the 18th at Cardington, Highfield House, and Hawarden; and on the 25th at Hatton.

Hail fell on the 3d January at Holkham and Highfield House; on the 4th at Hartwell Rectory and Hawarden; on the 7th at Highfield House and Stonyhurst; on the 9th at Guernsey, Helston, Falmouth, Uckfield, Hartwell Rectory, Grantham, and Hawarden; on the 11th at Thame and Whitehaven; on the 15th at Roscommon; on the 16th at Whitehaven; on the 21st at Ennis and North Shields; on the 22d at Jersey, Guernsey, Falmouth, Uckfield, Highfield House, Hawarden, Longford, and Strokestown; on the 23d at Jersey, Falmouth, and Ennis; on the 24th at Ennis; on the 25th at Hatton, Ennis, Stonyhurst, and Whitehaven; on the 26th at Guernsey and Ennis; on the 27th at Falmouth; on the 29th at Ennis; on the 30th at Ennis and Strokestown; and on the 31st at Hawarden; on the 3d of February at Jersey and Whitehaven; on the 6th at Thame, Bedford, and Hawarden; on the 7th at Hatton; on the 9th at Jersey, Guernsey, Helston, Falmouth, Torquay, Hartwell Rectory, Highfield House, and Hawarden; on the 10th at Uckfield, St. John's Wood, Highfield House, and North Shields; on the 16th at North Shields; on the 17th at St. John's Wood; on the 18th at Guernsey, Falmouth, Torquay, Uckfield, Hartwell Rectory, and Hawarden;

on the 19th at Jersey, Guernsey, Helston, Falmouth, Torquay, and Hawarden; on the 20th at Falmouth; on the 22d and 27th at Truro; and on the 28th at St. John's Wood, Bedford, Highfield House, North Shields, and Dunino; on the 1st March at Cardington, Bedford, and Hawarden; on the 2d at Holkham and North Shields; on the 3d at Highfield House and Wakefield; on the 9th and 19th at Truro; on the 24th at North Shields; on the 25th at Highfield House and North Shields; on the 26th at Hawarden and North Shields; and on the 27th at Durham and Dunino.

Fog was prevalent on the 3d January at Hartwell Rectory; on the 10th and 11th at Durham; on the 12th at Cardington and Durham; on the 13th at Durham; on the 14th at Hartwell Rectory and Durham; on the 18th at Hartwell Rectory and Linslade; on the 19th at Hartwell Rectory; on the 20th at Durham and North Shields; on the 26th at Hartwell Rectory; on the 27th at Linslade; on the 29th, 30th, and 31st at Durham; on the 14th of February at Hartwell Rectory; and on the 21st at Durham; on the 7th March at Durham and North Shields; on the 8th at Gainsborough, Durham, and North Shields; on the 9th at Hartwell Rectory, Gainsborough, and North Shields; on the 10th at Cardington, Gainsborough, and North Shields; on the 12th at Durham; on the 18th at Hartwell Rectory and Durham; and on the 20th at Durham.

Aurora were seen on the 4th January at North Shields and Dunino; on the 17th at Durham; on the 20th at Falmouth; on the 21st at Aylesbury and Durham; on the 22d at Hartwell Rectory; on the 23d at Hatton, Oxford, Hartwell Rectory, Cardington, Grantham, Hawarden, Gainsborough, Durham, and Dunino; on the 25th at Hawarden, Manchester, Stonyhurst, Durham, and Dunino; on the 30th at Rose Hill, Thame, and North Shields; on the 31st at Dunino; on the 4th February at Highfield House; on the 15th at many places between the latitudes of 51° and 55° ; on the 16th at Dunino; on the 17th at Highfield House, Durham, and North Shields; on the 18th at many places between the latitude of 50° and 57° ; on the 19th at many places between the latitudes of 49° and 57° ; on the 20th at Helston and Norwich; on the 21st at Helston, Grantham, Highfield House, Gainsborough, Wakefield, Stonyhurst, Whitehaven, Durham, and Glasgow; on the 22d at Highfield House; on the 23d at Stonyhurst and Durham; on the 25th and 26th at Highfield House; on the 27th at Durham, North Shields, and Dunino; on the 28th at Aylesbury; on the 2d and 5th March at Highfield House; on the 20th at Stonyhurst; on 21st at Hawarden; on 25th at Stonyhurst; on 28th at Highfield House; and on the 31st at Stonyhurst. On many of these days the magnets have been greatly disturbed, and the needles of the electric telegraph have frequently been much deflected.

Snow fell on the 4th January at Highfield House and Hawarden; on the 8th at Aylesbury, Strokestown, and Dunino; on the 9th between the latitudes of 51° and 55° , and in Ireland; on the 10th at Highfield House, Hawarden, Roscommon, and York; on the 11th at Durham and Glasgow; on the 26th at Hawarden; and on the 31st at Thame, Linslade, and Hawarden; on the 3d February at Glasgow and Dunino; on the 9th, 10th, 12th, 13th, 14th, and 18th between the latitudes of 51° and 55° ; on the 19th at Jersey, Helston, Truro, Norwich, Holkham, and North Shields; on the 20th at Falmouth, Holkham, and Norwich; on the 21st at Ennis; on the 23d at Glasgow; on the 26th at St. John's Wood, Rose Hill, Aylesbury, Hawarden, North Shields, and Dunino; on the 27th at Thame, Hartwell Rectory, Aylesbury, and Linslade; on the 28th at Hartwell Rectory, Holkham, Stonyhurst, and North Shields; and on the 29th at Holkham and Dunino; on the 1st March at Rose Hill, Holkham, Whitehaven, Durham, and North Shields; on the 2d at Thame, Hartwell Rectory, Bedford, Durham, and North Shields; on the 3d at Norwich, Grantham, York, Durham, and North Shields; on the 23d at Norwich; on the 25th at Grantham, Durham, and North Shields; on the 26th at Uckfield, Thame, Grantham, Highfield House, Manchester, Wakefield, Stonyhurst, Durham, and North Shields; on the 27th at Grantham, Highfield House, Manchester, Wakefield, Stonyhurst, Durham, North Shields, and Glasgow. These falls have generally been very small in amount.

Rain at Truro on the 3d of January was 1.0 in.; on the 13th was 1.0 in.; on the 22d was 0.6 in.; and on the 25th was 0.6 in.; on the 9th of February was 0.6 in.; and on the 29th of March was 0.7 in. At Thame on the 13th of January was 1.1 in. At Rose Hill on the 12th of January was 1.2 in.; and between the 10th and 16th of January was 2.8 in. At Manchester on the 8th of January was 0.8 in.; on the 4th of February was 1.1 in.; and on the 8th was 0.9 in. At North Shields on the 10th of January was 0.5 in. At Glasgow on the 9th of January was 1.0 in.; and on the 22d was 1.1 in. At Dunino on the 8th of January, in 12 hours, was 1.7 in. At Ennis on the 22d of January was 1.0 in.; on the 24th was 0.8 in.; and in the month was 8.1 in.; on the 5th of February was 1.2 in.; and in the month was 4.4 in.; and in March the fall was 1.7 in. At Longford on the 3d of January 0.7 in.; and 4.7 in. was collected in the month. At Strokestown, Ireland, on the 3d of January the fall was 1.1 in.; and in the month was 5.1 in. At Roscommon on the 3d of January was 1.2 in.; on the 11th was 0.8 in.; on the 16th was 0.5 in.; on the 20th was 0.6 in.; on the 21st was 2.0 in.; on the 30th was 0.5 in.; on the 31st was 0.7 in.; and the whole fall in the month was 12.9 in.

The mean reading of the barometer in February exceeded that in January at all places, the difference increasing with increase of latitude; that in March was either less or of nearly the same value as in February at extreme southern places, but was greater at all other stations, the largest differences occurring at northern latitudes. The difference of mean reading between January and March at southern places was about 0.2, whilst at northern places it was as large as 0.7 and 0.8 inch.

At Nottingham the young wheat looks well. Other grain crops have been sown favourably. The spring is very backward. Grass has not commenced growing. There is a good promise of all kinds of fruit.

The mean of the numbers in the first column is 29.741 inches, and it represents that portion of the reading of the barometer due to the pressure of air; the remaining portion, or that due to the pressure of water, is 0.227 inch; the sum of those two numbers is 29.968 inches, and it represents the mean reading of the barometer for the quarter at the level of the sea.

The highest readings of the thermometer in air were 74° at Manchester and Uckfield, and 72° at Uckfield. The lowest readings were 17° at Uckfield, and 18° at Aylesbury. The least daily ranges of temperature took place at Torquay and Whitehaven; and the greatest at Aylesbury and Uckfield.

Rain fell on the least number of days at Rye, Thame, York, and Enfield; and on the greatest number at North Shields, Wakefield, Linslade, Helston, and Glasgow. The least falls took place at Durham, Whitehaven, York, and Gainsborough, and the mean amount at those places is 3.3 inches. The largest falls occurred at Stonyhurst, Glasgow, Truro, Falmouth, and Helston, and their average was 11.7 inches.

QUARTERLY METEOROLOGICAL TABLE for different PARALLELS of LATITUDE.

PARALLELS OF LATITUDE, &c.	WIND.										RAIN.							
	General Direction.										Mean Amount of Cloud. Number of Days on which it fell.							
	Mean Temperature of the Air.	Mean of Highest Readings of the Thermometer.	Mean of Lowest Readings of the Thermometer.	Average Daily Range of Temperature.	Average Monthly Range of Temperature.	Average Quarterly Range of Temperature.	Mean Temperature of Evaporation.	Mean Temperature of the Dew Point.	Mean Amount of Cloud.	Average Number of Days.	Average fall.	Mean Weight of Vapour in a cubic foot of Air.	Mean additional Weight required to saturate a cubic foot of Air.	Mean degree of Humidity.	Mean whole Amount of Water in a vertical column of Atmosphere.	Mean Weight of a cubic foot of Air.	Mean Height above the Sea level.

In the formation of this Table the results from Jersey and Guernsey have not been combined, on account of the great difference in the ranges of temperature between these two places. For the same reason, those from Rye and Ventnor have not been combined. The former place has a S. and S.E. exposure, with sand and chalk; the latter has a N. and E. exposure, and a clay soil.

MONTHLY METEOROLOGICAL TABLE FOR THE QUARTER ENDING MARCH 31st, 1852.

The Observations have been reduced to Mean values, and the Hygrometrical results have been deduced — from Glaisher's Tables.

NAMES OF STATIONS AND OBSERVERS.	Year and Month.	Mean Pressure of Air and Water.		Mean of Barometer Readings in the Month.		Mean.		Temperature of the Air.				Mean Temp. perature of the Air.		Wind.	Mean Amount of Cloud.		Mean Weight of Vapour in a cubic foot of Air.		Mean Humidity.		Mean whole Amount of Water in a vertical column of Atmosphere.		Mean Weight of a cubic foot of Air.	
		in.	in.	in.	in.	From Day to Day.	From Month to Month.	Highest.	Lowest.	Range in the Month.	Mean of all the Month.	Highest.	Lowest.		Direction.	Amount in fall.	Number of Days it fell.	Weight of Vapour in a cubic foot of Air.	Additional Weight required to saturate a cubic foot of Air.	Mean Humidity.	Mean whole Amount of Water in a vertical column of Atmosphere.	Mean Weight of a cubic foot of Air.

The position of the instruments at Ryde and at Ventnor were examined by Mr. Glaisher during the past quarter. Chichester is not known, and no further use is made of these readings. The field of February rain is mentioned as having fallen on one day only, which is evidently erroneous. The readings of the barometer have been reduced by 0.136 for assumed index error. Royal Observatory 1.—The form of instrument adopted during the past quarter for maximum temperature is that of Negretti and Zamboni, which is found to act admirably.

Year 1882.	Month.	Air and Water.		Mean Pressure of Barometer in the Month.	Temperature of the Air.				Mean Temperature of the Air.		Wind.	Amount of Rain.	Mean Weight of Rain.	Additional Weight required to saturate a cubic foot of Air.	Mean Humidity.	Mean whole Amount of water in a vertical column of Atmosphere.	Mean Weight of a cubic foot of Air.
		At or near Reading.	At or near Surface.		Highest.	Lowest.	Range in the Month.	Mean of all the Months.	Mean Daily.	Evaporation.

[illegible]

OF

THE MARRIAGES, BIRTHS, AND DEATHS IN ENGLAND.

THIS Return comprises the BIRTHS and DEATHS registered by 2190 Registrars in all the districts of England during the Spring quarter ending June 30th, 1852; and the MARRIAGES in more than 12000 churches or chapels, about 3228 registered places of worship unconnected with the Established Church, and 623 Superintendent Registrars' offices, in the quarter that ended March 31st, 1852.

The Return of Marriages is not complete; but the defects are inconsiderable, and approximative numbers have been supplied from the records of previous years.

The general results of the Return are not unsatisfactory; the marriages exceed the average number, the births are above, the deaths are but slightly above the average of the seasons.

MARRIAGES.

The marriages in the quarter ending March 31st were 32933, consequently in the three months 65866 persons were married; this slightly exceeds the numbers in the corresponding quarter of 1851, and is 10906, or one fifth part, more than the numbers married in the winter quarter of 1847.

MARRIAGES, BIRTHS, and DEATHS, returned in the Years 1840-52 and in the Quarters of those Years.

* The numbers up to 1849 have appeared in the Annual Reports.

The rate of marriages, after allowing for increase of population, is found to exceed the average of the season, and is only less than it was in the winter quarters of 1846 and 1851. The excess is distributed over nearly all the divisions of the country, but is most conspicuous in London, where the marriages in the winter quarter increased from 4377 in 1849 to 5576 in 1852. Marriages increased in St. George Hanover-square, and in Hastings, Brighton, Bath, Clifton, and other watering places. The marriages in the South-eastern division also increased in Surrey, Sussex, and Hampshire; decreased in Berkshire. There was an increase in Oxford and Cambridge; in Colchester and in Norwich; in Malmesbury and in Bradford (Wilts); also in Exeter; in Redruth, Cornwall, and in Bristol; in Hereford, Shrewsbury, and Stafford; in Wolstanton and Burslem among the Staffordshire Potteries. The marriages in Birmingham were 390, or 44 less than in the previous winter. In Leicester and Nottingham the number of marriages has for the last two years exceeded the average. The marriages in the last quarter were also over the average in the districts of Derbyshire, in Stockport, Liverpool, Prescot, Wigan, Warrington, and Manchester. In Sheffield marriages were numerous; in several districts of Yorkshire below the average. In the northern counties the marriages exceeded the average; in Wales they declined from 1930 in 1851 to 1804 in the winter quarter of 1852.

BIRTHS.

The births of 159136 children, born alive, were registered in the quarter ending June 30th, 1852. The same number, within two, was registered in the Spring quarter of last year. The proportion of births to the population since 1849 has greatly exceeded the average of previous years.

† The Table may be read thus, without reference to the decimal points:—In the year 1848, to 100000 of the population of England there were 798 marriages, 3349 births, 2307 deaths registered. The annual rates of marriage in each of the 4 quarters were ·661, ·808, ·785, and ·961 per cent.; the rates of death 2·794, 2·313, 2·005, and 2·108 per cent. In reading the population on the first line add 3 ciphers (000). The 3 months January, February, March, contain 90, in leap year 91 days; the 3 months April, May, June, 91 days; each of the 2 last quarters of the year 92 days. For this inequality a correction has been made in the calculation. It was assumed that the population increased at the same uniform rate as the females increased in 1841–51, namely 1·212 per cent. annually, or ·303 quarterly. So $\frac{1}{4} \times 1 \cdot 212 = \cdot 303$.

INCREASE OF POPULATION.

As the births in the quarter were 159136, the deaths 100813, the increase of population by natural causes is 58323. The increase in the previous quarter was 55094; in the corresponding quarter of 1851, 59499. In the quarter ending June 30th, 1852, 125,112 emigrants sailed from the ports of the United Kingdom at which there are emigration agents; 21890 sailed from Irish ports, 8687 from the Scotch ports of Glasgow and Greenock, and 94535 from English ports; namely, 3224 from Plymouth, 15304 from London, and 76007 from Liverpool.* It is known that a large but unknown proportion of the emigrants from Liverpool are of Irish origin; but the birthplace is not distinguished in the abstracts.

The price of provisions has varied little during the quarter; mutton and beef have however been a little cheaper than they were in the previous quarter; the price of wheat remains 40s. 10d. a quarter.

The AVERAGE PRICES of Consols, of Wheat, Meat, and Potatoes; also the AVERAGE QUANTITY of Wheat sold and imported weekly, in the Four last Quarters ending June 30th, 1852.

† Note.—The total number of quarters of wheat sold in England and Wales for the 13 weeks ending Sept. 30th was 971,276; for the 13 weeks ending Dec. 31st, 1,423,582; for the 13 weeks ending March 31st, 1,241,921; for the 13 weeks ending June 30th, 1,143,339. The total number of quarters entered for Home Consumption was respectively 1,183,523; 671,803; 358,024; and 710,780; the second total, however, embraces the returns of 14 weeks. The price of potatoes in the quarter ending September refers to the period during which the old supply continued.

STATE OF THE PUBLIC HEALTH.

The deaths in the Spring quarter were 100813, and the mortality was at the rate of 2.227 per cent. per annum, which is slightly above the average of the season. The excess of deaths was chiefly in the town districts, which still maintain their fatal preeminence over the country in destroying the lives of the population. The rate of mortality in the 506 districts, comprising chiefly small towns and country parishes, was 2.052; in the 117 town districts 2.436; so that out of the same population for every 4 deaths in the districts where the air and water are comparatively pure, there are nearly 5 deaths in London and our other towns, where all the sanitary arrangements are still left so imperfect that no improvement sensibly affecting the rate of mortality has hitherto been effected. In the three months

* From a return with which the Registrar General has been favoured by the Emigration Commissioners.

that have elapsed 48357 deaths have been registered in the town districts in the place of 40000, who would have died if the mortality had not exceeded 2 per cent. ; a standard of salubrity by no means high or unattainable. The season has been unusually cold, but food has been abundant, and from the notes of the Registrars generally it may be inferred that the people are actively employed.

In London 13173 deaths were registered in 13 weeks ; 2828 were ascribed to zymotic diseases, 443 to violence, privation, cold, or intemperance. 19 deaths were caused by poisons, 5 by laudanum, 3 by oxalic acid, 3 by essential oil of almonds, and 2 by prussic acid. Two of the deaths were ascribed to overdoses of laudanum ; the others were cases of suicide, and included 7 males, 4 females, of ages ranging from 18 to 70. One death was referred to Coult's oil, one to improper medicine, one to lead (a painter, age 36), and 3 to poisoning by accident. It is gratifying to observe that no case of death by arsenic has been registered in London. Of intemperance 20 died, 39 of delirium tremens, of privation 8, cold 5, burns and scalds 50, hanging, strangling, and suffocation 78, drowning 59, fractures and contusions 121, wounds, gunshot, and others 19, other violence 15.

Small-pox, scarlatina, hooping-cough, and typhus have prevailed to some extent, not only in London but in many parts of the country, and persons, with families, who are about to visit strange districts in search of health, will obtain information from the notes of the Registrar, or by local inquiries, which may prevent their exposure to local epidemics.

The following is one example, among many, of the efficacy of vaccination :

"TOTNES; *Buckfastleigh*. A case of virulent small-pox was introduced in March last into a "thickly-populated part of this town from Plymouth (where numbers have suffered, and its fatality "has been great) by clothes brought hither, and worn by a child about 5 years old, who took the "infection, but passed well through the disease. No other case appeared, the juvenile population "having been immediately vaccinated to the number of 400, or nearly a fifth of the whole."

Much good has already been effected by the enforcement of sanatory regulations in the lodging houses of the country. The Registrar of North Saint Giles says : "There is a decrease of one fifth in the deaths as compared with those of the "corresponding quarter of last year, which I attribute to the sanatory arrange- "ments enforced by the police, in making the landlords of the houses in Church- "lane and the Rookery whitewash and cleanse them, and not allowing above a "certain number of persons to sleep in the lodging houses."

The Registrars of Saint Ann, Nottingham, and of Cardiff in South Wales, have recorded similar good effects from the supervision of the low lodging houses.

Public attention has been before called in these periodical reports to the neglect and ill-usage of children in the large towns of the country, and more particularly in Lancashire, where the mortality of children under 5 years of age is twice as high as it is in the healthiest counties, and much higher than it is in London. This subject is so important that it is thought right to insert here a paper by Mr. Leigh, one of the Registrars of Manchester, who has described the circumstances of his own sub-district accurately, and, it is believed, of many of the other districts of the county by which he is surrounded.

OBSERVATIONS ON THE CAUSES OF DEATH, the MORTALITY, and the TREATMENT OF CHILDREN, in DEANSGATE Sub-district, MANCHESTER.—By JOHN LEIGH, Registrar, M.R.C.S., &c. &c.

Mr. Leigh formerly noticed, that in Manchester great numbers of the children died without ever being seen by a medical man; since the regulations respecting the certificates of death by qualified medical men there has been a considerable change. He now adds:—

The first thing that strikes me is the great increase of cases in which the causes of deaths were certified by medical men, the total number of uncertified cases being only 49 out of 252 deaths; and the next is the ever recurring fact, that nearly all the uncertified cases were those of children, viz., 41 out of the 49. At the first aspect one would be led to the inference that medical assistance was more generally sought for sick children now than was the case some years ago. This improvement, however, I am sorry to say, is more apparent than real. Since the establishment of the certificate system the poor have got an impression that the production of a medical certificate will facilitate the registration of their children, and still further will aid them in obtaining club money for the interment. The consequence is that though in the earlier stages of their diseases the children are still taken as generally as heretofore to druggists and unlicensed practitioners, yet when it becomes apparent that their condition is hopeless, and that they are dying, a rush is made to some medical man who, on death taking place, furnishes a certificate, stating to the best of his belief what was the disease under which the little sufferer laboured when brought to him. I am strongly of opinion that though a greater number of certificates are brought to the Registrar, there is no actual extension of medical attendance on the suffering children of the poor. It is only necessary to glance over the assigned causes of death among children to feel how true is this observation: 21 deaths from measles, 22 from pneumonia, 16 from diarrhoea, 20 from convulsions, and 21 from marasmus. No medical man can read such a list without entire conviction that the bulk of these lives might have been saved by proper treatment promptly bestowed. With the exception of the cases of marasmus, three fourths of which are brought about by improper diet, opiates, and foul air, and of convulsions, the constant sequence of anodyne administrations, nearly all are remediable complaints. The suggestion of a remedy for the evils themselves is difficult. So long as ignorance and credulity prevail, so long will blind faith be placed in the assertions and promises of the bold charlatan, rather than in the observing and inquiring student. The uneducated, whether rich or poor, and they are to be found in all ranks, ever prefer the specious to the real, and seek that which comes by extraordinary means rather than in the common course of nature. So long as a demand for opiates exists, no matter to what purpose applied, and money is to be made by selling them, so long will persons engage in the trade, and so long will thousands of children helplessly perish who ought to have grown up men and women, the bulwarks of the state.

How far the evil might be mitigated by medical men themselves by an extension of eleemosynary aid it is difficult to say, for the poor cannot pay medical fees; in many cases they will not pauperise themselves by applying to the parish surgeon, and the profession already contributes more to the relief of the poor than any other body in society. Still there stands out the naked fact that in this district alone out of 252 deaths 135 were those of children under the age of 5 years.

The classification of the diseases of adults suggests reflections, some of a very satisfactory, others of an unsatisfactory nature. It is gratifying to observe, that though 333 children have been born within this district within the last 3 months, only two of the mothers have died from any diseases which had connexion with their births. The improvements which have taken place in the treatment of parturient women during this century are beyond all praise, and the care and skill which are brought to the aid of woman in the time of her greatest tribulation, and particularly the abstinence from injudicious and unnecessary interference, have been attended with the happiest results. How wonderfully do the tables of mortality from parturition and the diseases connected with it contrast now with those of the last century. To pass from this agreeable reflection, how much it is to be regretted that such a want of precision should characterise the medical certificates which come to the hands of the Registrar. The best opportunity the profession

ever enjoyed for collecting the statistics of disease is, in a great measure, lost by the apathy with which it seems to be regarded. There is no attempt at precision in filling up the medical certificates; and the carelessness with which this is done, or with which the cases have been examined, becomes strikingly apparent when the causes of death are classified. Out of 53 deaths of adults from diseases of the lungs, 23 are certified to have been from phthisis, 23 from bronchitis, 2 from catarrh, 3 from asthma, and one from disease of the lungs of uncertain nature, and only one from pneumonia. Pneumonic inflammation must be very common amongst labourers employed in the open air, subject to all the vicissitudes of the weather, and yet it is not recorded as it ought to be, nor the condition of the lungs as the sequence of that inflammation. Not a single case of death occurs from emphysema of the lungs, nor from bronchitis complicated with emphysema.

One might suppose such a disease did not exist, and yet there are entire trades in Manchester, almost every member of which, above the age of 40 years, is affected with emphysema of the lungs. It is one of the commonest affections we have. Men who work in dust, as fustian cutters, cotton carders, &c., are almost invariably affected with it. Not long ago, in examining a number of men of this class who proposed to assure their lives, I found about 8 out of 12 to be so affected more or less.

We hear nothing of consolidation, or of anything but bronchitis and phthisis. It may be added that out of 252 persons who have died within the district within the last 3 months, not one has been subjected to a post mortem examination.

In the last century and the beginning of this, copious nosologies were presented to medical men, and under some one heading it was expected that they would be able, with moderate precision, to place each case as it occurred. Sauvage, Cullen, and Mason Good were respectively the nosological chiefs of their respective times; but as words and systems do not keep pace with science, the latter has advanced beyond the nosologies, which have shared the fate of the systems on which they were based. Recently a tabulation of disease, divested to a large extent of technicality, or of such technicality as would bind it to a system, has been presented to medical men by the Registrar General, which, whilst it possesses great simplicity, has shown its adaptation to the wants of the times by its all but universal adoption where nosology is employed.

I have ventured to call attention by these remarks to the facilities afforded for describing or specifying disease by the system of registration, in consequence of the scanty nosology which medical men appear to have thought sufficient for the Registrars' certificates. Should the stethoscope be thrown aside as of no value when diseases of the lungs and heart are to be examined and recorded? What mean such terms as *morbis cordis*, disease of the heart? And how shall it be said that acute rheumatism is the cause of death? If the stethoscope tell no tale, should the scalpel reveal nothing?

Manchester is one of the best paved and best drained towns in England as regards the streets, and the corporation, with a laudable regard for the comforts and condition of the inhabitants, has been as careful to pave and drain the small streets, lanes, and alleys as the great public thoroughfares; the smoke nuisance has been considerably mitigated; the streets, courts, and alleys are regularly and well swept; the cesspools and ashpits emptied and cleansed at reasonable periods; a good supply of water laid on, of pure quality; and, so far as the police of the town is concerned, every effort is made that can conduce to the wellbeing of its poorer inhabitants. And yet with all this there is no diminution of mortality; the mortality is relatively the same to the population, for the latter has scarcely changed during the last twenty years in my district. The causes of a high rate of mortality are not so much external to the dwellings of the poor as that they are to be found within them. Close, damp, ill-drained, and wretchedly ventilated cellars abound, even in tolerably wide well conditioned streets. The windows are often scarcely wide enough to admit light for ordinary purposes.*

Unequal employment, frequent exposure to wet and cold, indifferent and scanty food, and imperfect medical attendance are the great causes in operation. The mechanical influence of certain occupations in causing disease has not been sufficiently estimated here. The dust continually given off in fustian cutting, cotton carding, and similar occupations, and inhaled, and, in a minor degree, the fuliginous particles with which the atmosphere is so generally loaded, are constant exciting causes of bronchial irritation. When received into the lungs they irritate the bronchial membrane, whose secretion is increased, and they are in part expectorated, but a considerable portion remains imbedded in the pulmonary structure, causing permanent irritation, partial consolidation, extensive emphysema, chronic bronchitis, and ultimately death. It is a common thing to find the bronchial glands and the pulmonary tissue perfectly black and inky from the presence of carbonaceous matter. And those who work at the occupations specified above have emphysema after a few years almost to a man.

JOHN LEIGH, Registrar,
Deansgate Sub-district, Manchester.

* I am at this moment attending a child in a cellar which looks over a fine open piece of ground called Campfield. The cellar consists of two small rooms; the stench from the drains is intolerable, and such as I can scarcely bear in the room where the child lies; the back room has neither window nor door, and contains the necessary office and cesspool of the family. The child is ill of fever.

NOTE.—The 13 weeks of 1852, constituting the June quarter in the Weekly Tables of Mortality, ended June 29th, in which 15173 deaths were registered. In the quarter ending June 30th (p. 7), 12006 deaths were registered.

* Under the head of sudden deaths are classed not only deaths described as sudden, of which the cause has not been ascertained or stated; but also all deaths returned by the coroner in vague terms, such as "found dead," "natural causes," &c. &c.

† In the years previous to 1848, "worms" and "infantile fever" were classed together. The former, of rare occurrence, is now placed to Diseases of stomach, &c.

On the Meteorology of England, South of Scotland, and parts of Ireland, during the Quarter ending June 30th, 1852. By JAMES GLAISHER, Esq., F.R.S., Sec. of the British Meteorological Society.

The weather during the past quarter was cold and unseasonable, the mean daily temperatures having been, with few exceptions, below their average values. The average daily deficiency of temperature till May 6 was $1^{\circ}4$; the period from May 7 to May 20 was tolerably warm, the average daily excess was $1^{\circ}5$; and from May 21 to the end of the quarter the average daily deficiency was $4^{\circ}2$. The long period from February 10 to the end of June was generally cold; to the end of May the direction of the wind was generally N.E. or a compound with East. The deficiency of rain, which had prevailed from the middle of February, continued till the end of April, but in June the fall exceeded by more than double the average amount.

The mean temperature of the air at Greenwich for the quarter ending May, constituting the 3 spring months, was $46^{\circ}2$, being $0^{\circ}2$ below the average of 80 years.

NOTE.—In reading this table it will be borne in mind that the sign (—) minus signifies below the average, and that the sign (+) plus signifies above the average.

Thunderstorms occurred, or thunder was heard and lightning seen, on 12th, 14th, and 19th April at North Shields; on the 30th at Thame, Cardington, Bedford, Highfield House, and North Shields; on 11th May at Rose Hill, Oxford, and Holkham; on the 13th at Glasgow; on the 17th at Jersey, Guernsey, and Bedford; on the 18th at Jersey, Linslade, and Norwich; on the 19th at Durham; on the 22d at Guernsey; on the 25th at Jersey and Guernsey; on the 30th at Ryde and Grantham; on the 31st at Hartwell House; on 2d June at Highfield House; on the 3d at Durham, North Shields, and Glasgow; on the 4th at Highfield House and North Shields; on the 5th at St. John's Wood; on the 7th at Norwich; on the 14th at Grantham, Holkham, Highfield House, and Gainsborough; on the 15th at Holkham; on the 17th at Liverpool, Durham, Newcastle, and Glasgow; on the 18th at Wakefield; on the 19th at Royal Observatory, St. John's Wood, Rose Hill, Thame, Oxford, and Linslade; on the 20th at Gainsborough; on the 21st at Holkham, Highfield House, Hawarden, Manchester, Wakefield, Durham, Newcastle, and North Shields; on the 22d at Glasgow; on the 24th at Norwich; on the 26th at Dunino; on the 27th at Thame and Glasgow; and on the 28th at York and Newcastle.

Thunder was heard, but lightning was not seen, on 21st April at Stone; on the 30th at Thame, Stone, Hartwell House, Royston, and Grantham; on the 5th and 6th May at Helston; on the 11th at Thame and Norwich; on the 17th at Rose Hill, Thame, and Hartwell Rectory; on the 18th at Guernsey, Stone, and Hartwell Rectory; on the 19th at Hartwell Rectory; on the 29th at Stone; on the 31st at Hartwell Rectory; on 1st June at Royal Observatory; on the 2d at Stone, Linslade, and Wakefield; on the 3d at Dunino; on the 4th at Grantham, Highfield House, Gainsborough, Wakefield, York, and Dunino; on the 6th at Gainsborough and Stonyhurst; on the 8th at Stone, Stonyhurst, Durham, and Dunino; on the 9th at Norwich; on the 10th at Grantham and Highfield

House; on the 14th at Rose Hill, Thame, Stone, Hartwell Rectory, Royston, Cardington, Norwich, and Grantham; on the 15th and 16th at Grantham; on the 17th at Helston, Highfield House, Stonyhurst, and North Shields; on the 18th at Highfield House, Gainsborough, and Stonyhurst; on the 19th at Stone and Hartwell Rectory; on the 20th at Highfield House; on the 21st at Grantham, Highfield House, and Liverpool; on the 22d at Dunino; on the 23d at Newcastle; on the 24th at Holkham; on the 25th at Jersey; on the 26th at Highfield House and Dunino; on the 27th at Stone, Hartwell Rectory, Royston, Cardington, and Wakefield; and on the 28th at Gainsborough, Wakefield, and North Shields.

Lightning was seen, but thunder was not heard, on 17th May at Thame, Oxford, Hartwell House, Royston, and Norwich; on the 22d at Jersey; on the 23d at Jersey and Guernsey; on the 24th at Jersey; on the 26th at Guernsey; and on the 17th June at Holkham and Stonyhurst.

Hail fell on 3d April at Holkham; on the 4th at Hawarden; on the 30th at Thame, Hartwell Rectory, and Bedford; on 10th May at Truro, Rose Hill, and Oxford; on the 11th at St. John's Wood, Rose Hill, Thame, Oxford, Hartwell Rectory, Linslade, Royston, Cardington, and Highfield House; on the 12th, 14th, and 19th at North Shields; on the 29th at Hawarden; on the 30th at Jersey, Oxford, Hawarden, Liverpool, Stonyhurst, North Shields, and Glasgow; on the 31st at Hartwell Rectory, Royston, Grantham, Hawarden, Liverpool, Stonyhurst, and Durham; on 1st June at Highfield House and Liverpool; on the 2d at Oxford and Highfield House; on the 3d at Stonyhurst; on the 5th at Glasgow; on the 10th at Gainsborough; on the 14th at Rose Hill and Hartwell Rectory; on the 18th at Highfield House; on the 21st at Highfield House and Wakefield; on the 24th at Highfield House; and on the 27th at North Shields.

Fog was prevalent on 5th April at Thame; on the 10th at Greenwich; on the 17th at Ennis; on the 28th at Helston; on the 29th at Helston and North Shields; on the 18th, 24th, and 25th May at Durham; on 5th June at Stone; on the 7th at North Shields; and on the 30th at Helston.

Aurora were seen on 1st April at Highfield House; on the 9th and 11th at Stonyhurst; on the 14th at Glasgow; on the 16th at Dunino; on the 18th at Stonyhurst; on the 20th at Rose Hill; on the 21st at Oxford and Highfield House; on the 22d, 23d, and 26th at Highfield House; on 1st May at Stone; on the 2d at Stone and Hartwell Rectory; on the 3d at Hartwell Rectory and Highfield House; on the 19th at Stone; on 11th June at Royal Observatory; and on the 24th at Highfield House.

Snow fell on 3d April at Linslade; on the 4th at Stone, Hartwell Rectory, Highfield House, Hawarden, Liverpool, and North Shields; and on the 19th at Norwich.

Rain at Jersey between 3d and 4th June, in 24 hours, was 1.2 in. At Truro on the 24th of April was 0.9 in.; on the 18th May was 2.3 in.; and on the 3d, 7th, and 16th of June was 0.6 in. on each day. At Ryde on the 11th of June was 0.9 in.; and on the 26th was 0.5 in. At Royal Observatory on the 9th of June was 1.4 in.; and on the 10th was 1.0 in. equal to 2.4 in. in about 40 hours. At St. John's Wood on the 9th of June was 1.5 in. At Rose Hill on the 14th of June (hail and rain mingled) was 0.2 in. in 6 minutes. At Thame on the 2d of June was 0.5 in.; and on the 9th and 10th was 1.2 in. in about 20 hours. At Oxford on the 9th of June was 1.7 in. At Stone on the 3d of June was 0.6 in.; and on the 10th was 1.3 in. At Linslade on the 2d of June was 0.7 in.; on the 9th was 0.7 in.; and on the 14th was 0.6 in. At Royston on the 26th of June was 0.8 in. At Bedford on the 30th of April was 0.5 in. on the 26th of May was 0.9 in.; and on the 2d and 9th of June was 0.5 in. on both days. At Grantham on the 3d of June was 0.7 in. At Highfield House on the 8th of June was 0.6 in.; and on the 14th (rain and hail mingled) was 0.3 in. in 9 minutes. At Hawarden on the 19th of May was 1.2 in. in 7 or 8 hours; and on the 8th of June was 0.7 in. At Gainsborough on the 14th of June was 0.5 in. At Wakefield on the 21st of June was 0.8 in. in 8 hours. At Leeds on the 21st of June was 0.5 in. At Stonyhurst on the 13th of May was 1.0 in.; and on the 14th was 0.6 in. At York on the 14th of June was 0.7 in. At North Shields on the 11th of June was 1.2 in.; on the 16th and 17th was 1.0 in.; on the 21st was 1.9 in.; and on the 27th and 28th was 1.5 in. At Glasgow on the 14th of May was 1.0 in. in 24 hours. At Dunino on the 26th of June was 0.5 in. in 20 minutes. At Ennis on the 12th of May was 0.6 in.; on the 14th of June was 0.6 in.; on the 17th and 20th was 0.7 in. on both days; on the 25th was 0.6 in.; and on the 28th was 0.6 in.

Solar Halos were seen at the different stations on 19 days only during the quarter.

Lunar Halos were seen on 15 days only at the different stations during the quarter.

Lilac in flower at Jersey on 16th April; at Guernsey on 17th April; at Helston on 25th April; at Rose Hill on 11th May; at Linslade on 17th May; at Cardington on 20th May; at Grantham on 19th May; at Holkham on 18th May; at Highfield House on 15th May; at Hawarden on 11th May; at Gainsborough on 8th May; and at Dunino on 31st May.

Wheat in ear at Jersey on 7th June; at Guernsey on 14th June; at Helston on 12th June; at Rose Hill on 17th June; at Hartwell Rectory on 23d June; at Linslade on 13th June; at Cardington on 12th June; at Grantham on 10th June; at Holkham on 11th June; at Highfield House on 19th June; at Hawarden on 12th June; and at Gainsborough on 12th June.

Wheat in flower at Jersey on 17th June; at Linslade on 24th June; at Cardington on 30th June; at Grantham on 27th June; at Holkham on 23d June; at Highfield House on 26th June; at Hawarden on 22d June; and at Gainsborough on 24th June.

The mean of the numbers in the first column is 29.616 inches, and it represents that portion of the reading of the barometer due to the pressure of air; the remaining portion, or that due to the pressure of water, is 0.803 inch; the sum of those two numbers is 29.918 inches, and it represents the mean reading of the barometer for the quarter at the level of the sea.

The highest readings of the thermometer in air were 79° at Hartwell House, Norwich, Highfield House and Wakefield, and 78° at Holkham. The lowest readings were 22° at Linslade and Cardington, and 22° at Stone. The least daily ranges of temperature took place at Torquay, Ventnor, and Guernsey; and the greatest at Manchester and Highfield House.

Rain fell on the least number of days at Liverpool, Ryde, Royal Observatory, Norwich, and York; and on the greatest number at Royston, Wakefield, Durham, and Hawarden. The least falls took place at Liverpool, Leeds, and Gainsborough, and the mean amount at those places is 4.4 inches. The largest falls occurred at Torquay, Truro, Oxford, and Rose Hill, and their average is 9.8 inches.

In the formation of this Table the results from Jersey and Guernsey have not been combined, on account of the great difference in the range of temperature between these two places. For the same reason, those from Ryde and Ventnor have not been combined. The results from Chiswell-street Brewery have also not been combined.

MONTHLY METEOROLOGICAL TABLE FOR THE QUARTER ENDING JUNE 30th, 1852.

The Observations have been reduced to Mean values, and the Hygrometrical results have been deduced — from Glaisher's Tables.

Vendor:—The number of days on which rain has fallen, as stated above, is found by adding together the numbers as furnished by Dr. Martin, who separates the falls which occur in the day from those which fall in the night. In the return in April the numbers are 3 days, 3 nights; in May, 6 days, 7 nights; and in June, 11 days and 11 nights.

1852.]

QUARTERLY RETURN

[No. 3.]

OF

THE MARRIAGES, BIRTHS, AND DEATHS IN ENGLAND.

THIS Return comprises the BIRTHS and DEATHS registered by 2190 Registrars in all the districts of England during the Summer quarter ending September 30th, 1852; and the MARRIAGES in more than 12000 churches or chapels, about 3228 registered places of worship unconnected with the Established Church, and 624 Superintendent Registrars' offices, in the quarter that ended June 30th, 1852.

The Return of Marriages is not complete; but the defects are inconsiderable, and approximative numbers have been supplied from the records of previous years.

The Marriages, Births, and Deaths in the Return exceed the average; so that the result is mixed; indicating great activity in all the sources of employment, but no general diminution of the causes of mortality.

MARRIAGES.

80014 persons were married in the quarter ending June 30th, 1852; and thus 40007 new families were established, or 5286 more than were established in the

MARRIAGES, BIRTHS, and DEATHS, returned in the Years 1840-52 and in the Quarters of those Years.

* The numbers up to 1850 have appeared in the Annual Reports.

corresponding quarter of 1848. The proportion of persons married to the population was 1766; of marriages 883 in 100000; while the average numbers are respectively 1656 and 828. The increase in the marriages appears to be general; but it is the greatest in London, where the marriages in the quarter were 6713, or 1304 more than the marriages in the corresponding quarter of 1848. In Hampshire, Devonshire, Somersetshire, Cheshire, Lancashire, Durham, Cumberland, and South Wales, and generally in the ports from which emigrants sail, an unusual number of marriages was celebrated.

BIRTHS.

151193 births were registered in the quarter ending September 30th, 1852. The number slightly exceeds the high number registered in the corresponding quarter of 1851, and is greater by 31371 than the number registered in 1840, when it is believed the registration was more imperfect than it is now. Within the last twelve months 621260 children have been enrolled on the national Registers. The rate of births in England is influenced by the seasons; it is higher in the first than it is in the last two quarters of the year, in the proportion of 34 to 31. Thus, taking one year with another, the annual rate of births per cent. in the Spring quarter is 3·411, in the Summer quarter 3·147; the rates in 1852 were 3·516 and 3·294.

INCREASE OF POPULATION.

As 151193 births and 100497 deaths have been registered in the quarter, the natural increase is 50696, which is at the rate of 3899 weekly, and 557 daily. The natural increase is less than it has hitherto usually been, not through any

† The Table may be read thus, without reference to the decimal points:—In the year 1848, to 100000 of the population of England there were 798 marriages, 2349 births, 2307 deaths registered. The annual rates of marriage in each of the 4 quarters were ·661, ·806, ·755, and ·961 per cent.; the rates of death 2·794, 2·913, 2·005, and 2·108 per cent. In reading the population on the first line add 3 ciphers (000). The 3 months January, February, March, contain 90, in leap year 91 days; the 3 months April, May, June, 91 days; each of the 3 last quarters of the year 92 days. For this inequality a correction has been made in the calculation. It was assumed that the population increased at the same uniform rate as the females increased in 1841–51, namely 1·212 per cent. annually, or ·303 quarterly. So $\frac{1}{4} \times 1 \cdot 212 = \cdot 303$.

diminution in the number of births, but by the increase of deaths from epidemic causes.

Emigration has proceeded with increased activity. The emigration from the United Kingdom went on through the summer at a rate which, if it continue the same, will sensibly reduce the population. 109,236 persons left the ports at which there are Government emigration officers; 62,579 sailed for the United States, 7,116 for British North America, 3,860 for the Australian Colonies, and 940 for other places. 8,335 emigrants sailed from Irish, 5,976 from Scotch ports. 94,925 sailed from English ports; namely, 70,012 from Liverpool, 3,125 from Plymouth, and 21,788 from London. The destination of 149,566 of the emigrants from London was Australia. It is well known that a large proportion of the emigrants that sail from the port of Liverpool are of Irish birth.*

It will be observed in the Table below that the average price of wheat has been 41s. 2d.; and that butcher's meat has been slightly dearer than it was.

† Note.—The total number of quarters of wheat sold in England and Wales for the 13 weeks ending Sept. 30th, 1851, was 971,276; for the 13 weeks ending Dec. 31st, 1,423,582; for the 13 weeks ending March 31st, 1,241,921; for the 13 weeks ending June 30th, 1,143,339; for the 13 weeks ending Sept. 30th, 1,023,251. The total number of quarters entered for Home Consumption was respectively 1,183,523; 671,803; 358,024; 710,780; and 882,850; the second total, however, embraces the returns of 14 weeks.

STATE OF THE PUBLIC HEALTH.

100,497 deaths were registered in the quarter ending September 30th. This number greatly exceeds the number of deaths in any of the corresponding quarters of previous years, except 1846 and 1849, when 101,663 deaths and 135,235 deaths respectively were registered. The excessive mortality in the summer of 1846 was the result of an extensive epidemic of summer cholera and diarrhoea; Asiatic cholera was epidemic in the summer of 1849; and in the present quarter the chief causes of the increase of deaths were the same as were in operation in 1846. The temperature of summer in 1846 was high; and the summer of 1852 exhibited great variations; on July 5th the temperature exceeded 90°, and through the month of July was 5° above the average; heavy thunderstorms

* Return with which the Registrar General has been favoured by the Emigration Commissioners.

were observed. The two subsequent months were colder or warmer than the average of the season. The meteorology of the season is ably discussed by Mr. Glaisher, pp. 30-32.

Cholera of the epidemic, or perhaps the Asiatic form, broke out in Warsaw, as well as other cities on the continent, and created some alarm in England while diarrhoea and summer cholera were prevailing.

In LONDON 1433 deaths from diarrhoea and 127 deaths from cholera were registered in 13 weeks. Diarrhoea, which had been fatal to 20, 10, 19, 13, and 17 persons in the 5 weeks ending July 3d, when the mean weekly temperature was between 52° and 60°, rose, after the weekly temperature suddenly ascended to 71°, and remained above 65° or 60°,—to 31, 48, 94, 125, 213, 201, 208 in the 7 weeks ending August 21st. On the week following the deaths from diarrhoea fell to 125, and the deaths from cholera were 15. It was then observed in the Report on the health of the week, that in the interval between the two great epidemics of Asiatic cholera, in the years 1832 and 1849, on the continent a partial outbreak occurred, which did not reach England; and a hope was expressed that upon the present occasion this country may enjoy a like immunity.

Before the next invasion of Asiatic cholera such remedial arrangements may and probably will be made as science has indicated and experience has approved; so that the population of England may not only be protected from this and from other forms of plague, but rescued from that degeneration which is always silently proceeding in unhealthy cities and amongst the inhabitants of low undrained lands.

The deaths by cholera in London during the five summer quarters of 1848-52 were 153, 12847, 87, 188, 127. In the thirteen weeks of the past summer small-pox was fatal in 231, measles in 129, scarlatina in 668, hooping-cough in 244, typhus in 520 cases. 1672 persons died of consumption, 26 women died of metria, and 55 of other diseases incidental to childbearing. An epidemic of boils prevailed, which is rarely fatal, but is indicated by the increase of deaths by carbuncle. 21 deaths were directly referred to intemperance, 28 to delirium tremens, only one to privation. The deaths by poison were 23, burns and scalds 34, hanging and suffocation 65, drowning 114, fractures and contusions 162, wounds 20.

The annual rate of mortality in the 117 London and other chief town districts for the summer quarters 1842-51 was 2.536 per cent.; for the summer quarter of 1852 it was 2.590. The annual rate of mortality in the other 507 districts of the kingdom was 1.826 and 1.908. The increase was rather less in the town than it was in the country districts.

SOUTH-EASTERN DIVISION.—Diarrhœa prevailed in many districts. Cholera was fatal in a few. Fever caused much sickness in Woking, Brenchley, Folkestone, East Tytherley, and in Eastchurch, Sheppey. "Diarrhœa and bilious fever," says the Registrar of Eastchurch, "have been and still continue more prevalent than I can remember during 30 years, although they have been only fatal to children." About 50 cases of fever have occurred in East Tytherley, and the disease is gradually extending to the neighbouring villages. The disease is of the lowest type; extreme prostration, petechiæ, aphthæ, and profuse diarrhœa showing themselves very early. The nonremoval of nuisances and the crowded state of the cottages tend to produce and propagate the disorder. East Tytherley is in the Stockbridge Union. There is an increase of mortality in the districts of Hambledon, Croydon, Cranbrook, Portsea Island, and Reading. The deaths in the sub-district of Deal, containing Walmer, were 34 in the summer quarter of 1851, and 53 in the summer quarter of 1852. Scarlatina and diarrhœa raised the mortality of Sandwich.

In the **SOUTH MIDLAND DIVISION** diarrhœa or cholera is noticed at Ware, Chessham, Chalfont, High Wycombe, Cranfield, Balsham, Haddenham, and Chatteris. Typhus and ague have been very prevalent in Sutton, a sub-district of Ely. The increase in the mortality of Peterborough and Bedford is not explained.

The *mortality* of Essex in the **EASTERN DIVISION** was somewhat above the average; diarrhœa was prevalent and fatal. Yarmouth was visited by an epidemic of diarrhœa, to which 55 deaths were referred. Typhus and diarrhœa, in a mild form, prevailed extensively in South Walsham. No sanitary arrangements of any kind exist in any of the villages of the district.

In the **SOUTH-EASTERN DIVISION** small-pox, scarlatina, and diarrhœa have been partially epidemic. In Charmouth, Axminster, a family, consisting of a mechanic, his wife, and 10 children, has been nearly exterminated by scarlatina; within three weeks 7 of the children died, and "to-day," the Registrar writes, "I have notice of another death in the same family." The disease has not spread in the neighbourhood. Another instance of 4 deaths in the same house in *Morice, Stoke Damarel*, is mentioned; the house is built without any regard to ventilation, and is kept in a very filthy state. By a careful investigation of particular cases of forms of disease so fatal much light may be thrown on their causes. In Martock, Yeovil, most of the deaths, after scarlatina, were the result of subsequent dropsy, arising in many instances from neglect; the poor of Yeovil, states the Registrar, "are more generally employed and better fed than at any time within my recollection."

In the **WEST MIDLAND DIVISION** the mortality of Gloucestershire, Staffordshire, and Warwickshire was above, in Shropshire and Worcestershire below the average. Diarrhœa and scarlatina were epidemic in several districts; isolated cases of summer cholera are mentioned; a man, aged 66, died of cholera in 26 hours, at Wem in Shropshire; in the sub-district of Newcastle-under-Lyme in Staffordshire the deaths (122) equalled the births in number; and 44 persons, chiefly children, died of scarlatina in this insalubrious, ill-drained town. The mortality of Birmingham was high; 1222 deaths were registered in the quarter; diarrhœa was epidemic and fatal; one case of cholera is mentioned. The return of Holy Trinity, Coventry, "shows an excess over the ordinary rate of mortality within the district, caused by the excessive prevalence of diarrhœa amongst infants. 51 deaths are ascribed to diarrhœa and dysentery, sometimes united with other causes; and, with the exception of a few aged persons, the whole are of children under 2 years of age. The complaint has not been confined to any particular locality or class. There is one case of English cholera, after 17 hours; that of a man 40 years of age, who had been discharged as a soldier, and come to reside here within a month of his death. Of the births 16 are illegitimate. Of the deaths 11 are those of illegitimate infants."

In the **NORTH MIDLAND DIVISION** the mortality was above the average in Leicestershire, Lincolnshire, Nottinghamshire, and Derbyshire. The districts which suffered most were Loughborough, Leicester, Grantham, Spilsby, East Retford, Basford, and Nottingham, Derby, Chesterfield, and Hayfield. In Moulton,

Spalding, it is stated that 2 cases of typhus occurred in one family. "The disease," according to the Registrar, "was caught from the parties visiting in a neighbouring parish where the disease was prevalent." No other cases occurred in this district. The Registrar of Misterton, Gainsborough, says: "I registered the death of a female, the mother of 9 children, 40 years of age, from "fever," as certified by the medical attendant. From my having known her to be a strong, hardworking, healthy looking woman I was induced to make inquiry as to what could have produced the fever. I found within 18 inches of the dwelling-house door an untrapped sewer full of sludge or dirty water to the grate, and within 2 or 3 yards of the door there was a quantity of manure. I recommended the immediate removal of the nuisance. Shortly afterwards I heard the husband of the deceased woman was ill."

LANCASHIRE and CHESHIRE have experienced a high rate of mortality. 18592 deaths were registered in the Summer quarter, a number 3546 in excess of the deaths in the Summer quarter of last year, and 3628 less than the number of deaths in the Summer quarter of 1849, when Asiatic cholera was epidemic. Diarrhœa is the chief cause of the increase of mortality; it was epidemic, and extended its ravages into almost every district. The deaths in Liverpool and West Derby from all causes were 3537; in Chorlton, Salford, and Manchester 4153. In Manchester 4 men, who were working in the same buildings, were killed by the effects of lightning on August 10th. In Ashton the Registrar notices that three fourths of the deaths by diarrhœa and dysentery happen in streets and places where there is little or no sewerage.

YORKSHIRE was more unhealthy than usual, as is shown by the deaths in the last five summer quarters—8942, 14805, 9107, 10006, and 11630. Huddersfield, Halifax, Bradford, Hunslet, Leeds, and Dewsbury, Ecclesall Bierlow, and Sheffield, York, Beverley, Sculcoates, Hull, Scarborough, and Guisborough, all suffered more or less from the epidemic diarrhœa, and the mortality was in consequence raised. Several fatal cases of summer cholera are recorded. The Registrar of Barnsley states that a fatal case of Asiatic cholera occurred at Dedworth in Barnsley, which is in a very unsatisfactory state: the application of "Asiatic" to such cases as this and the following is, however, of questionable propriety.

The mortality of the NORTHERN DIVISION was above the average; the increase was slight in Cumberland and Westmorland, considerable in Northumberland and Durham. Measles, small-pox, and scarlatina were epidemic in some districts, and diarrhœa was common. The Registrar of Bishop Auckland registered, he says, 4 deaths from "decided spasmodic cholera; in 2 cases the deceased were men of intemperate habits, one a wayfaring man at a lodging house, and the fourth a married woman, the mother of a family." A woman in Durham, aged 28, died of "Asiatic cholera" after 24 hours illness; a girl, aged 6, died of the same disease. Four deaths in Monkwearmouth were referred to summer cholera. One death from Asiatic cholera occurred at Bedlington Colliery, Morpeth, after 25 hours of extreme suffering, to a man, aged 38 years, of regular and temperate habits.

In the WELSH DIVISION the deaths were 5578, which is a number 371 in excess of the deaths in the summer of 1851. Scarlatina, small-pox, typhus, and diarrhœa prevailed to some extent. Three persons were struck by lightning in Wrexham. The Registrar of Newport, Monmouthshire, says: "Although diarrhœa has very extensively prevailed, it has not been of a very fatal nature. One death, that of a woman, aged 65, was certified to have been from "cholera Asiatica, diarrhœa (24 hours), collapse (6 hours)." Hooping-cough and pneumonia among children have been fatal in a great number of cases. A few cases of small-pox have also been registered, but vaccination has prevented the disease from prevailing widely. This town is governed under the provisions of the Health of Towns Act, but the drainage is in a sad state, although the natural facilities for draining are great. The chief diseases which prevail here are such as might be obviated, as is evident from the fact that of 135 deaths upwards of 60 (or nearly half) were of children under a year old."

MARRIAGES Registered in the Quarters ending June 30th, 1848-52; BIRTHS and DEATHS Registered in the Quarters ending September 30th, 1848-52, in the Divisions, Counties, and Districts of ENGLAND.

* In the present publication the "Registration Counties" comprise groups of entire Registration Districts, or Poor Law Unions; and when a District runs into two or more Counties, it has been placed with the County in which the greater part of the Population is situated: hence these groups of Districts rarely, if ever, correspond with the strict boundaries of the respective Counties named.

NOTE.—The 13 weeks of 1852 in which 13111 deaths were registered.

* Under the head of sudden death, some cases were ascertained or stated; but also some cases, &c. &c.

† In the years previous to 1848, this was placed to Diseases of stomach.

On the Meteorology of England, South of Scotland, and parts of Ireland, during the Quarter ending September 30th, 1852. By JAMES GLAISHER, Esq., F.R.S., Sec. of the British Meteorological Society.

Till August 2d the weather was hot; on July 5th the temperature exceeded 90° at all places, excepting those situated near the sea or at a high elevation, and those whose latitude exceeded 54° ; the mean temperature of this day was 14° in excess above its average value, and the following day was in excess to the amount of 12° . The average daily excess to August 2d was $5^{\circ} \cdot 2$. From August 3d till August 16th the daily temperatures were mostly below their average, the mean daily defect being $1^{\circ} \cdot 2$. The period from August 17th till September 11th was warm, and the average daily excess of temperature was $2^{\circ} \cdot 6$; from September 12th the weather was cold, and the average daily defect was $1^{\circ} \cdot 9$.

The quarter has been remarkable for great heat in July, very frequent and severe thunderstorms, frequent and heavy falls of rain, and for an excess of rain. Harvest operations were much impeded by the unsettled weather in August, and the crops at most places sustained damage before they were cut by being beaten down near the ground.

The mean temperature of the air at Greenwich for the quarter ending August, constituting the 3 summer months, was $61^{\circ} \cdot 6$, being $1^{\circ} \cdot 7$ above the average of 80 years.

NOTE.—In reading this table it will be borne in mind that the sign (–) minus signifies below the average, and that the sign (+) plus signifies above the average.

Thunderstorms occurred, or thunder was heard and lightning seen, on 5th July between latitudes 49° and 57° ; on the 6th at Jersey, Guernsey, Stone, Manchester, Stonyhurst, and Whitehaven; on the 11th at Jersey and Guernsey; on the 12th at Jersey; on the 13th between latitudes 51° and 54° ; on the 14th and 15th between latitudes 51° and 57° ; on the 16th between latitudes 49° and 55° ; on the 17th at St. John's Wood, Whitehaven, and Glasgow; on the 18th at Ennis; on the 19th at Ennis and Danino; on the 20th at Stonyhurst and Glasgow; on the 24th at Ryde; on the 25th at Greenwich, St. John's Wood, Hartwell, Cardington, and Bedford; on 1st August at Cardington; on the 3d at Whitehaven; on the 4th at Stone, Hartwell Rectory, Royston, Norwich, Liverpool, Whitehaven, and North Shields; on the 5th at Guernsey, Newport, and Whitehaven; on the 6th between latitudes 50° and 54° ; on the 7th between latitudes 51° and 53° ; on the 8th at Whitehaven and Nottingham; on the 9th between latitudes 52° and 55° ; on the 10th between latitudes 52° and 55° ; on the 11th at Ryde, Cardington, and Bedford; on the 12th at Newport, Ryde, Ennis, Whitehaven, Liverpool, and York; on the 14th at Liverpool, Wakefield, and Stonyhurst; on the 15th at Ryde; on the 17th between latitudes 49° and 54° ; on the 18th between latitudes 49° and 53° ; on the 19th at Torquay, Exeter, and York; on the 26th at Jersey; and on the 30th at Hawarden; on the 31st September at Holkham, Liverpool, and York; on the 5th at Hartwell, Norwich, and Whitehaven; on the 6th between latitudes 50° and 55° ; on the 7th between latitudes 50° and 53° ; on the 8th between latitudes 49° and 52° ; on the 9th at Newport, Ryde, Uckfield, Midhurst, and Wokingham; on the 10th at Uckfield; on the 15th at Falmouth; on the 20th at Wakefield and Stonyhurst; on the 21st at Holkham; and on the 28th at Uckfield, Greenwich, and St. John's Wood.

Thunder was heard, but lightning was not seen, at various places on July 3d, 4th, 5th, 6th, 7th, 8th, 10th, 13th, 14th, 15th, 16th, 17th, 18th, 19th, 24th, 25th, 26th, 28th, 29th, 30th, and 31st; on August 1st, 3d, 4th, 5th, 6th, 7th, 8th, 9th, 10th, 11th, 12th, 13th, 14th, 15th, 17th, 18th,

19th, 24th, 26th, 28th, 30th, and 31st; on September 4th, 5th, 6th, 7th, 8th, 9th, 10th, 11th, 13th, 15th, 16th, 28th, and 29th.

Lightning was seen, but thunder was not heard, on July 3d, 4th, 5th, 6th, 7th, 9th, 11th, 12th, 14th, 15th, 16th, 17th, and 20th; on August 4th, 5th, 6th, 9th, 10th, 11th, 13th, 14th, 15th, 17th, 18th, 21st, 23d, 24th, 26th, and 30th; on September 4th, 5th, 6th, 7th, 8th, 9th, 10th, 15th, 20th, and 28th.

Remarkable falls of Rain on the 2d July at Stonyhurst was 0.5 in.; on the 5th at Grantham 1.6 in. fell in about one hour, at Gainsborough 0.5 in. in an hour, at Leeds 0.6 in., at Durham 2.3 in., and at North Shields 2.6 in. fell in 5½ hours; on the 6th at Guernsey 0.8 in., at Derby 1.7 in.; on the 12th at Guernsey 1.7 in.; on the 13th at Stone 0.5 in., at Wakefield 1.9 in., at Leeds 0.5 in.; on the 12th and 13th at York 0.9 in.; on the 14th at Hartwell Rectory 0.6 in., at Linslade 0.8 in. fell in a few hours; at Royston 1.4 in.; on the 15th at Derby 0.9 in.; on the 16th at Guernsey 0.5 in., at Ryde 1.0 in., of which 0.8 fell in 20 minutes, at Enfield 0.6 in., at Royston 1.0 in.; on the 17th at Newport 0.7 in., at Hartwell Rectory 0.6 in., at Aylesbury 1.4 in., at Whitehaven 1.3 in. which fell in about one hour; on the 25th at Ryde 1.5 in., at Greenwich 2.0 in., of which 1.0 in. fell within 15 minutes, and 0.5 in. fell in a quarter of an hour at another time in the day, at Rose Hill near Oxford 1.4 in., at Royston 0.7 in.; on the 26th at Newport 0.9 in., at Southampton 1.6 in., at Enfield 0.6 in., at Grantham 1.2 in., at Derby 1.4 in., at Nottingham 2.1 in., at Gainsborough 0.6 in., at Manchester 1.0 in., at Wakefield 0.5 in., at Stonyhurst 1.0 in., and at Durham 0.7 in.; on the 2d of August at Falmouth 0.6 in.; on the 7th at Ryde 0.6 in., at Derby 1.0 in.; on the 10th at Falmouth 1.2 in. during the preceding night, at Southampton 0.7 in., at Stone 0.7 in., at Hartwell Rectory 0.6 in., at Linslade 0.6 in., at Grantham 0.5 in. of which 0.3 fell in 10 minutes, at Stonyhurst 0.9 in., and at Durham 0.7 in.; on the 11th at Falmouth 0.7 in., at Torquay 1.7 in., at Ryde 1.0 in., at Stone 0.8 in., at Hartwell Rectory 0.9 in., at Linslade 0.9 in., at Royston 0.5 in., at Cardington 1.0, at Bedford 0.9 in., at Grantham 0.9 in., at Nottingham 1.1 in., at Gainsborough 0.8 in., at Wakefield 0.8 in., at Leeds 0.6 in., and at North Shields 3.1 in. fell in 19½ hours; on the 12th at Torquay 0.8 in., at Ryde 0.6 in., at Southampton 0.9 in., at Greenwich 0.6 in., at Enfield 0.8 in., at Linslade 0.6 in., at Grantham 0.8 in., at Derby 0.7 in., at Stonyhurst 0.5 in., at Durham 1.0 in.; on the 13th at Newport 0.6 in., at Ryde 0.7 in., at Norwich 0.6 in., at Durham 0.7 in.; on the 14th at Falmouth 0.7 in., at Southampton 1.7 in. which fell in 5 hours, at Stone 0.7 in., at Hartwell Rectory 0.7 in., at Royston 0.9 in., at Cardington 1.3 in., at Bedford 1.2 in.; on the 15th at Guernsey 0.8 in., at Torquay 0.5 in., at Newport 0.7 in., at Ryde 0.8, at Greenwich 1.1 in., at St. John's Wood 0.6 in., at Linslade 0.9 in. in 7 hours, at Derby 0.6 in.; on the 16th at Uckfield 1.2 in.; on the 17th at Southampton 0.8 in., at Stone 1.6 in., at Hartwell Rectory 1.4 in. in 5 hours, at Linslade 1.2 in. of which 0.9 in. fell in one hour, at Bedford 1.2 in., at Grantham 1.2 in. of which 0.8 in. fell in 40 minutes, at Hawarden 1.7 in. which fell in about one hour, at Gainsborough 1.0 in., at Stonyhurst 0.6 in.; on the 18th at Enfield 0.5 in., at Stone 0.6 in., which fell in one hour; on the 19th at Ryde 0.6 in., at Norwich 0.8 in., at Grantham 0.6 in.; on the 20th at Ryde 0.7 in.; on the 24th at North Shields 1.5 in.; on the 25th at Stonyhurst 0.8 in.; on the 29th at Enfield 0.5 in.; and on the 31st at Stonyhurst 0.7 in. These heavy falls did much damage to the crops. On 5th September at Norwich 0.5 in., at Grantham 0.5 in. fell in about a quarter of an hour; on the 6th at Linslade 0.7 in. fell in two hours, at Grantham 1.0 in., at Nottingham 2.6 in. fell in 28 hours; on the 7th at Manchester 0.5 in., at Durham 0.5 in.; on the 8th at Southampton 0.7 in., at Uckfield 0.9 in., at Greenwich 1.0 in., at Enfield 0.6 in., at Stone 0.6 in., at Hartwell Rectory 0.6 in., at Aylesbury 0.8 in. fell in about one hour; on the 9th at Newport 1.4 in., at Ryde 0.6 in.; on the 10th at Newport 0.6 in., at Ryde 0.7 in., at Southampton 0.7 in. fell in one hour, at Uckfield 1.2 in.; on the 15th at Grantham 0.5 in.; on the 16th at Norwich 1.4 in.; on the 18th at Torquay 0.7 in., at Greenwich 0.8 in., at Stone 0.7 in., at Linslade 1.0 in., at Grantham 0.6 in., at Hawarden 1.3 in., at Wakefield 1.2 in., at Leeds 0.9 in., at Stonyhurst 1.0 in.; on the 19th at Newport 0.8 in., at Ryde 0.8 in., at Southampton 1.0 in., at Hartwell Rectory 0.7 in., at Royston 0.6 in., at Stonyhurst 0.6 in.; on the 20th at Norwich 0.6 in., at Hawarden 0.8 in., at Stonyhurst 0.5 in.; on the 26th at North Shields 0.7 in.; on the 27th at Enfield 0.7 in., at Norwich 1.1 in., at Durham 0.5 in., at North Shields 0.9 in.; on the 28th at Newport 0.7 in., at Ryde 0.6 in., at Southampton 0.7 in., at Uckfield 1.0 in., at Greenwich 0.9 in., at St. John's Wood 1.0 in., at Hartwell Rectory 0.5 in., at Norwich 0.7 in., at Leeds 1.0 in., at Durham 0.6 in., at North Shields 3.9 in.; on the 29th at Falmouth 1.4 in. fell during the afternoon hours, at Torquay 1.1 in., at Grantham 1.0 in., at Nottingham 1.0 in., at Wakefield 1.0 in., at York 1.3 in., at Durham 2.5 in., at North Shields 0.9 in.; and on the 30th at Torquay 1.3 in., and at Durham 0.6 in. Thus at North Shields the amount of rain from September 26th to September 29th was 6.4 inches.

Solar Halos were seen on 6 days in July, on 8 days in August, and on 15 days in September at the different stations; and *Lunar Halos* on 6 days only at the different stations during the quarter.

Hail fell at a few places on 13 days in the quarter.

Fog, with the exception of places situated within the latitudes of 51° and 52°, was inconsiderable; between these parallels it occurred on 7 days in July and on 12 in September.

Aurora Borealis occurred on July 3d, 6th, 13th, and 14th, and on September 11th, 17th, 18th, 19th, 20th, and 21st.

Ice at Hawarden on 10th August; it fell in large angular pieces during a thunderstorm.

Snow fell on Ben Nevis and the highest Grampians on 20th September.

Wheat began to be gathered at most places between the latitudes of 49½° and 53° on the 1st, 2d, and 3d of August, at Durham on the 16th, North Shields on the 17th, and Dunino on the 24th.

Harvest was completed at places south of latitude 55° between 17th and 27th September.

NAMES OF THE PLACES.	WIND.										RAIN.										
	Mean Pressure of dry Air reduced to the level of the Sea.	Mean Temperature of the Air.	Highest Reading of the Thermometer.	Lowest Reading of the Thermometer.	Mean Daily Range of Temperature.	Mean Monthly Range of Temperature.	Range of Temperature in the Quarter.	Mean Temperature of the Quarter.	Mean Temperature of the Evaporation.	Mean Temperature of the Dew Point.	Mean estimated Strength.	General Direction.	Mean Amount of Cloud.	Number of Days on which it fell.	Amount collected.	Mean Weight of Vapour in a cubic foot of Air.	Mean additional Weight required to saturate a cubic foot of Air.	Mean degree of Humidity.	Mean whole Amount of Water in a vertical column of Atmosphere.	Mean Weight of a cubic foot of Air.	Height of Clouds of the Barometer above the level of the Sea.

The mean of the numbers in the first column is 29.476 inches, and it represents that portion of the reading of the barometer due to the pressure of air; the remaining portion, or that due to the pressure of water, is 0.435 inch; the sum of these two numbers is 29.911 inches, and it represents the mean reading of the barometer for the quarter at the level of the sea.

The highest readings of the thermometer in air were 65° 5 at Gainsborough, 65° 0 at Leeds, 65° 7 at Holkham, and 65° 5 at Wakefield. The lowest reading was 31° at Aylesbury and Wakefield. The least daily ranges of temperature took place at Ventnor, Guernsey, Worthing, and Torquay; and the greatest at Uckfield and Leeds.

Rain fell on the least number of days at Dunino, Guernsey, Greenway, Norwich, and Holkham; and on the greatest number at Royston, North Shields, Wakefield, and Leeds. The least falls took place at Dunino, Leeds, and Gainsborough; and the mean amount at these places is 7.0 inches. The largest falls occurred at North Shields, Stonyhurst, Uckfield, and Ryde, and their mean is 15.5 inches.

QUARTERLY METEOROLOGICAL TABLE for different PARALLELS of LATITUDE.

PARALLELS OF LATITUDE, &c.	WIND.										RAIN.									
	Mean Temperature of the Air.	Mean of Highest Readings of the Thermometer.	Mean of Lowest Readings of the Thermometer.	Average Daily Range of Temperature.	Average Monthly Range of Temperature.	Average Quarterly Range of Temperature.	Mean Temperature of the Quarter.	Mean Temperature of the Evaporation.	Mean Temperature of the Dew Point.	Mean Amount of Cloud.	Average Number of Days.		Average fall.	Mean Weight of Vapour in a cubic foot of Air.	Mean additional Weight required to saturate a cubic foot of Air.	Mean degree of Humidity.	Mean whole Amount of Water in a vertical column of Atmosphere.	Mean Weight of a cubic foot of Air.	Mean Height above the Sea level.

In the formation of this Table the results from Jersey and Guernsey have not been combined, on account of the difference between the ranges of temperature of the two places.

The results from the two stations Newport and Ryde being in accordance with each other, and with those places in their latitudes, are combined. The results from Ventnor are not combined, on account of the much higher temperature, and less range of temperature than those at the other stations in the Isle of Wight.

MONTHLY METEOROLOGICAL TABLE FOR THE QUARTER ENDING SEPTEMBER 30th, 1852.

The Observations have been reduced to Mean values, and the Hygrometrical results have been deduced—from Glashier's Tables.

Year 1852.	Months.	Air and Water.	Mean Pressure of Barometer in the Month.	Temperature of the Air.				Mean Daily Rainfall.	Evaporation.	Dew Point.	Wind.	Rain.		Mean Weight of Air.	Mean additional Weight required to saturate a cubic foot of Air.	Mean Moisture of Air.	Mean Amount of Water in a cubic foot of Atmosphere.	Mean Weight of a cubic foot of Air.
				Mean.	Adapted.	Highest.	Lowest.					Range in the Month.	Mean of all the Months.

Harwell Rectory :—The readings of the wet bulb thermometer in the months of July and August seem to be too high. Linlathie :—August observations were taken on 18 days only. Depth of rain fell in September the observer ever knew. He has recorded three Septembers remarkable for excessive falls of rain; viz., in 1836, 3.70 in.; 1841, 3.74 in.; and 1846, 3.88 in.

Norwich :—The greatest

OF

THE MARRIAGES, BIRTHS, AND DEATHS IN ENGLAND.

THIS Return comprises the BIRTHS and DEATHS registered by 2190 Registrars in all the districts of England during the Autumn quarter ending December 31st, 1852; and the MARRIAGES in more than 12000 churches or chapels, about 3342 registered places of worship unconnected with the Established Church, and 624 Superintendent Registrars' offices, in the quarter that ended September 30th, 1852.

The Return of Marriages is not complete; but the defects are inconsiderable, and approximative numbers have been supplied from the records of previous years.

The Marriages and the Births, in nearly the same proportion, greatly exceed the average number of the season; and the average of the corresponding quarters of previous years is slightly exceeded by the deaths.

The registration of the year 1852 is completed, for the Births and Deaths, by the present Return. The births were 616251 in 1851, and 624171 in 1852. The deaths 395933 in 1851, and 407938 in 1852. The average annual rate of birth is 3.282 per cent., or nearly 1 in 30. In 1852 it rose to 3.472 per cent. or 1 in 29. The average annual rate of death is 2.242 per cent. (rather less than 1 in 45); in 1852 it was 2.269, or slightly above the average (1 in 44 nearly).

MARRIAGES, BIRTHS, and DEATHS, returned in the Years 1840-52 and in the Quarters of those Years.

* The numbers up to 1850 have appeared in the Annual Reports.

MARRIAGES.

76582 persons were married in the quarter ending September 1852, giving a considerable excess on the numbers (74310) married in the corresponding quarter of the previous year. The number of marriages was 38291, while in the summer quarters of 1840-3 the number of marriages never exceeded 29397, and in 1842 fell so low as 27288; in the summer of 1844 there was a sudden increase, and in the summer of 1845 the marriages were 35003; in 1847-8 the numbers fell back to 32439, and rose slowly until the summer of 1849; in each of the three succeeding summers (1850-2) the marriages have not been less than 37155 in number. Nothing probably indicates more accurately than these figures the condition of the people, or the view which they took of their prospects in life during the last eleven summers.

The rate of marriage is still high in London, and the marriages were 7109 in the last, 7345 in the previous, September quarter, whereas they amounted only to 5747 in the corresponding quarter of 1848. The marriages increased in all the South-eastern Counties. In the South Midland Division the marriages were nearly stationary. In Essex, Suffolk, and Norfolk the marriages also increased. In the South-western Division the increase of marriages was greatest in Devonshire and Somersetshire; was particularly conspicuous in Saint Thomas, Newton Abbot, Plymouth, Taunton, Yeovil, and Bath. The marriages increased in each of the West and the North Midland Counties, particularly in Stroud, Cirencester, Ludlow, and Clun (where a railway has recently been carried), Shrewsbury, Dudley, Worcester, King's Norton, Birmingham, Coventry, Warwick, Caistor, Leicester, Nottingham, where manufactures are actively carried on. In Cheshire and Lancashire marriages are much more numerous than they were in 1848, but less numerous than they were in 1850 in Manchester and in Liverpool the marriages are declining. Yorkshire is nearly in

† The Table may be read thus, without reference to the decimal points:—In the year 1848, to 100000 of the population of England there were 798 marriages, 3249 births, 2307 deaths registered.—The annual rates of marriage in each of the 4 quarters were ·661, ·805, ·755, and ·561 per cent.; the rates of death 2·794, 2·313, 2·005, and 2·108 per cent. In reading the population on the first line add 3 ciphers, (400). The 3 months January, February, March, contain 90, in leap year 91 days; the 3 months April, May, June, 91 days; each of the 2 last quarters of the year 92 days. For this inequality a correction has been made in the calculation.

the same condition as Lancashire; the marriages in the West Riding have not increased to any extent since 1850. In the Northern Division the marriages decreased; they increased in Wales.

BIRTHS.

152066 births were registered in the last quarter of the year, whereas the numbers in the quarter ending December 1851 were 149155. The births registered in London, in the West Midland counties and in Yorkshire increased; in the other Divisions the numbers scarcely exceeded those in the previous year.

INCREASE OF POPULATION.

As the births in the quarter were 152066, the deaths 99946, the natural increase was 52120. The number of emigrants who sailed in the quarter from London was 12322, Plymouth 1676, Liverpool 41317; from the three English ports 55315. The total numbers who sailed from the ports of the United Kingdom at which there are Government emigration agents amounted to 57913. Many who sailed from other ports are not in the return, and it is well known that a large proportion of the emigrants who sail from Liverpool are by birth Irish. At present it is probable, taking all circumstances into account, that the emigration from England is not equal to its natural increase.

The number of emigrants who sailed during the year 1852 from the ports of the United Kingdom at which there are emigration agents amounted to 350647, or certainly not less, taking the year through, and other ports into account, than 1000 a day.*

The price of provisions has increased since last year; in the last three months of 1852 wheat was 40s. 5d. a quarter; beef, by the carcase, at Leadenhall and Newgate markets, 4d. a pound; mutton, 5½d. a pound; potatoes (York regents), 105s. a ton at the waterside market, Southwark. In the corresponding three months The AVERAGE PRICES of Consols, of Wheat, Meat, and Potatoes; also the AVERAGE QUANTITY of Wheat sold and imported weekly, in each of the Six Quarters ending December 31st, 1852.

† Note.—The total number of quarters of wheat sold in England and Wales for the 13 weeks ending Sept. 30th, 1851, was 971,276; for the 13 weeks ending Dec. 31st, 1,423,582; for the 13 weeks ending March 31st, 1852, 1,241,921; for the 13 weeks ending June 30th, 1,143,339; for the 13 weeks ending Sept. 30th, 1,023,251; for the 13 weeks ending Dec. 31st, 1,445,906. The total number of quarters entered for Home Consumption was respectively 1,183,523; 671,803; 358,024; 710,780; 882,850; and 947,310; the second total, however, embraces the returns of 14 weeks.

* Return with which the Registrar General has been favoured by the Emigration Commissioners.

of 1851 the prices were : wheat, 36s. 7d. a quarter ; beef, 4d. per pound ; mutton, 4½d. per lb. ; potatoes, 7os. Potatoes are therefore, through the disease with which they have been infested, dearer by 50 per cent., wholesale, in London, than they were at the same time last year.

It should be recollected that the potatoe cannot be replaced in the dietary of the people by bread or meat. Fruit and vegetables are indispensable constituents of man's food ; and without a due supply of them to the population scurvy and malignant diseases of various kinds break out. Turnips, carrots, artichokes, green vegetables, oranges, and lemons should be procured, where there are means, in towns ; in the country the old practice of drinking herb teas with cream of tartar would be salutary.

STATE OF THE PUBLIC HEALTH.

99946 deaths were registered during the last quarter of the year 1852. In the corresponding quarter of 1851 the deaths were 99248. The annual rate of mortality in the last quarter is at the rate of 2·197 per cent., which is higher than the average rate, or than the mortality in the corresponding quarters of 1842-45, in 1848, in 1850-51, but much lower than 2·545 and 2·389, the rates of mortality in 1846-47.

On dividing the country into two large divisions, the first of 117 districts, comprising the chief towns, and a population of 7,795,882, the second of 506 districts, having a population of 10,126,886, it is found that the mortality in the town districts was, during the quarter, at the rate of 2·514 per cent. per annum, which is *below* the average (2·579), while the mortality in the country districts was at the rate of 1·982 per cent. per annum, or somewhat above the average of the corresponding quarter (1·941).

The unfavourable condition still prevailing in the towns is, however, too evident ; to every 4 deaths out of a given number living in the country, 5 deaths occurred out of an equal number living in the towns during the last quarter ; and on an average, out of equal numbers living, 4 die in the towns during autumn to every 3 who die in the country. The causes by which this mortality is wrought affect the whole organisation of children, and must ultimately produce a degeneration of large numbers of the English race. But there is apparently no reason why, by the use of the same or more efficient means, the health of all the town populations should not be improved to the same extent as the health of the navy. The work would be greater ; so would the benefit and the glory. It is evident, however, that though Her Majesty's Government may contribute to this happy change in the public health by proposing and carrying out good laws, they can only be successful in measures involving an infinite number of details by the energetic action of the

authorities and of the people living in towns, where human life is now so much impaired and shortened.

In LONDON the mortality was below the average. 13681 deaths were registered in the December quarter, and the causes are stated in 13302 instances in the weekly tables, of which there is a tabular summary on another page. 2851 of the deaths were referred to zymotic diseases, 74 to small-pox, 121 to measles, 952 to scarlatina (which has been unusually fatal), 343 to diarrhoea, 14 to cholera, 41 to influenza, 634 to typhus (136 less than in the year preceding). Erysipelas, fatal in 67 instances, was also less prevalent than usual. The deaths from diseases of variable and uncertain seat, as well as from tubercular diseases, fluctuate little; thus the deaths from cancer in London during the five last autumns were 240, 242, 219, 223, and 228; the deaths from consumption 1450, 1473, 1455, 1737, and 1662. The cause of the considerable increase in the deaths from consumption during the last two autumns is unknown. 1492 persons died from diseases of the brain (which vary inconsiderably from year to year), 288 persons died of apoplexy, 238 of paralysis, 118 (40 above the usual number) from epilepsy. 517 deaths were referred to diseases of the heart and blood-vessels, 2359 to diseases of the lungs and other organs of respiration. Bronchitis was the cause of 1006 deaths; pneumonia of 1036 deaths. Hernia, ileus, intussusception, and stricture of the intestinal canal were fatal in 109 instances, a number one fourth above the average. 115 mothers died in childbirth, 46 by metria (or puerperal fever), and 69 by other diseases incidental to that state. The births in London during the quarter were about 20482, consequently one mother died to every 178 children born alive. The deaths from carbuncle and phlegmon (23), though not considerable, are more numerous than in the autumn quarter of 1851, and twice as numerous as in the previous autumns (1848-50). 20 deaths were referred directly to intemperance; 27 to delirium tremens; 54 to the want of breast-milk; 2 to privation; one to cold; 26 to poison; 66 to burns and scalds. 93 deaths were referred to hanging, strangling, and suffocation; and the numbers from these causes has rapidly increased of late from 22 in the autumn of 1848 to 41, 54, 55, and 93 in the autumns succeeding. 108 deaths by drowning have also been registered in the quarter, or 50 more than the average of the corresponding quarters.

The mortality in Surrey, Sussex, and Hampshire was below the average; in Kent about, in Berkshire above, the average. The deaths in Reigate during the last three autumns were 44, 51, 68; in Croydon 132, 132, 176. In Kingston, Dartford, and the Medway the mortality was much below the average; so also was it in Margate, Ramsgate, Brighton, and Hastings. In Dover the deaths were 193, the mortality high; in Portsea Island, Southampton, and Winchester the deaths also exceeded the average number. The mortality in nearly all the districts of Berkshire on the banks of the Thames was above the average; scarlatina prevailed. The Registrar's note on Southampton is as follows:—

Births 340; Deaths 231. Of the deaths there were registered in October 70, November 60, December 101. The excess therefore is in December, which may be chiefly attributed to the state of the weather, which has been almost constantly wet. Nearly half of the deaths registered in that month have been from disease of the respiratory organs. The deaths from fever of all kinds have been only 5 in October, 6 in November, and 8 in December, including one from "malignant fever," supposed to have been yellow fever, the deceased having been one of the engineers of the "La Plata" steam ship from the West Indies, which lost several on board from that fever.

The Registrar of Broughton, Stockbridge, who is a surgeon, says:—"Since the 1st of August last upwards of 90 cases of fever have been attended by me in East Tytherly alone. Under one roof in two rooms (and one of them a small one) 14 persons sleep. In one room the mother of one family lies delirious, and in the other the mother and daughter of the other both ill of fever. Nuisances surround the cottage; there is defective drainage on a clay soil. In Broughton fever has raged and is still existing in a very swampy locality."

The mortality was below the average in several districts of the SOUTH MIDLAND COUNTIES; but Uxbridge, Peterborough, Huntingdon, and a few other districts were exceptions to the rule. Ware suffered from rheumatic and intermittent fevers; Waddesdon (Aylesbury) and Higham Ferrers from typhus; Suffolk and Norfolk

were healthier than usual: in Essex the mortality exceeded the average. Low typhoid fever prevailed in Rayleigh, Rochford; the Registrar himself had attended 130 cases of low fever. Typhus prevails to a great extent in the solitary parish situated in a valley of Southminster, Maldon, in the low village of Horningham, St. Faith; and in Downham typhus prevailed in the vicinity of a foul pool of water in the parish of Lyng (Norfolk); the cause was removed at the instance of the Board of Guardians, and the fever has abated. The dirty ponds which are found all about the country near farm and other houses are unquestionably noxious, as is proved by this and many other examples. The Registrar of Middle King's Lynn, where the births of 235 living children were registered, has ascertained that in the year 1852, 24 still-born children were interred by the sexton. In Ludham emigration, the Registrar says, appears to have diminished the births.

The mortality was below the average in all the SOUTH WESTERN COUNTIES, except Wiltshire. The health of North Bradley is in a satisfactory state, which the Registrar ascribes to the "larger command of the necessaries of life now possessed even by the poorest." The deaths in the Amesbury sub-district exceed the births, owing to the prevalence of typhus in Bulford and in Amesbury. An airy, healthy house has been engaged as a temporary fever hospital by a gentleman in the neighbourhood. Fever prevails in Cerne. In Lyme the sewers have been thoroughly cleansed, and the Common Lodging House Act has been carried out; the deaths have fallen considerably. Scarlatina has been fatal in Newlyn, St. Columb; dysentery in Falmouth, where the last of 21 deaths from the disease occurred on November 15th. Ilchester is healthy; a friendly society of 240 members, of the average age of 30-5, has lost only 2 members by death since June 1849; but at Kington Magna, Wincanton, fever of a very bad type has, within the last three months, made its appearance in the parish. The cottages are small, crowded, badly ventilated; decayed vegetables and refuse have been allowed to accumulate.

In the Sixth Division the deaths in Herefordshire and Staffordshire are above, while the deaths in the other counties are below the average. Small-pox has been fatal in Bristol; and the Registrar of St. Augustine notices a variety of the disease which has been fatal in Thatched House Lane. Typhus and scarlatina prevail in Weobley, Herefordshire; measles and whooping-cough in Clun; and the Registrar of Wem, Shropshire, records an instance of fever apparently generated by putrescent matter adjacent to the house. Scarlatina has prevailed in Staffordshire; fever and pulmonary complaints have prevailed in Birmingham. The mortality has been above the average in Stoke-upon-Trent, Wolstanton, and Newcastle-under-Lyme, also in Wolverhampton and the districts around.

In the NORTH MIDLAND DIVISION the mortality in the counties of Leicester, Nottingham, and Derby is above, in Lincoln below the average. The health of Leicester, Grantham, Basford, and Derby has not been good. Scarlatina has been fatal in Loughborough, Spalding, Worksop, and Nottingham, where typhus has also prevailed.

In CHESHIRE and LANCASHIRE the mortality is above the average; 17255 people died. Scarlatina has prevailed in many districts, and typhus has in some places been epidemic. The deaths in Liverpool are fewer, in Manchester more, than is usual.

YORKSHIRE experienced the average rate of mortality; 10657 persons died in the quarter. In Leeds and Sheffield the mortality is below the average. Scarlatina, typhus, and small-pox were epidemic in many parts of the county; 24 deaths from small-pox, 18 from scarlatina, happened in Scarborough. The healthiness of Barnsley is referred to the active employment of the labouring population.

The NORTHERN COUNTIES have been less healthy than usual; 5679 deaths have been registered; scarlatina has extensively prevailed. Newcastle-upon-Tyne and the districts around, Durham, Carlisle, Cockermouth, and Whitehaven, have lost more than the average number of lives, chiefly, it would appear, from scarlatina.

In WALES 6005 persons died. Small-pox, through the neglect of vaccination, has been prevalent and fatal. Parts of Wrexham are in a filthy state, and there epidemics prevail. Cardiganshire and the other high districts of Wales have been healthy as usual.

The meteorology of this unusual season is discussed by Mr. Glaisher (page 59).

MARRIAGES Registered in the Quarters ending September 30th, 1848-52; BIRTHS and DEATHS Registered in the Quarters ending December 31st, 1848-52, in the DIVISIONS, COUNTIES, and DISTRICTS of ENGLAND.

NOTE.—The 13 weeks of 1852, constituting the December quarter in the Weekly Tables of Mortality, ended December 26th, in which 13448 deaths were registered. In the quarter ending December 31st (p. 53), 13981 deaths were registered.

* Under the head of *sudden deaths* are classed not only deaths described as sudden, of which the cause has not been ascertained or stated; but also all deaths returned by the coroner in vague terms, such as "found dead," "natural causes," &c. &c.

On the Meteorology of England, South of Scotland, and parts of Ireland, during the Quarter ending December 31st, 1852. By JAMES GLAISHER, Esq., F.R.S., Sec. of the British Meteorological Society.

The daily temperature was below its average value till October 19th, and it was alternately in excess and defect from October 20th to October 29th. On October 30th a period of weather set in, of higher temperature and longer continuance, at this season of the year, than any on record. The mean temperature of the month of November was $48^{\circ}\cdot 9$, being $6^{\circ}\frac{1}{2}$ in excess of the average of 80 years; during which period one instance only of a higher temperature has taken place, viz. in 1818, when the average temperature of this month was 49° . The mean temperature of December was $47^{\circ}\cdot 6$, exceeding the average of the month by no less than $8^{\circ}\frac{1}{2}$, and being of higher temperature than any December, so far as our records extend. The nearest approach to this value was in 1806, when the mean temperature of December was $46^{\circ}\cdot 8$.

The quarter has been remarkable for a continuance of heavy falls of rain, which characterized the preceding quarter. In some places as much rain has fallen within this quarter as occasionally falls in the entire year. The fall in the year has greatly exceeded its average, amounting to 50 inches in depth nearly in the counties of Cornwall and Devonshire; between 30 and 40 inches at most inland places; and exceeding 58 inches at both Stonyhurst and North Shields.

During the whole of the quarter the weather has been unsettled, the reading of the barometer has been subjected to great and frequent fluctuations, and has been generally low; the amount of water mixed with the air, in the invisible shape of vapour, notwithstanding the continued rain, has been that only due to the season, and therefore, on account of the much higher temperature than usual, the degree of humidity has been less than that common to the season.

The mean temperature of the air at Greenwich for the quarter ending November, constituting the 3 autumn months, was $51^{\circ}\cdot 2$, being $1^{\circ}\cdot 9$ above the average of 80 years.

NOTE.—In reading this table it will be borne in mind that the sign (—) minus signifies below the average, and that the sign (+) plus signifies above the average.

Thunder was heard or lightning seen at different stations on October 1st, 2d, 4th, 5th, 6th, 24th, 25th, and 26th; November 1st, 2d, 3d, 5th, 6th, 11th, 12th, 13th, 14th, 15th, 16th, 17th, 18th, 25th, 27th, and 29th; December 8th, 16th, 17th, 18th, 19th, 23d, 25th, 26th, 27th, and 29th.

Remarkable falls of Rain on the 1st October at Jersey was 0·9 in., at Guernsey 0·7 in., at Newport 0·5 in., at Ryde 0·5 in., at Worthing 0·5 in., at Stonyhurst 1·0 in.; on the 2d at Jersey 1·2 in., at Guernsey 0·8 in.; on the 3d at Falmouth 0·9 in., at Alderley Edge 0·5 in.; on the 4th at Guernsey 1·8 in., at Falmouth 0·8 in., at Southampton 1·9 in., at Uckfield 2·1 in., at Midhurst 1·8 in., at Lewisham 1·2 in., at Greenwich 1·0 in. from 9 A.M. to 9 P.M., at Bicester 0·7 in., at Stone 0·7 in., at Linslade 0·7 in., at Royston 1·0 in., at Cardington 0·7 in., at Bedford 0·7 in., at Norwich 0·7 in., at Grantham 0·9 in., at Manchester 0·5 in., at Wakefield 0·5 in., at Leeds 0·5 in., at Stonyhurst 0·5 in., at North Shields 2·4 in.; on the 5th at Jersey 1·7 in., at Newport 2·3 in., at Ryde 1·3 in., at Worthing 1·6 in., at St. John's Wood 1·0 in., at Enfield 1·0 in., at Hartwell Rectory 0·7 in., at Holkham 0·6 in., at Bowdon 0·5 in., at Durham 1·0 in.; on the 6th at Ennis 0·5 in.; on the 21st at Falmouth 0·5 in., at North Shields 1·0 in.; on the 24th at Guernsey 0·7 in., at Lewisham 0·7 in., at Norwich 0·5 in.; on the 25th at Jersey 0·9 in., at Falmouth 1·1 in., at Newport 1·1 in., at Ryde 1·2 in., at Worthing 2·4 in., at Southampton 0·8 in., at Uckfield 1·8 in., at Midhurst 0·6 in., at Lewisham 0·6 in., of which 0·5 in. fell in 2 hours, at Greenwich 0·9 in., at

Ennis 0.5 in., at Holkham 0.8 in.; on the 16th at Falmouth 1.2 in., at Ryde 1.1 in., at Southampton 1.1 in., at Uckfield 1.1 in., at Midhurst 1.5 in., at Lewisham 0.8 in., at Greenwich 0.5 in., at St. John's Wood 1.1 in., at Ekester 0.6 in., at Ennis 0.6 in., at Norwich 0.6 in., at Grantham 0.5 in. in 6 hours, at Nottingham 0.7 in., at Manchester 0.5 in., at Wakefield 1.2 in., at Leeds 1.0 in., at Stonyhurst 0.7 in.; on the 27th at Jersey 1.0 in., at Guernsey 1.3 in., at Newport 1.2 in., at Ryde 1.4 in., at Worthing 1.2 in., at Uckfield 0.9 in., at Hartwell Rectory 0.5 in., at Norwich 0.7 in., at Grantham 0.9 in., at Alderley Edge 1.1 in., at Bowdon 1.1 in., at Stonyhurst 0.7 in.; on the 28th at Jersey 0.9 in., at Durham 0.5 in., at North Shields 1.4 in.; on the 29th at Falmouth 0.7 in.; on the 30th at Guernsey 0.5 in., at Newport 0.5 in., at Ryde 0.6 in., at Southampton 0.6 in., at Ennis 0.6 in.; on the 31st at Newport 0.5 in., and at Ryde 0.5 in.; on the 1st November at Cong 1.0 in.; on the 2d at Newport 0.5 in., at Ryde 0.5 in., at Worthing 0.5 in., at Southampton 0.5 in., at Midhurst 0.6 in., at Lewisham 0.5 in., at Greenwich 0.5 in., at St. John's Wood 0.8 in., at Royton 0.6 in., at Norwich 0.9 in.; on the 3d at Newport 0.5 in., at Worthing 0.5 in., at Southampton 0.6 in., at Stonyhurst 0.7 in.; on the 4th at Falmouth 0.8 in., at Wakefield 0.5 in., at North Shields 1.1 in.; on the 5th at Ennis 0.9 in., at Cong 0.6 in., at Bowdon 0.5 in., at Stonyhurst 0.7 in.; on the 6th at Falmouth 1.3 in., at Bowdon 0.9 in.; on the 7th at Southampton 0.9 in.; on the 8th at Newport 0.5 in., at Midhurst 0.5 in., at Cong 0.6 in.; on the 10th at Nottingham 1.7 in., at Hawarden 1.2 in., at Alderley Edge 0.7 in., at Wakefield 0.5 in.; on the 11th at Rose Hill 1.1 in., at Stone 1.2 in., at Hartwell Rectory 1.2 in., at Linslade 1.2 in., at Cardington 1.4 in., at Bedford 1.5 in., at Ennis 0.9 in., at Norwich 1.2 in., at Holkham 1.3 in., at Cong 0.7 in., at Alderley Edge 0.5 in., at Bowdon 0.7 in., at Wakefield 0.9 in., at Leeds 0.8 in.; on the 12th at Lewisham 1.2 in., at Greenwich 0.8 in., at St. John's Wood 1.0 in., at Ekester 1.0 in., at Royton 0.8 in., at Ennis 0.6 in., at Grantham 1.0 in., at Manchester 0.8 in.; on the 13th at North Shields 1.6 in.; on the 14th at Newport 0.5 in., at Southampton 0.5 in., at Midhurst 0.7 in., at Stone 0.5 in., at Hartwell Rectory 0.7 in., at Royton 0.8 in., at Bedford 0.5 in., at Norwich 0.7 in., at Wakefield 0.8 in., at Leeds 0.8 in., at North Shields 1.0 in.; on the 15th at Guernsey 1.0 in., at Falmouth 0.5 in., at Newport 0.5 in., at Ryde 0.6 in., at Southampton 0.8 in., at St. John's Wood 1.0 in., at Grantham 0.5 in., at North Shields 0.8 in.; on the 16th at Newport 0.7 in., at Ryde 0.5 in., at Midhurst 0.5 in., at Nottingham 0.6 in., at North Shields 1.6 in.; on the 19th at Guernsey 1.0 in., at Falmouth 0.6 in., at Lewisham 0.6 in.; on the 20th at Guernsey 0.5 in., at Falmouth 1.2 in., at Southampton 0.8 in.; on the 21st at Guernsey 0.5 in., at Falmouth 0.8 in., at Newport 0.6 in., at Ryde 0.6 in., at Southampton 0.9 in., at Midhurst 0.7 in., at Bicester 0.5 in., at Norwich 0.6 in.; on the 23d at Falmouth 1.1 in., at Newport 0.5 in., at Ryde 0.5 in., at Worthing 0.7 in., at Grantham 0.6 in.; on the 24th at Guernsey 0.8 in., at Newport 0.5 in., at Ryde 0.5 in., at Worthing 0.7 in., at Southampton 0.9 in., at Midhurst 0.6 in., at Ennis 0.7 in., at Cong 0.8 in.; on the 25th at Falmouth 0.5 in., at Southampton 0.7 in., at Midhurst 1.1 in., at Ennis 0.8 in., at Nottingham 0.5 in., at Wakefield 0.8 in., at Leeds 0.8 in., at North Shields 1.6 in.; on the 26th at Guernsey 0.8 in., at Newport 0.5 in., at Southampton 1.1 in., at Uckfield 1.1 in., at Lewisham 1.0 in., at Greenwich 1.0 in., at St. John's Wood 0.7 in., at Enfield 0.5 in., at Norwich 0.5 in., at Cong 0.5 in., at Stonyhurst 0.8 in., at Durham 0.6 in., at Glasgow 1.2 in.; on the 27th at Guernsey 0.8 in., at Falmouth 0.5 in., at Newport 0.6 in., at Worthing 0.9 in., at Midhurst 0.5 in., at Enfield 0.5 in., at Grantham 0.6 in., at Holkham 0.6 in., at Stonyhurst 0.5 in.; on the 28th at Ennis 0.7 in., at Durham 0.5 in.; and on the 29th at Ryde 0.5 in. On 4th December at Manchester 0.7 in., at Stonyhurst 1.1 in., at Glasgow 0.8 in.; on the 5th at Falmouth 0.8 in., at Bowdon 0.6 in., at Stonyhurst 1.8 in.; on the 6th at Guernsey 0.6 in., at Norwich 0.5 in.; on the 7th at Midhurst 0.6 in.; on the 8th at Jersey 0.9 in., at Newport 0.6 in., at Ryde 0.8 in., at Worthing 0.6 in., at Durham 0.6 in., at North Shields 0.8 in.; on the 11th at Falmouth 0.5 in., at Glasgow 0.7 in.; on the 12th at Glasgow 0.9 in.; on the 14th at Guernsey 0.6 in.; on the 15th at Newport 0.5 in., at Ryde 0.5 in., at Southampton 0.5 in., at Midhurst 0.6 in., at Stonyhurst 0.5 in., at Durham 0.6 in., at North Shields 0.6 in.; on the 16th at Stone 0.8 in., at Hartwell Rectory 0.9 in., at North Shields 0.8 in.; on the 17th at Jersey 0.8 in., at Guernsey 0.6 in., at Worthing 0.5 in., at Southampton 0.5 in., at Uckfield 1.0 in., at Midhurst 0.5 in., at Leeds 1.3 in., at North Shields 0.6 in., at Glasgow 0.9 in.; on the 18th at Newport 0.5 in., at Worthing 1.2 in., at Southampton 0.5 in.; on the 19th at Glasgow 1.1 in.; on the 20th and 21st at Stonyhurst 0.5 in. fell on each day; on the 24th at Manchester 0.7 in., at Wakefield 0.5 in.; on the 25th at Guernsey 1.1 in., at Glasgow 0.6 in.; on the 26th at Jersey 1.0 in., at Falmouth 0.7 in., at North Shields 1.3 in.; on the 27th at Newport 0.5 in., at Ryde 0.5 in., at Southampton 0.8 in., at Midhurst 0.8 in., at Stonyhurst 0.6 in., and at Glasgow 0.7 inches.

Fog was prevalent on 20 days in October, but general on 19th and 20th only; it was present 17 days in November and 14 days in December, but was not general on any day.

Hail fell on 23 days in the quarter at the different stations.

Aurora were seen on 5th, 23d, 24th, 25th, and 26th October at Stone. On 3d November at Oxford, Stone, Nottingham, Liverpool, and Dunino; on the 7th at Hawarden; on the 8th at Stonyhurst; on the 11th at Lewisham and Greenwich; on the 18th at Stone; and on the 30th at Liverpool. On 6th December at North Shields and Dunino; on the 9th at Rose Hill; on the 10th at Dunino; on the 12th at Stone; on the 15th at Grantham; and on the 20th at Stone.

Solar Halos were seen on 17 days within the quarter.

Lunar Halos were seen on 26 days in the quarter, that on December 25th was seen triple at Liverpool.

Snow fell on 10th November at Stonyhurst; on the 11th at Mansfield, Gainsborough, Manchester, Wakefield, Leeds, and Stonyhurst; on the 12th at Stonyhurst; on the 28th at North Shields; on the 29th at Bicester, Linslade, Bedford, Durham, and North Shields; and on the 30th at Bedford and Grantham, and at North Shields (sleet). On 22d December at Durham.

NAMES OF THE PLACES.	WIND.										RAIN.									
	General Direction.										Mean Amount of Cloud.									
	Mean Pressure of dry Air reduced to the level of the Sea.	Mean Air Temperature of the Air.	Highest Reading of the Thermometer.	Lowest Reading of the Thermometer.	Mean Daily Range of Temperature.	Mean Monthly Range of Temperature.	Range of Temperature in the Quarter.	Mean Temperature of the Air.	Mean Temperature of the Air.	Mean Temperature of the Air.	Mean Amount of Cloud.	Number of Days on which it fell.	Amount collected.	Mean Weight of Vapour in a cubic foot of Air.	Mean additional Weight required to saturate a cubic foot of Air.	Mean degree of Humidity.	Mean whole Amount of Water in a vertical column of Atmosphere.	Mean Weight of a cubic foot of Air.	Height of Clouds of the Quarter above the level of the Sea.

The mean of the numbers in the first column is 29.417 inches, and it represents that portion of the reading of the barometer due to the pressure of air; the remaining portion, or that due to the pressure of water, is 0.228 inch; the sum of these two numbers is 29.710 inches, and it represents the mean reading of the barometer for the quarter at the level of the sea.

The highest readings of the thermometer in air were 70° 0' at Jersey, Helston, and Chiswell Street, and 66° 0' at Manchester. The lowest readings were 23° 0' at Dunino, 24° 0' at Nottingham, and 25° 0' at York. The least daily ranges of temperature took place at Guernsey, Liverpool, Whitehaven, Ventnor, and Worthing; and the greatest at Midhurst, Manchester, Ryde, Wakefield, and Aylesbury.

Main fell on the least number of days at Newcastle, Bicester, Norwich, and Dunino; and on the greatest number at Bowdon, Royston, Falmouth, and Ryde. The least falls took place at Gainsborough, Cardington, Grantham, and Holkham; and the mean amount at these places is 9.6 inches. The largest falls occurred at North Shields, Torquay, Truro, Guernsey, and Newport, and their mean is 22.7 inches.

QUARTERLY METEOROLOGICAL TABLE for different PARALLELS of LATITUDE.

In the formation of this Table the results from Jersey and Guernsey have not been combined, on account of the difference between the ranges of temperature of the two places. The results from Ventnor are not combined, on account of the much higher temperature, and less range of temperature than those at the other stations in the Isle of Wight. The results from Chiswell Street have also not been combined.

The history of the United States of America is a story of growth and development. It begins with the first settlers who came to the continent in search of a new life. They found a land of vast resources and opportunities, but also one of challenges and hardships. The early years were marked by the struggle for survival and the establishment of a new society. As the population grew, the need for a more organized government became apparent. The founding fathers came together to create a new form of government, one that would protect the rights of the people and ensure the stability of the nation. This was the birth of the United States of America. The story continues with the expansion of the territory, the growth of the economy, and the development of a national identity. It is a story of a people who have overcome many difficulties and achieved great things. The United States of America is a land of freedom and opportunity, a place where the dream of a better life has become a reality for millions of people. The history of the United States is a testament to the power of the human spirit and the ability of a people to create a better future for themselves.

Fog was prevalent on 20 days in October, but general on 19th and 20th only; it was present 17 days in November and 14 days in December, but was not general on any day.

Hail fell on 23 days in the quarter at the different stations.

Aurora were seen on 5th, 23d, 24th, 25th, and 26th October at Stone. On 3d November at Oxford, Stone, Nottingham, Liverpool, and Dunino; on the 7th at Hawarden; on the 8th at Stonyhurst; on the 11th at Lewisham and Greenwich; on the 18th at Stone; and on the 30th at Liverpool. On 6th December at North Shields and Dunino; on the 9th at Rose Hill; on the 10th at Dunino; on the 12th at Stone; on the 15th at Grantham; and on the 20th at Stone.

Solar Halos were seen on 17 days within the quarter.

Lunar Halos were seen on 26 days in the quarter, that on December 25th was seen triple at Liverpool.

Snow fell on 10th November at Stonyhurst; on the 11th at Mansfield, Gainsborough, Manchester, Wakefield, Leeds, and Stonyhurst; on the 12th at Stonyhurst; on the 28th at North Shields; on the 29th at Bicester, Linslade, Bedford, Durham, and North Shields; and on the 30th at Bedford and Grantham, and at North Shields (sleet). On 22d December at Durham.

The mean of the numbers in the first column is 29.417 inches, and it represents that portion of the reading of the barometer due to the pressure of air; the remaining portion, or that due to the pressure of water, is 0.233 inch; the sum of these two numbers is 29.710 inches, and it represents the mean reading of the barometer for the quarter at the level of the sea.

The highest readings of the thermometer in air were 67° 0 at Jersey, Helston, and Chiswell Street, and 66° 0 at Manchester. The lowest readings were 25° 0 at Dunino, 24° 8 at Nottingham, and 25° 0 at York. The least daily ranges of temperature took place at Guernsey, Liverpool, Whitehaven, Ventnor, and Worthing; and the greatest at Midhurst, Manchester, Ryde, Wakefield, and Aylesbury.

Rain fell on the least number of days at Newcastle, Bicester, Norwich, and Dunino; and on the greatest number at Bowdon, Royston, Falmouth, and Ryde. The least falls took place at Gainsborough, Cardington, Grantham, and Holkham; and the mean amount at these places is 9.6 inches. The largest falls occurred at North Shields, Torquay, Truro, Guernsey, and Newport, and their mean is 23.7 inches.

Remarks:—October. The reading of the barometer is relatively anomalous by nearly half an inch, and those in November and December are both too great. In November on 10 days and 11 nights in December on 10 days and 11 nights in the latter month the barometer fell below the mean level of the quarter. The barometer readings are given in inches and tenths of an inch.

[illegible]

Ayerbury:—The readings of the barometer are not good, evidently owing to the instrument not being good. Hartwell House :—Readings of the barometer was altered conjuncturally. October 20th, sh. p.m., from 29.648 to 29.643; the 27th, 4th p.m., from 29.643 to 29.640; the 28th, 4th p.m., from 29.640 to 29.639. Enfield:—The readings of the barometer were all from 29.645 to 29.648. Haverhill:—Readings of the barometer, November 2nd, at 9h. A.M., altered from 29.824 to 29.829. Stone:—Readings of barometer, December 28th, at 9h. A.M., altered from 29.824 to 29.829.

LETTER to the REGISTRAR GENERAL on the CAUSES of DEATH in ENGLAND,
by WILLIAM FARR, Esq., M.D., F.R.S.

SIR,

21st August 1855.

THE state of the public health in the year 1852 presented no unusual feature; the mortality was near the average, and no epidemic prevailed extensively. The mean temperature of the year at Greenwich was 50.6° , which is 2.2° in excess of the average of 80 years; the mean temperatures of each of the four quarters of the year was 41.4° , 51.2° , 61.8° , and 48.1° . The excess of temperature was more than 3.1° in the first and 4.6° in the last quarters; the summer temperature was also high, and the temperature of the spring quarter alone was below the average. The fall of rain was 34.4 inches, or 10.3 inches in excess of the average. These meteorological conditions favoured the development of diarrhoea, which, it will be seen, was more fatal than it had been in the two previous years. Full accounts of the meteorology and notices of the varying sanitary condition of the year will be found in the quarterly reports, and in Mr. Glaisher's statements by which they are accompanied.

The causes of 6696 of the 407,135 deaths are not assigned; and of 3591 deaths, chiefly cases in which coroners were the informants, all that was ascertained was that they were "sudden."

306,848 of the deaths are referred to their causes in the annexed Tables.*

I. ZYMOTIC DISEASES (Z.)

The diseases of this important class were fatal to 92,412 persons, or to 5 in 1000 of the population. In 100 deaths, 23 were the result of zymotic diseases. Less fatal proportionally than in 1849, the mortality by zymotic diseases in 1852 exceeded the mortality in 1850 and in 1851.

Scarlatina, or scarlet fever, was unusually prevalent, and caused 18,887 deaths; whereas the deaths in the three previous years by this disease ranged from 13,123 to 13,634.

Diarrhoea was nearly as fatal as scarlatina; 17,617 deaths were referred to this cause, a number little less than the number of deaths from diarrhoea in the cholera year (1849). 1381 persons died of cholera, 1359 of influenza.

Of *Typhus* 17,845 persons died. The number of annual deaths from this cause has not differed much since 1849, except in 1850, when 14,296 deaths from typhus were registered.

Small-pox destroyed 7320 lives, chiefly of unvaccinated children.

The other zymotic diseases that chiefly affect children are measles (causing 5846 deaths), whooping-cough 8022, and croup 4058.

Syphilis is mentioned as the direct cause of 623 deaths. Many infants, infected from birth, die of this pernicious disease.

II. SPECIFIC OR CONSTITUTIONAL DISEASES (S.)

Dropsy is after consumption the most fatal of the diseases of this class; to it 9788 deaths are referred. The researches of modern pathologists prove that general dropsy is nearly always the result of some structural disease of the heart or kidneys. *Cancer*, including tumor, was fatal in 5477 instances, mortification in 1291, hæmorrhage in 1447.

Consumption is the greatest, the most constant, and the most dreadful of the diseases that afflict mankind. It is the cause of nearly half the deaths that happen between the ages of 15 and 35 years, and during one year was fatal in 50,594 cases. *Tuberculosis mesenterica* is the form of tubercular disease chiefly incidental to children, 4700 deaths were referred to this cause; 8289 to hydrocephalus, or water on the brain; and 2580 to scrofula affecting the glands and bones.

85,818 deaths, or 21 in every 100 deaths, are referred to this group, comprising tubercular diseases and diseases of uncertain or variable seat, which destroyed in the year 4,793 in every 1000 of the population.

TABLE (1)—CAUSES OF DEATH registered in ENGLAND in each of the Years 1849, 1850, 1851, and 1852.

III. ORGANIC DISEASES OR DISEASES OF PARTICULAR ORGANS (O.)

This group comprises the pure inflammations, and the local disorders of the eight great systems of organs composing the body. The causes of 144,775 deaths fall under this head.

The *brain, spinal marrow, and nerves* were in 50,733 cases the seats of fatal diseases of various forms, including cephalitis (3686 deaths),

TABLE (2)—ENGLAND. CAUSES OF DEATH. To 1,000,000 PERSONS LIVING, the DEATHS from each Class of Causes, and from each Cause, in the Years 1851 and 1852.

42 Convulsions - - - -	1,281	1,271			
43 Disease of Brain, &c. - - - -	175	196			

The Table may be read thus: In 1852 to every 1,000,000 Persons living there were 22,263 deaths from All Causes (nearly 22 and 1-3d in 1000); 409 deaths from small-pox; 326 from measles; 1055 from scarlatina, and so on.

apoplexy (7896 deaths), paralysis (7911 deaths), epilepsy (1935 deaths); convulsions were assigned as the cause of 24,558 deaths, chiefly of infants under two years of age. The convulsive form of disease affects infancy and youth; apoplexy commences in middle life to become fatal, and continues to reign until, in advanced age, it falls into the predominating paralytic forms.

TABLE (3).—ENGLAND. CAUSES OF DEATH. To every 1,000,000 Deaths from All Causes, the proportional Numbers from each Class of Causes, and from each Cause, in the Years 1851 and 1852.

CAUSES OF DEATH.	Proportional Number to 1,000,000 Deaths.		CAUSES OF DEATH.	Proportional Number to 1,000,000 Deaths.

The Table may be read thus:—To 1,000,000 deaths from All Causes in 1852 there were 18,380 deaths from small-pox; 14,209 from measles; 47,106 from scarlatina, and so on. By placing a decimal point before the three figures on the right hand, the proportion will be shown to 1,000 deaths; thus, there were 18'380 deaths from small-pox to every 1,000 deaths from All Causes.

The mortality by diseases of the nervous system was at the rate of 2·833 in 1000 on the living population, or 13 in every 100 deaths.

Diseases of the *heart* and *blood vessels* proved the cause of 12517 deaths, or of 3 in every 100 deaths. To obtain the total deaths from defects of the circulating system a certain number of the deaths by dropsy should be added.

Aneurism was fatal in 266 cases, 47400 deaths were the results of diseases of the lungs and air-tubes; including, 17,073 of bronchitis, 21,421 of pneumonia, 945 of pleurisy, and 4309 of asthma. 12 in 100 deaths are by diseases of the respiratory organs, and 24 in 100 if phthisis be added as it sometimes is, though it is not confined to the chest, but affects the organs of the abdomen to a great extent.

The diseases of the intestines and their appendages were fatal in 23,741 cases, including 4,413 deaths in teething and 391 by quincy. 5890 persons died of gastritis, enteritis, and peritonitis; 976 of ulceration of the bowels, 683 of hernia, 1088 of ileus (and constipation), 250 of intussusception, 291 of stricture of the œsophagus, intestine, or rectum; 2159 of these and other imperfectly ascertained diseases of the organs of digestion.

The diseases of the pancreas are not easily ascertained, and they are evidently rarely fatal, for only 5 deaths are referred to this head.

Ascites was fatal in 698 cases. It is often the result of a peculiar affection of the liver (cirrhosis), in which the circulation through the portal veins is retarded.

To *liver diseases* 6823 deaths are referred; to hepatitis 1594, jaundice 1281, other diseases 3948.

The spleen is rarely the seat of fatal diseases in England; only 74 deaths are placed under this head.

The liver and spleen suffer much more frequently in Europeans living in the tropics, and in countries where agues and remittent fevers prevail, than in England, where only 3·85 in 10,000 people died of these diseases. The mortality by diseases of all the digestive organs, together was at the rate of 13·26 in 10,000, or 1·326 in 1000 of the population. Rather less than 6 deaths in 100 are referable to this group of diseases.

The brain, the heart, the lungs, the stomach, are the centres of the four great systems which are never seriously impaired in their functions without danger to life; their diseases are the direct causes of 33·6 in every 100 deaths.

The urinary organs were the seats of fatal disease in 3689 cases, including 197 of nephritis, 570 of nephria, 106 of ischuria, 231 of cystitis, and 251 of stricture of the urethra, which is generally a consequence of gonorrhœa.

Diabetes and stone or gravel are apparently diseases of the blood; but as the characteristic chemical products, sugar, lithic acid, and salts of various kinds, are found in the urine, they are generally classed under the urinary organs. Diabetes is fatal yearly to rather more than 400 persons, chiefly adults, and males; stone to rather more than 200 persons, nearly all males.

Only 2 persons in 10,000 die annually of diseases of the urinary organs, which thus cause less than 1 in 100 of the deaths that are registered.

The *diseases of the reproductive organs* are rarely fatal; they caused 8 in every 1000 deaths, or the death in the year of 1·81 in 10,000 living. If childbirth is included, the deaths registered under this head are 3250; namely 98 by paramenia, 178 by ovarian dropsy, and 699 by other diseases of the uterus, testis, &c. &c. The deaths by *childbirth* were 2275, besides 972 deaths by *metria* (or puerperal fever) in the zymotic class, making 3247 deaths in the aggregate. One mother died to 192 children born alive.

The diseases of the *bones, joints, and muscles* were fatal in 2615 instances, including 1476 deaths by rheumatism, chiefly of a chronic character; for the 454 deaths by rheumatic fever are in the zymotic class. The proportion of deaths by this class of diseases was nearly 7 in 1000 deaths; and the mortality that they wrought was 1·46 in 10,000 of the population.

The deaths by diseases of the skin and cellular tissue, including 233 deaths by carbuncle, 365 deaths by phlegmon, were 830; or 2 in 1000 deaths, and 46 on a *million* of the *population*.

DISEASES OF BIRTH, GROWTH, NUTRITION, AND DECAY (D.)

Death was the result of malformations in 861 cases. 19,075 deaths, or nearly 5 in 100 deaths, were referred to premature birth and debility, chiefly in infancy; 13,056, or 3 in 1000 deaths, to atrophy; and 26,376, or nearly 7 in 1000 deaths, to old age.

VIOLENT DEATHS, OR DEATHS BY EXTERNAL CAUSES (E).

The deaths under this great class amounted to 14475, or to 3·6 in 100 deaths. 8 in 10,000 of the people living were killed by various forms of violence.

It is stated that 66 persons died by cold, 54 by privation of food, 23 by neglect, 593 by the want of breast-milk, and 308 by intemperance; but these numbers are probably understated.

Poison led to 370 deaths, burns and scalds to 2582, hanging and suffocation to 1330, drowning to 2719, fractures and contusions to 4847, wounds, gunshot and incised, to 622 deaths; of other forms of violence 961 persons died.

Tables are now in the course of formation which will show the peculiar diseases and the dangers of each sex at several periods of age; and I postpone any further commentary on the facts until those Tables are ready for publication.

I have the honour to be,

Sir,

Your obedient and humble Servant,

WILLIAM FARR.

[The following Index furnishes a reference to the *Number* of each *District* in the topographical arrangement adopted in the Tables of Abstracts contained in the Report, the numbers running consecutively from 1 to 623.* In forming the alphabetical arrangement the principle is adopted of placing compound names in the order in which they are pronounced: thus, East Ashford will be found under the letter E, and not under A, as Ashford, East.]
